

REPUBLICANS MAKE BIG GAINS IN OREGON

All Other Parties and Total Registration Show Heavy Losses in Two Years.

Salem, Ore., Oct. 20.—In the last two years the Republican party in Oregon has gained 15,954, while the Democratic and other parties have lost adherents, according to the registration figures for the November election on file with the Secretary of State.

The Republican registration for the coming election shows a total of 189,937, as compared with 77,793 registered Democrats, 1435 Progressives, 7150 Prohibitionists, 6991 Socialists and 9551 of miscellaneous affiliation.

The total registration this year is 293,670, which is 12,060 below the number listed on the registration books two years ago.

Despite the increase in the number of electors, the Republicans have gained, a study of the figures showing that the gain almost exactly corresponds to the loss in registration experienced by the Prohibition and Progressive parties.

This year the Prohibition registration is 9218 below that of two years ago, and the Progressives have fallen off 6284, making a total decrease for these two parties of 15,665, as compared with the Republican gain in registration of 15,954.

In 1914 the Democratic registration was 78,981, while this year it has fallen 1188 below that figure. The Socialist party had 9149 listed two years ago, but lacks 2158 of this number now.

Only four counties show a decrease in the number of Republicans registered, these being Crook, Curry, Gilliam, and Morrow.

In Crook the decrease is due to the fact that since the last election Jefferson County has been created from a portion of Crook's territory, thus taking away a part of its registration.

SMILE AWHILE.

For the protection of his cottage, a suburbanite bought a big watch dog of a German dog fancier. About a week later the house was entered by burglars who pilloled the place while the big dog slept.

"How near are you to the station?" a man asked a suburban friend.

"Two minutes away on the real estate man but 20 on the taxi clock," he answered truthfully.

She—Then papa didn't refuse to listen to you.

He—No, dearest. You see, I began by telling him of a plan whereby he could save money.

Ethel—Poor Jack! When he proposed to me he acted like a fish out of water.

Marie—Why shouldn't he. He knew he was caught.

The Husband—I don't know just how I offended her, I'm sure.

The Wife—No wonder, Charles; you have such a lot of ways.

"The attorney has told no more than the simple truth," said the judge. "The sentence of the court is that the prisoner at the bar serve ten years at hard labor."

Here is a story, says the New York Globe, of a London recruit who had mounted guard for the first time.

The colonel had just given him a scolding because of the state of his equipment. A little later the colonel passed his post. The recruit did not salute. The indignant colonel turned and passed again. The sentry ignored him.

"Why don't you salute sir," the colonel roared.

"Ah!" said the man softly. "I fancied you were vexed with me."

The revival meeting was tense in its interest, and the evangelist was waxing eloquent. He arranged the laxness of the church people and present day evils in general, and every one was too absorbed to notice the growing uneasiness of two lads on the front seat.

With the question, "What's the matter?" pronounced in tones of thunder, the preacher reached his climax.

The two boys had risen and had started for the door. One of them, hearing the preacher's question, wheeled and said: "Aw, I got the nosebleed."

GREEN SHELLED FLEAS.

Tiny Parasites That Attack Nearly All Fresh Water Fish.

Scarcely any species of fresh water fish is free from the attacks of the little disklike fish fleas, its flattened, greenish body being pressed close against the skin of the fish.

The so called fish louse is neither flea nor louse, but a member of a simple group of crustaceans, well known to naturalists for the parasitic habit of most of its members.

It is far from having reached the ultimate degeneration of the chronic parasite, however, and often forsakes its victim to enjoy the pleasures of the free.

I have watched the fish fleas during these excursions into the open water, apparently engaged in their gambol—tiny greenish disks dashing hither and thither in direct course, diving suddenly downward or upward or turning over and over in a series of rapid somersaults, which have been reckoned to number some hundred a minute.

Should a fish den wish to rejoin a host it approaches until it is caught up in the swirl of water which accompanies the movement of the fish, and so soon as it touches, it lays quick hold upon the skin of its victim by a pair of peculiar sucker organs, placed on the under surface near the mouth.—London Tit-Bits.

VAST AREA OF TEXAS.

Some of the Magnificent Distances in the Lone Star State.

Those who live in the east and north have little or no conception of the magnitude of distances in Texas. Here are just a few figures that will help to illustrate the vastness of area of the Lone Star State.

The distance from Houston to El Paso by the nearest rail route is 833 miles, which is only 114 miles less than the distance from New York to Chicago, 947 miles.

It is 820 miles by rail from San Antonio to El Paso. This is 114 miles greater than the distance from Chicago to Pittsburgh.

The distance from Echo, Tex., the most eastern point on a direct railroad route, to El Paso, is 944 miles, or three miles less than the distance from New York to Chicago.

The distance from Brownsville, Tex., on the gulf coast, the easternmost point on the Texas-Mexican border, to El Paso, the western terminus of the border, is more than 1,200 miles. This is greater than the distance from New York city to Tampa, Fla., or to Springfield, Ill. It is greater than the distance from New York to St. Louis by 140 miles.—Philadelphia Ledger.

SIRIUS AND THE DOG DAYS.

Time Has Worn Away the Link That Brought Them Together.

The dog days, when excessive heat is supposed to prevail, begin July 3, according to the ancient reckoning, and continue to Aug. 11. All sorts of traditions and superstitions are connected with this period, and various dates are also given.

In some sections the dog days are said to begin on July 24 and to end on Aug. 24, while still others attribute the malevolent influence of the dog star upon the earth to the period from Aug. 4 to Sept. 4, in accordance with the ancient Egyptian reckoning.

As a matter of fact, the rising of the dog star, Canis Majoris or Sirius, has nothing to do with the affair at all. The rising of that star has been so accelerated by the procession of the equinoxes during the passage of more than 2,000 years that the corresponding conditions for the ancient dog days no longer exist.

In ancient times in the latitudes of the Mediterranean the period of greatest heat nearly corresponded with that time in which the dog star rose at the same time with the sun. To this conjunction all antiquity and all the later followers of judicial astrology attributed a malignant influence.

Among the modern notions regarding the dog days is the absurd belief that it is during this period that dogs are most likely to go mad.—St. Louis Post-Dispatch.

GOOD FORM IN TENNIS.

Don't Copy a Bad Style Because Some Star Player Uses It.

Good form in tennis is hard to describe. It is not necessarily the ability to win matches, nor is it always the most graceful way of hitting the ball.

It is rather the method of playing those strokes that have been shown by long experience to produce the best results with the majority of players.

One too often hears an ambitious young player declare that any stroke that wins is good enough for him.

But success does not justify bad form. What a McLoughlin or a Brooks might do with a bad style of play is not always the best for others to attempt.

A young player with a generous future before him might much better select as a model of good form strokes such as Johnston uses or those shown by Larned.

The game does not require height or weight or any unusual physical qualification.—J. Parmyl Faret in St. Nicholas.

UP AGAINST IT!

The extreme radical element of the Oregon Prohibitionists are attempting to stiffen their weakening campaign by a

Malicious Misrepresentation.

The Paid Agitators of the Prohibition movement say that the amendment to the prohibition amendment means "the return of the saloon."

That is a Misstatement

born of Ignorance or "Moneyed" Enthusiasm, or both, and in direct and complete denial of this untruth, there are nine of the very best attorneys of the State of Oregon who go on record as saying:

"Any attempt to open a beer saloon under this law under pretense that the saloon was the agent of the manufacturer or otherwise, would in our opinion be futile (useless)."
