The fire company responded to an alarm during the noon hour Monday, caused by sparks setting fire to the roof of the Anna L. Johnson cottage just north of town. The fire had taken a hold of the roof but was quickly put out by the prompt arrival of the hose company, which coupled up two lengths of hose, having one thousand feet connected from the hydrant at Front Street and 2nd Ave. East. The president of the company, T. Coates and Chief Otis Frisbie, as well as all of the boys of the fire company, again showed the promptness and efficiency in answering the alarm and putting out this fire, and the Headlight takes this method of complementing them on their work. The property was covered by insurance by Rollie Watson's agency and the damage was adjusted and paid at once in cash, as soon as the loss proofs were signed by the assured.

There will be a special meeting of the Rifle Club on Friday evening, at R. W. Watson's office, at which time matters of importance will be taken up. Dr. Olson, president of the club, will tender his resignation, because of the fact that he may be called out to serve in the dental corps for army service. On account of the withdrawal of the state troops, it will be really necessary that all rifle clubs and home guard companies get in shape for home service. Governor Withycombe issued a warning last week to the effect that the I. W. W. is a serious menace to this state at present and on this account we should get in shape to meet any possible trouble. The I. W. W. is carrying on a nasty propaganda, backed by German money and influence, and much property is being destroyed throughout the country.

Commissioner Hylan H. Corey, of the Public Service Commission, came in on Tuesday for the purpose of having a conference in regard to the contemplated removal of the Western Union telegraph office from the business part of the city to the depot. The Tillamook Commercial Club asked the Commission to investigate the matter and sent several letters protesting against the removal from those who use the office with the result that a telegram was received by the president of the club that the commission would be here for that purpose on Tuesday evening, but Mr. Corey was delegated to inquire into the matter, while other members of the commission had hearings elsewhere.

The conference was held in the rooms of the Commercial Club, and after Mr. Corey takes the matter up with the other members of the commission, a decision will be rendered. County Judge A. M. Hare drew Mr. Corey's attention to several dangerous railroad crossings without signals while here.

## 20 MILES OF HARD SURFACED ROAD.

## To be Commenced in Tillamook County This Year.

All of the pavements to be laid under the \$6,000,000 road bond bill must be covered by a five year maintenance bond and must carry an extra guarantee of a personal bond for an additional five year period, according to a decision reached by the members of the State Highway Commission at two extended business sessions in the office of Chairman Benson Tuesday.

The Commission adopted a resolution requesting the State Board of Control to issue bonds under the Coan-Burrett act to the extent of \$400,000 to be used in co-operation with the Federal Government under the terms of the Shackleford bill and authorized the issuance of \$500,000 bonds out of the \$6,000,000 fund, bids covering which are to be advertised for at the time the Board of Control launches its bond issue.

Tillamook Work to Proceed. Answering a point raised by C. W. Fulton, who appeared on behalf of Tillamook county, the commission decided that Tillamook county could go ahead this year with the pavement of 20 miles on the road between Tillamook and McMinnville with the understanding that the state would not pay its share of the expense until next year's funds are available.

Senator Fulton explained that the Tillamook county authorities are anxious to pay for a wider, deeper, more expensive pavement than that contemplated by the State Highway Commission, and asked that the available state money be applied toward the cost. The plans and specifications governing the work are to be approved by the State Highway Commission.

On the basis of spending \$10,000 a mile for the pavement, the state would spend probably \$200,000 on this road, and Senator Fulton estimated that the Tillamook County officials contemplated the expenditure of perhaps \$300,000. For the reason that all of this year's funds have been allotted, it would be impossible for the Commission to share the expense of paving the road under this year's budget, and by means of Tuesday's arrangement the work can be done at once, the county financing the improvement entirely until next year.
