THE TILLAMOOK HEADLIGHT. F. C. BAKER, Publisher.

Editorial Snap Shots.

many holidays in the public schools.

New Year's cards were sent out this year bearing the trade mark "Made in Germany." These cards should be canned if you have any of them in your possession.

We didn't know whether it was the proper thing to report that we had secured 2500 'wits" for the Red Cross. Anyway, it was impossible to make the weather any wetter during the drive or find a "dry" Red Cross

Now don't complain because rain has fallen in considerable quantity and with considerable force the past three weeks. It is a hundred per cent better weather than the howling blizzards they have had in the east and the middle west.

Did you ever observe that Tillamook County never had any failures to amount to anything. A crop failure is unknown, and when Tillamook County was called upon to go over the top in the Liberty Bond drives, Y. M. C. A. drive and the Red Cross drives, there was no failures.

There is a good deal of gospel truth in what The Oregon Voter says about the Portland Journal: "The Journal tears down. It does not build up. It is stabbing Portland for the sake of glorifying itself among thoughtless people as an alleged champion of the people's interests.'

The snap shot man is inclined to think that it is a waste of time to keep the mail for the south part of the county "bottled up" in this city for 19 hours. The people of the south is the kind of peace Germany is now part of the county should send in a vigorous protest to the postoffice officials and the Oregon delegation in Washington.

We believe that before another year rolls round it will be possible to auto in and out of the county all times of the year, for when the Grand pation in the war. It is true that Rus Ronde road is improved it will remove the obstacle. And it is claimed Germany and may not participate in by a good many persons that it will the conflict again, but Germany take less time to reach Portland than knows that the United States is a by the railroad. We believe it.

New Year's day in Tillamook county was an ideal summer's day, the atmosphere being beautifully clear with brigg, warm sunshine. It was, certainly, a pretty day and everyone en- that it had 400 members in the Red to gulp the air, making no effort to needs cutting.

Let everybody be inspired with the along manufacturing lines. It may appear to some of our progressive citizens that we are not making the progress we should, but after all, the county is making material progress. that of the shipbuilding plant, and reason why others should be induced mook county.

There is one good feature connected with the numerous "drives". It educates people to be more liberal in their offerings and gets them in the way of helping others. Most of us have been wrapped up too much in self in the past, and we consider the "drives" have not only proved a blessing to others, but it is going to be that much more pleasant to solicit money in the future for good causes. The good old book says it is more blessed to give than receive, but we have somewhat neglected this divine

The snap shot man is wondering how many real, progressive boosters there are amongst the business men of Tillamook city and how many are drones. We will not attempt to classify them at this time, but which crowd do you belong to. The fellows or the dead 'ens, who are so close towards a Commercial Club. Now attempts to bring to life the lifeless of normal conditions.-Ins. News. business men who haven't supported the home town.

We publish an interesting editorial from The Oregonian on waste and duplication of church work in small towns and communities, which is worthy of serious thought. We have repeatedly stated that the churches child becomes hoarse and the attack in Tillamook City should Hooverize, may be warded off and all danger and his glasses and lost an umbrella-all and we make the statement right here anxiety avoided. For sale by Lamar's since this morning."-Browning's Magthat if all the people that attend the Drug Store.

Protestant chudches of his city would get together one or two pastors would e sufficient. This is a good opportunity for the members of the church to go over to the M.E. Church. for there never was any need or necessity to build that church and be a waste, and a burden on those self conselwho have to support it.

> Some people contend that the Unitd States is not fighting the German people, but simply the kaiser. We are not only fighting the kaiser, but the brutality of the German soldiers who have committed the most horrible crimes in history. If United States the photographer added without waste oldiers were ordered to commit the of time. horrible crimes the German soldiers are permitted and ordered to carry into execution, they would refuse, and numanity by doing so. But here is the contract between two countries. Gerand horrible to inflict on their enemies and German soldiers take a delight in killing and torturing people, and we consider the German people are just as guilty as the Kaiser, so it is foolish for any of us to think for one moment that we are not fighting the German people who permit and appear to take delight in committing corrible crimes.

Germany practically admits that she is whipped. When the war lords of that country plunged Germany into war it was with the expectation o obtaining possession of Belgium and the coast ports of France, and with a big indemnity from England and the United States. Germany would conclude peace tomorrow if it could get out of the conflict and retain what territory it had before the war. That striving for, which shows plainly that she has come down off her high horse and its war of conquest is defeated. There is another important actor that Germany now confronts which makes her very desirious of obtaining peace as soon as possible, and that is the United States particisia is desirous of making peace with more vigorous opponent, and for that reason wants peace before our boys go over the top and give Germany what she wants-a good licking.

When Brighton reported last week joyed it after three weeks of rain Cross drive, it made most of us feel keep himself from sinking. As he storms. Those who have lawns will thankful, and everybody was loud in sinks he slowly exhales under water, have to operate their lawn mowers if their praise of the Red Cross workers through the mouth, with the lips this kind of weather continues, as the there. However, Brighton was ex- puckered as for whistling. If it is a grass is growing very rapidly and ceedingly interested in the drive and was a good sport. It wanted to outdistance Tillamook in obtaining the largest number of new members, and *idea of a bigger and better county it did give the metropolis of the county a great jolt when it reported on Monday that it had reached the 600 mark. Every member of the Executive Board of the Tillamook Red Cross said "Bully for Brighton." One important industry was added, When the final report came in from Brighton on Wednesday Tillamook having been successful, there is good got another severe jolting. Brighton reported 828 new members. This gave to start ship-building plants in Tilla- Tillamook a close shave, for the 900 mark had been reached by the local workers in this city, with the work incomplete. Brighton made a remarkable and commendable showing,, and if other parts of the county had done equally as well, Tillamook county would have been far ahead of every county in the state. Considering every thing, Brighton is deserving of considerable praise, and we extend the glad hand of thanks and express our congratulations to the noble Red Cross boosters of Brighton for the splendid showing they made in the Red Cross drive.

Fires Rates in East and South Increased

An increase of 10 per cent in fire rates has been made in Eastern and Southern territory, to meet the additional expenses of companies resultthat have some life and push in them ing from the war. The 10 per cent rise will without doubt be general through fisted that they wouldn't give a dollar out the entire country in the near future irrespective of rating schedules, don't criticise the snap shot man if he to remain in effect pending the return

smile.

The officer stood aghast. "Very well," replied General von revolt, and they would show their Bissing. "Go ahead. What do you want me to do?"

"If you will step to the window," man people consider nothing too cruel the photographer explained. "Now step this way, a little farther, please. No; this way." And to the horror of the attending officer the photographer laid his hand on the general's arm and arranged the pose. The picture was taken in a few seconds.

"Thank you, general," said the unabashed American easily.

"I hope your picture turns out well," replied General von Bissing, and the interview was over. Once they were outside the door, the officer expostu-

"How did you come to address his excellency? It is most unprecedented. And you laid your hand on him. How ould you do so?"

"Mein lieber freund," said the Amer ican, "I have photographed three American presidents, and a general more or less is nothing to me."

CONQUERING THE CRAMP.

Rules a Swimmer Should Follow When an Attack Comes On.

A cramp is merely a contraction of the muscles caused by the penetration of the cold. Obviously it could not of itself cause drowning. Its worst effect, according to the Popular Science Monthly, is to cause a panic which throws the swimmer off his guard, causing him to let the air out of his lungs and thus allow the air passages to become filled with water. The safe guards against such panic are absolute confidence in the floating power of the body and a demonstrable knowledge of the proper way to fill the lungs quickly to utmost capacity with air.

The moment a cramp is felt the swimmer should turn on his back and begin stomach cramp the knees will be drawn up against the abdomen, but the swimmer should force them out, pushing on them with both hands and using all his strength until they are fully extended. This will no doubt cause great pain for a few seconds, but as soon as the legs are straightened out the cramp will vanish, and the body, buoyed up by the air in the lungs, will shoot up to the surface. There, still inhaling in great gulps and exhaling through puckered lips, the swimmer may float until he regains his strength or is pick-In case of cramp in the leg or arm the

same system of breathing is followed, and the affected part is straightened out by sheer strength.

HEROISM IN THE NAVY.

It is Not an Event, but a Mere Matter of Everyday Duty.

Our navy is crowded with men who will face any danger. Some years ago one of our battleships was on the battle range, with bags of powder stowed and firing the guns. A spark got to A newspaper assigned an American | the bags of powder. There were an exneath was the handling room. Burning pieces of cloth fell from the turret down into the handling room. The crew of that handling room could have jumped into the passageway, made their way up a ladder and so on to the free and safe air of the open deck. What they did was to stand by to stamp out what fire they could.

Leading from the handling room were the magazines. The doors of the mag-Hooverize on the waste attending so who think they can't run their busithe magazines and buttoned the keys of the bulkhead doors so that there would be no crevice for sparks. In doing that they locked themselves in. and once in they had to stay in. Above them, they knew, was a turret full of men and officers dead and dying. They knew that fire was raging around them, too, and that the next thing would be for the people outside to flood the magazines. The magazines were flooded. When things were under control and the doors opened the water in the magazines was up to the men's necks.

While that was going on below decks in the turret were other men and officers, including the chaplain, not knowing what was going on below and expecting every moment to be blown up into the sky. But there they were, easing the last moments of the men who were not already dead. Thirty all told were killed in the turret. All concerned behaved well, but no better than they were expected to behave.

A few years ago there was a destroyer off Hatteras. It was before daybreak of a winter's morning in heavy weather. A boiler explosion blew out her side from well below the water line clear up through to her main deck. Men were killed by the explosion; others were badly scalded. A steam burn is an agonizing thing, yet some of these scalded men went back into that hell of a boiler room and hauled out shipmates who, to their notion, were nore badly burned than themselves. One such rescuer died of his burns The hole in the deck and top side of that destroyer was twelve feet across yet her commander and crew got hor to Norfolk under her own steam. Com mander and crew behaved well, but no better than they were expected to behave.-James B. Connoily in Collier's

How Norway Finds Sailors.

Norway's navy, being a young service, is built expressly for defense and not defiance. But, though her ships are few, the quality of her men is high, the hardy fishermen of the coast providing an abundance of excellent material and her officers are chosen and trained with the utmost care. A cadet has to serve at least one year in the merchant service before he can enter the naval college at Horten, and his qualifications before obtaining the rank of subieutenant must include a thorough knowledge of English, French and German, with ability to speak English and one of the other two languages fluently

Swimming as an Exercise

There is no exercise like swimming. The breast stroke builds arm and shoulder breast muscles. The forward thrust and backward sweep are guaranteed to develop those back muscles which cure the scholar's stoop. The scissors kick of the side stroke will do more for the legs than all the gymnasium tricks yet invented. The arduous labor of the trudgen and the crawl compels deep breathing. And when one's wind, grown short in office or chair or over workbench, is spent you turn upon your back and rock, as in a cradle, looking at the sky.-Cleveland Plain Dealer.

Motor Wheel Rims.

How many automobilists are there who ever remove their rims from the wheels until forced to do so by reason of tire trouble? Very few, is the answer. If they did take the rims off after having run the car for a short time and use a little graphite in between the wheel and the demountable rim they'd find tire changing easier later on. As it is, rims are sometimes so rusted and plastered on that they take an unconscionable time to remove when the need finally does arrive .-Chicago Tribune.

To Cure Scars.

Scars are often very ugly things and disagreeable marks when they exist in prominent places on the skin. Probably nothing can remove a big scar the tissue of which has become fibrous and unyielding, but the following recipe, to be applied on lint and allowed to remain on the part for a little time daily, will effect an improvement in small scars and blemishes: Borax, one and a half ounces; salicylic acid, twelve grains; glycerin, three drams; rosewater, six ounces. Mix.
