

Tillamook Jottings.

Mrs. Cora McBride, of Portland, the department I and I officer of the Woman's Relief Corps, held the annual inspection of Corinth W. R. C. on Wednesday afternoon and was the guest of Mrs. O. A. Schultz and Mrs. A. H. Rugar.

The regular meeting of the Women's Civic Improvement Club will be held at the Presbyterian Guild Hall, Saturday, Oct. 2, at 2:30. All members are requested to be present, as business of importance is to be transacted and plans for the year's work considered. Delegates to the Annual Convention of the State Federation will be elected at this meeting.

At the home of Mrs. A. H. Rugar on Wednesday evening was given a 500 party in honor of Mrs. Cora McBride, of Portland, Mrs. O. A. Schultz and Mrs. A. J. Stillwell being the assisting hostesses. Those present were Mr. and Mrs. Hill, Mr. and Mrs. Conover, Mr. and Mrs. Gruber, Mr. and Mrs. Carl Schultz, Mr. and Mrs. Walls, Mr. and Mrs. Partridge, Mrs. McBride, Mrs. Huet, Mrs. Bowls, Mrs. Stranahan, Mrs. Stillwell and Mrs. Rugar.

Cheese Score at State Fair.

Just as we go to press a message from Salem says the cheese scoring at the State Fair was as follows: Hugh Barber, Fairview, 95 1/2 points; Ballenstein, Menmouth, 95; H. Thomas, Cloverdale, and H. Haugen, Elwood, 94 1/2; Unknown name, 94; A. Schmelzer, Red Clover, tied with three other Tillamook factories, 93.

Sunday at the Presbyterian Church.

The Sacrament of the Lord's Supper will be observed in the morning service, which will be an occasion of special interest since it is the first to be administered since the coming of the new minister. The subject of the sacramental address will be "The Finished Work." All the members are expected to be present and they join with the minister in an invitation to all in the community who are without their local church connections to join them in this service. "Royal Ambition" is the sermon subject for the evening service at 7:30. Young men and young women will especially find something of interest in this message.

Tillamook Wins Prize at National Dahlia Show.

Tillamook County was represented at the National Dahlia Show in Portland last week, J. H. Dunstan taking out 12 boxes of those flowers, contributed by Mrs. L. M. Zaddach four boxes; Mrs. J. H. Dunstan, three boxes; Mrs. C. B. Wiley, one box; Fred C. Baker, four boxes. These were entered in the amateur class by Mrs. Dunstan, and won the first prize for the best display outside of Portland.

We understand that Mrs. F. Zaddach was considered in the professional class, as she sells bulbs, consequently her splendid assortment of dahlias were not included in the amateur display from Tillamook.

Ralph Parlette to Lecture.

Ralph Parlette, the well known humorist-editor, is to lecture here on Friday, October 20th instead of Monday, October 25th, as originally announced. The great demand for Parlette's services made the change necessary.

Parlette began lecturing in 1896 and he has been touring the United States annually ever since that time. He gives all the year to this work. On trains and in spare moments, he edits the Lyceum Magazine. He has filled over 4,000 pay engagements and has addressed more than 125,000 people each year. He travels 50,000 miles each year.

The reason Parlette grows in demand each year, even though his price keeps rising, is that he preaches Optimism and Good Cheer. His lecture "University of Hard Knocks" has been delivered over 2,000 times and has been published in book form. "Paradise Regained" is the title of another of his lectures that is well known. On another page will be found some of his characteristic sayings.

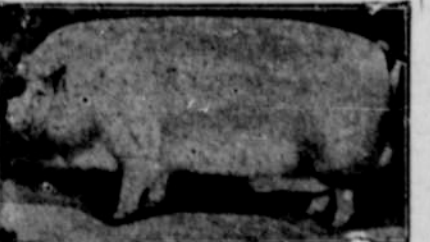

School Notes.

Friday night in the Guild Hall will see a reception for the new students and new members of the faculty given by the classes, Sophomores, Juniors and Seniors. From the preparation being made this promises to be a very interesting and enjoyable program.

Both football and debate are attracting a good deal of attention by sections of the students. Every evening this week the school grounds have been the scene of light football practice.

The class in debate is working hard on the state debating question of this year "Military training for young men in the United States similar to the Swiss plan."

O.I.C.

I have some choice young pigs for sale, both sexes, the kind that matures very young. One of my herd boars weighed 620 lbs. at eighteen months old. My hogs have won ribbons at county and state fairs.

Phone or write for prices.
JOE DONALDSON,
R. F. D. 1, Tillamook.

The following officers have been elected by the Freshmen and Sophomore classes:
Freshmen—Pres., Will Kennedy; Vice Pres., Glenn Leach; Sec. Leslie Conover; Treas., Max Beals.
Sophomores—Pres., Howard Williams; Vice Pres., Walter Stark, Sec., Nellie Gaylord; Treas., August Boquist; Sargent-at-arms, Gertrude Ball.
The girls' hiking club was organized this week and made an evening excursion Wednesday. A very enjoyable time is reported.

REMARKABLE DISCOVERY

Wireless Transcontinental Telephony With Tillamook County.

(Special to the Tillamook Headlight)
San Francisco, Cal., Sept 29th, 1915.—Wireless Transcontinental Telephony ceased to be a dream and became a reality at 10 o'clock yesterday morning. At that hour Theodore N. Vail, President of the American Telephone and Telegraph Company, spoke a few sentences to John K. Carty, Chief Engineer of the American Telephone and Telegraph Co. Vail was in New York and Carty was at Mare Island, San Francisco. The words traveled three thousand miles through air without a wire to carry them, propelled through ether at the rate of 56,000 miles per second. The human voice has been hurled into space at the Naval Radio station at Arlington, Virginia, and conducted by ether to the Mare Island towers. The achievement marks the solution of nearly every problem involved with the future development of telephony. Again Vail has ordered Carty to accomplish the "impossible," and again his orders have been carried out. The achievement has been fraught with meaning. It means that the problem of talking across the Atlantic Ocean has been solved. It means that a man in New York can talk to Honolulu and Tokio as soon as the construction work has been completed. The voice can be carried by wires to San Francisco over the new transcontinental wires of the American Telephone and Telegraph Company and from there hurled through air over the ocean to Tokio. It can be carried in relays around the world.

The announcement of yesterday's achievement brings the day nearer when it will be easy to talk from San Francisco to London and Paris, as it is today to talk over the transcontinental wires from San Francisco to New York. Furthermore, it means that passengers on ships will be able to call central and talk to shore, and if these achievements are not enough another baffling problem was solved. A perfect connection was made between a telephone wire and a wireless ether line, making it possible for everybody with the regular Bell Telephone, to be connected with the air. The success of Transatlantic and Transpacific Telephony depends largely upon the success of the attempt to span the continent with an ether line, and the achievements of wireless Telephony means that the telephone will bridge the Atlantic as soon as the conditions in Europe are normal. It is a vastly more difficult task according to Chief Engineer Carty, to cross land with its ever changing topography than to cross an equally great or greater expanse of level water. Chief Engineer Carty, first heard President Vail's voice yesterday, first comment was, "the problem of Transatlantic communication has been solved" and those gathered round him predicted that it would not be long before the wireless Telephone and Telegraph Company established communication between Washington D. C. and the Isthmus of Panama by wireless telephony. The achievement of yesterday was only a further development of the earlier success.

The announcement of the success in talking from Washington to the Isthmus was withheld until the greater goal had been reached. President Vail did not leave his apartments in the Hotel Gotham when he called Chief Engineer Carty at Mare Island. His voice traveled over wires to the Naval Radio station at Arlington, Virginia, and were there transferred to the air line of the company at Mare Island. For several weeks, Chief Engineer Carty has been in San Francisco, secretly working out the details of the great problem. On other occasions, similar connections have been made, but the transmission did not satisfy Carty. He was working for perfection. Tuesday conditions looked right and a small party left San Francisco at 3 o'clock a.m.

The party was conveyed by boat to Mare Island from Vallejo, and from then until 11 o'clock preliminary tests were made until all obstructions had been removed from the wireless lines. At that hour Chief Engineer Carty surrounded by a group of Naval officers and officials of the American Telephone and Telegraph Co., made ready for the supreme test, and awaited the first call. Carty took up the receiver, he smiled with satisfaction, and those around him fixed receivers to their ears. Among them, Lieut. Commander Sweet, U. S. N., retired; Allen H. Babcock, Consulting Engineer of the Southern Pacific Railway Co.; Chief Electrician Peterson of the U. S. Naval Radio Station; H. D. Arnold; A. H. Griswold and several other engineers of the American Telephone and Telegraph Co.

In addition to President Vail, U. N. Bethel, senior vice-president of the American Telephone and Telegraph Company; John I. Waterberry, one of the company's directors; Mr. B. Gherardi, one of Carty's engineer staff, also spoke from Mr. Vail's office. All of the other voices were distinctly heard and easily distinguished by the group at Mare Island Station. Before the connection was made in New York, a large number of wireless telephone messages were received from the Naval Radio station at Arlington, Virginia, among those who talked to the party at Mare Island station from Arlington, were Captain Bullard, chief of the radio service of the U. S. Navy; Colonel Sam Reber, U. S. Army; Dr. S. B. Jewett; Prof. John Mills; and A. F. Swenson; Chief Engineer Carty's staff.
