11 a.m., sermon: "The Policy of the Christian Church which Includes the Wiser Vision." Short talk to children. 7:30 p.m., sermon: "The Grace of Gratitude." Thanksgiving.

**Funeral of Frank Severance.**

Sunday afternoon a large number of citizens paid their last tribute of respect to Frank Severance, who died the previous Friday after a long illness, at the funeral services held in the Presbyterian church, which were conducted by the pastor Rev. J. E. Yonal. The services at the grave were under the auspices of the Odd Fellows who attended in a body, the Rebekahs, G. A. R. and W. R. C.

The deceased had been one of our active citizens and his long sickness caused a great deal of sympathy in his behalf.

Frank Severance was born November 16th, 1843, near Bangor Maine. He enlisted in Co. A, Sixth Maine Regiment and served three years and six months in the Civil War.

He married Melinda Steadman, who died in 1872, from which union was born Cora and Walter M. Severance. He moved to Wisconsin in 1872 and married Sophia R. Weston in 1884, who died in Tillamook Oregon, April 10th 1912, from which union was born E. D. Severance.

The deceased came to Oregon 31 years ago and to Tillamook one year later where he resided ever since.

He belonged to the Masonic, Odd Fellow, G. A. R., Grange, Star, Rebekah and W. R. C. Lodges.

He leaves a brother Fred A. Severance, of Wisconsin and one sister Belle Judkins, of Maine.

**"Looking for Mary Jane."**

A play, entitled "Looking for Mary Jane," will be given Saturday night by the Junior class of the Tillamook High School.

The story of the play is as follows. Gus Merritt's father, a millionaire, wants his son to pay an old debt of gratitude by marrying Mary Jane Crabbe, daughter of a former partner. Gus is traveling with two friends, Berkely (Berk) and Charles. A handsome young opera star, "Carlita" has induced Berk to help her smuggle a Chinaman into the United States in a trunk. Gus receives his father's peremptory order to find Mary Jane at Mrs. Wentworth's boarding house and marry her. The three friends find there is a Mary Jane in the house, known however as Mary Varney, a young widow. The boys are hard up. They fix up a plan to have Berk get engaged to Marie under Gus's name, hoping she will break the engagement when she finds the deception. But though Pauline, Mrs. Wentworth's niece, Marie discovers the scheme, and to punish the boys becomes engaged to all three of them. Then the trunk supposed to contain the Chinaman arrives, "Carlita's" jealous husband, and a small-pox scare add other complications. Berk and Gus have really fallen in love but the girl won't look at them.

Gus's father arrives to find things badly mixed. But it turns out that "Carlita" is the real Mary Jane, that there was no smuggled Chinaman and no smallpox, and the boys are forgiven and happy.

It has an unusual plot, with three acts of exciting scenes and lines that are sure to bring a laugh. The cast has been well selected and have been rehearsed nearly every night for the last month and a half, and now a good production is expected.

It will be at the city hall, Saturday night, November 18, the program will begin at 8 o'clock; curtain at 8:30. Special music has been prepared. The benefits derived from this play will go towards the class annual.

Reserved seats on sale at Tillamook Drug Co. Prices 50-35 and 25 cents.

**CAN WE LEARN ANYTHING FROM WISCONSIN?**

Tillamookers Who Went There for Holsteins Return.

Charles Kunze and County Agriculturist R. C. Jones returned from Wisconsin with a car load of registered Holsteins and Mr. Jones gives us the account of the trip:

"On the recent trip to Wisconsin after Holstein cattle we tried to keep on the watch for things that would be of benefit to our farmers if they would adopt them. One thing that strikes the eye of the Tillamooker is the great number of silos in evidence. Nearly every farm in Jefferson, Waukesha and Sheboygan counties has two silos and many of them three or four. Many farmers say they cannot afford to pasture for they can get so much more feed from a piece of land when in corn or hay and the cattle do just as well on silage and hay with a little grain as they do on good pasture and grain. Corn is the usual silage crop but many are putting in clover and report excellent results.

"Almost all kinds of silos are seen but the most of the people now prefer the concrete silos. We talked with several who had two types of wooden silos and a concrete silo and they all said they would but up nothing but concrete in the future.

"Another thing that stands out very prominent is the cooperation in community breeding. Each community has its organizations of breeders and nearly every one in that community is found to be breeding the same strain of cattle. This results very advantageously to the community for it attracts buyers from long distances and many of them. We met men from Alabama, Oklahoma, Missouri, Iowa Nebraska and several other states that had come to buy cattle. Some were after grades and some were after pure bulls. They could come that distance for stock because they knew there were enough herds in the community to supply their needs and give them a choice. Community bulls, that is, bulls owned by several men and used jointly or exchanged after two years service were also much in evidence. This enables the farmer to have the use of a better bull than he could if he worked independently.

"The influence of the pure bred stock on the young people of the farm was also noticeable. Many places were visited where the boy 12 to 15 years old could prompt the father in regard to pedigrees and records. The study of pedigrees and the making of official records puts an item of interest into the farm work that it is hard to find by any other method. One of the best ways to keep the boy on the farm is to get pure bred live stock and stimulate his interest in them.

"Tillamook county produces about \$750,000 worth of cheese in a year and we think that is a lot. Some of the Wisconsin counties produce about the same amount of cheese and in addition sell \$1,500,000 of livestock. What would it mean to this county to be able to do as well? Tillamook has all the natural qualifications to make it the best live stock producing section of the country. Our natural feed and mild climate allow us to put more growth on our young stock and develop the spring of rib and barrel on them to better advantage than almost any other section of the country. Why not take advantage of these natural conditions? It will mean the doubling of our income per cow.

"As to the cattle which we selected and brought back with us, I believe it can safely be said that they are the best bred lot that ever came into the county and maybe the state. Seventeen of them are from 'early tested dams and sires and the records of the dams average up 783 lbs of butter in a year. The records of the sires average 935 lbs of butter in a year. The rest of the stuff is backed by good seven day records and all the heifers in calf are in calf to excellent bulls with A. R. O. backing.

"This class of stock is exactly the kind that should be used as foundations for good herds. It is hard to put a limit on the value of it for the success of the future depends on the quality of the foundation.

"We saw a sister to the dams of two of the heifers we bought that the owner told us brought him in \$800 in one year. She made 1215 lbs of butter which with the milk he valued at \$300. The calf he sold for \$500 as a baby. This is more income from one cow than some farmers get from their whole herds. What is the value of the cow that will produce \$800 in one year?

"We think this stock will put our county in shape to become as great a producer of fine Holsteins as some of the noted Eastern states. What we need now is interest on the part of the people who get the stock to develop them to their capacity.

"Our advice, based on results seen in Wisconsin, is. Get into the breeding game."

**What Would You Do?**

In case of a burn or scald what would you do to relieve the pain? Such injuries are liable to occur in any family and everyone should be prepared for them. Chamberlain's Salve applied on a soft cloth will relieve the pain almost instantly, and unless the injury is a very severe one will cause the parts to heal without leaving a scar. For sale by Lamar's Drug Store.

**The Name American Lady**  
Is Your Guarantee of a Perfectly Built Authentically Correct and Satisfactory Corset.

**SUPERIOR** materials, skilled workmanship, time and pains in designing and modeling characterize American Lady Corsets. They keep their shape, resist wear, stay new, never any undue stretching or loss of shape even after hard wear.
