

**Murderer Wanted in Idaho.**

C. W. Leaf, a sheriff of Idaho, was in Tillamook this week in answer to a description of a man sent by Sheriff Crenshaw, to see if the man who was in custody here, is the murderer of Olsen, a farmer of Idaho. The brother of the murdered man accompanied the sheriff and the suspect was taken to Portland on Thursday morning.

The crime of which he is suspected is the murdering of a farmer on his mountain farm about the first of November, and the peculiar fact about the case is that the body of the murdered man has never been recovered, until the weather conditions in the mountains of Idaho will permit a search. The pictures taken by the local officers were particularly identified by witnesses although there is some doubt.

**Special Day at the Presbyterian Church.**

"Life's Walk in the Way of Spiritual Shadows" is the subject of the sacramental address next Sunday at 11, when communion will be observed and several new members publicly received. All this month this Sunday has been looked forward to as "Join the Church Day," "The Church and the Lodge" is the pastor's theme for the evening sermon at 7:30. This service will be of special interest to all lodge men and women of the community, since the speaker himself is a lodge member as well as church man, and has a message for the people and the times along this line. Special music by the choir and a good warmhearted greeting for everybody will be prominent features of the services.

**Jury List for February Term.**

**Our Experience Proves it.**

We see in one of these New York papers that women have a "Hereditary Fear of Man," that this fear has come prowling down the ages from the time when woman was not safe from the predatory male, and so on. Yes, we can prove it. Some twenty odd years ago or more we came face to face with our teacher over a small difference of opinion concerning a matter of deportment. We looked her right in the eye as Hon. tamers do now in moving pictures, and we talked right up as United States senators have always done. We remember very clearly the haste with which she grabbed into her desk for her ruler. That Hereditary Fear was working. Over what followed we draw a veil—no doubt she done it in self defense and the interests of culture. We are still sorry we scared her so badly, and it is rather nice to know that it was really her fear of us that made us such a model pupil for the next week or two. You see they didn't have all the advantages of sociology back in 1880-odd, but we can all live and learn and read the papers.

**Piano for Sale.**
