Tillamook—A Live Progressive City.

The writer had the pleasure of a visit to the City of Tillamook—county seat and metropolis of Tillamook County—famous for its fine cheese all the time and for its sunshine—sometimes. We have heard much of this fine progressive city, snuggled warmly behind the hills on a fine broad bay, but with the whiff of real salt in the air and none of the objections of the exposed coast cities. We thought we had visualized this fine city and given it as fair a setting in our mind as might be justified, but a visit proved our rosy view fell very short of the reality.

In a valley much like our own here at home, Tillamook has fine wide streets, modern business buildings, handsome public schools and has now in course of construction a modern \$20,000 city hall; between three and four miles of pavement, a fine sewer system, good mountain water and other modern facilities complete a short survey of this city of 1800 people—that impresses one as most like a city of 3000.

A brief visit with a number of the business men, a more extended and fraternal "conversation" as the diplomats would say, with the newspaper men—Messrs. Baker of the Headlight and Trombley of the Herald—glimpsed us the real reason for the progress and prosperity of Tillamook—a hustling, progressive, co-operating group of business men. The same conditions in any city will produce the same results.

And in the van guard of this progressive procession of Tillamook business men stand by the newspaper men. Both are live wires, keen on the

percent of anything and everything that will make for the growth and development of their fair city, and always boosting, extending the glad hand to the stranger within the gates, and overlooking no point that will fascinate or lure him there to stay. But, alas, they labor under a severe handicap—that is, publishing two papers where but one should live and grow and prosper. Someone has said that the entire world will honor the man who can make two blades of grass grow where but one grew before. And we want to go on record as declaring that a community is apt to chafe—and perhaps cuss under its breath—where two papers butt into a field where only one should be. Without in any way desiring to do the "butt-in-act" on our brethren of Tillamook, we would predict the finest team of boosters you ever met, if these two men were joined in double harness and given the job of making Tillamook the best city on the coast from Seattle to San Francisco, and given half a chance they would do it, too.

We have enjoyed Tillamook cheese for a long time, and a visit to the lair of the cheese has shown us that the product is certainly no finer than the people who stand sponsor for it.—Forest Grove News-Times.
