

**Report of Tillamook Cow Testing Association for June, 1918.**

720 cows were tested during the month producing an average of 953 pounds milk and 39.53 pounds butter fat at an average feed cost of \$2.85. 306 cows produced over 40 pounds fat, 90 cows over 50 pounds fat and 25 cows over 60 pounds fat. The high herd belongs to Joe Durrer, whose 39 cows made an average

of 1285 pounds milk and 55.04 lbs. fat. Next came Gus Peterson whose 10 cows averaged 1123 lbs. milk and 48.58 lbs. fat and then Perkins and Thomas whose 22 cows averaged 938 lbs. milk and 47.53 lbs. fat. Mr. Durrer also had the high cow, Baby, a grade Jersey 13 years old, with a production of 1800 lbs. milk and 82.80 lbs. fat. The honor roll follows:

**Report of Nestucca Coy Testing Association for Month of June.**

666 cows were tested for the month of June, producing 549,505 lbs. of milk and 23,195.1 lbs. fat or an average for milk production of 825 lbs. milk and 34.8 lbs. fat per cow.

The high herd average for milk production was that of A. Haedinger,

whose 39 grade Holsteins produced 40,671 lbs. or an average of 1043 lbs. per cow. The highest fat average is held by 11 grade Jerseys owned by Clent King with 49.5 lbs. per cow. The high cow is a grade Holstein, Nig, owned by F. R. Beals and made 1764 lbs. milk and 68.8 lbs. fat. 160 cows produced over 40 lbs. fat, 23, over 50 pounds and 3 over 60 lbs. fat. The honor roll follows:

**HAVE MANY QUIANT BELIEFS**

Alaskan Natives Probably as Superstitious as Any Race on the Face of the Earth.

In Alaska the natives have all kinds of superstitious beliefs. They believe that everything has a spirit, and that these spirits must be respected or else bad luck will come to them. For instance, they must not throw away any old clothing, nor burn it, for that would be the same as destroying a part of themselves. They must make a bundle of the old clothes and put it on the branches of a large spruce tree outside the village. All fish bones are carefully put away in a basket to be taken out to the middle of a river, stream or lake and there thrown overboard. This is done so that every single bone, after it is put back into the water, will turn into a fish, and this is sure to keep up the supply.

When a child is born the father has to put away all tools that are made of iron or steel and is not allowed to use them for 20 days. During that time he is not allowed to go outside to do any work or any hunting. Should he do any of these things it would surely cause the death of the baby. When a child dies it is not buried, but is wrapped in a bundle and placed at the foot of a spruce sapling. If the tree dies within a year the spirit of the child dies also.

When a grown person dies the body is kept at least three days in the room in which it has died. When the time for burial comes the body is buried on a hillside or a high bank facing the river. There is the village of departed spirits on the side facing the river and on the other side the spirits of the dogs who have died and who belong to the people whose spirits are there. The spirit of an old woman takes care of these dogs.—Southern Workman.

**Polliteness is Too Neglected.**

Courtesy! Prof. William Lyon Phelps of Yale university is right in saying that the young men of today possess even a greater power of endurance than their fathers. The war has demonstrated that the luxuries of modern life have not produced a degenerate race. Our own heroes of 1776 were no more hardy than the young men in khaki today after six months of training. The endurance of the modern soldier is not alone a matter of physique or physical strength but of moral stamina as well. What we need to cultivate is not simply a sturdy manhood through military discipline, but also to give our boys and girls training in courtesy. Military training teaches obedience, a quality that our youth sorely need to acquire, but we need to instill into the minds of our children in the public schools lessons of politeness and respect for the rights of others.

No other nation has neglected politeness as we have done.—Leslie's.

**Cement From Sugar-Beet Waste.**

A result of experiments in French factories is the production of an excellent cement as a by-product of beet sugar refining. The first step in the production of sugar from beets is boiling them. It has heretofore been customary to throw away as valueless the scum formed on the caldrons. But it has now been discovered that this scum contains large quantities of carbonate of lime. It is estimated that 4,000 tons of the carbonates can be recovered from 70,000 tons of beets. To this quantity of the carbonate 1,100 tons of clay is added, the resultant product being a good cement. The beet scum is pumped into large reservoirs and allowed to evaporate for a certain length of time before being mixed with the clay. It is then stirred or beaten for an hour before being fed into rotary ovens such as is used in making Portland cement.

**Not in His Line.**

An auto load of Dunkards came into Winchester one day last week, and it was noticeable that the motor of their machine was "knocking." They stopped in front of the undertaker's establishment of O. G. Frase, which is next door to the Hecker & Doyel garage. One of the men left the machine and went into the undertaker's office, thinking it was the office of the garage. "I would like for you to look at my motor and see what's wrong with it," said the man. "It isn't dead, is it?" queried the undertaker. "No, it is still running," said the Dunkard, whereupon the undertaker replied: "If it isn't dead we can't do anything for it. This is an undertaker's shop." The man was then directed to the nearby garage.—Indianapolis News.

**Character Came First.**

If you are to become capable and efficient, desire, will, attention, concentration, purpose, discipline, reflection, analysis and research are each an exercise to be diligently applied. Wordsworth once resolved to make an excursion to the mountains, and, in spite of protests, carried out his intention in the face of a violent storm. He gave as his reason that "the abandoning of a plan to avoid a slight discomfort is dangerous to your character."

**Mexico Expects Big Cotton Crop.**

A bumper crop of cotton is expected this next year in Mexico. Indications are that the cotton crop of the Laguna district of the states of Coahuila and Durango will be three times as great as for the past year, when it amounted to more than half a million bales of a total value of ten million dollars. None of it was exported, but it was all consumed in the factories of the republic.

**Just a Little Smile**

**Had Her Way.**  
Patience—So Peggy's engaged to Paul at last?  
Patrice—Sure. She's landed him. "You know she always would have her own way."  
"But will she now?"  
"Of course, she will. He asked her to name the day, and she wouldn't do it. She insisted that the ceremony should be performed at night."

**Self-Help.**  
"Don't you hate a man who insists on being waited on instead of doing things for himself?" asked one woman.  
"No," answered the other. "Our home would be much happier if my husband didn't get the lights and the doorbell all mixed up owing to his impression that he is a natural-born electrician."

**An Expert.**  
Mr. Shears (in a jeweler's shop buying diamonds)—I wish my husband were here.  
Jeweler—Is he an authority on diamonds, madam?

Mrs. Shears—Not exactly; he is an editor, and knows paste whenever he sees it.—Pearson's.

**A Tempting Morsel.**  
"My, what a beautiful lion tamer!"  
"A stunning creature."  
"The lions show almost human intelligence."  
"How is that?"  
"They eye her as if they thought she looked good enough to eat."

**The Real Thing.**  
Patience—Who's the guy I see with you at the movies every week?  
Patrice—Isn't he the "goods," though?  
"He's not so bad. But, tell me, who is he?"  
"Why, he's my real steady."

**MORE COMING.**

"The fools are not all dead."  
"That isn't the worst of it; they aren't all born yet."

**Christening the Baby.**  
Brown has a lovely baby girl.  
The stock left her with a flutter;  
Brown named her "Dionomargarine,"  
For he hadn't any but her.

**He Knew.**  
The Foreigner—You-aw-don't recognize titles of nobility in this country?  
The Rich American—Oh! yes, we do. The women folks can quote their market value offhand and call 'em by their first names.

**Quite Modern.**  
"I got tired of his electrocuting around."  
"What do you mean by that?"  
"It is more up-to-date than to say that he is hanging around."

**Cruel World.**  
Dubber—How did he lose his hearing?  
Gubber—Somebody made the remark that money talks and he tried to hear it even whisper.

**From Experience.**  
"Why do you say Harold is of an ungenerous nature?"  
"Because he is the only man I was ever engaged to who insisted on getting back his ring."

**No Greek for Him.**  
"Do you admire the classics?"  
"No," answered Uncle Lowbrow. "When it comes to dancin' gimme an old-fashioned clog."

**Continuous.**  
"They used to stop a battle for breakfast."  
"Now they don't even halt for the Saturday night bath."

**Greased.**  
"The trouble with you is that you don't seize your opportunities."  
"Oh, I grab at 'em fast enough, but darn 'em, they're greased."

**Talk to Drafted Men.**

Captain Russell, a medical officer of the U. S. Army, from Camp Lewis, addressed the men called in the draft last Sunday afternoon.

The captain gave a very interesting and instructive talk on how to preserve the health and avoid various contagious diseases. If we would all live as Capt. Russell says the soldier lives we would be a stronger healthier people. There is less sickness in the army than in any other place in the country. Soon as the soldier reaches the camp he is placed in quarantine for three weeks to be sure that any disease to which he may have been exposed before coming to the army will not be communicated to other soldiers. After he is out of quarantine his chances of contracting contagious diseases is very slight. As to venereal diseases the captain said the drafted men coming to Camp Lewis, from civic life in the State of Oregon, were far more free of such diseases than the men from any other state, this should be a source of pride to every citizen of Oregon.

**Negro's Patriotic Wit.**

The policy of giving negro regiments negro officers has caused great controversy north and south. I have myself noticed in moving among the soldiers of our army a very marked unwillingness in many quarters of white officers to salute the superior black officers. There have been several unpleasant incidents in consequence. In the south, naturally, this blameworthy attitude is more in evidence. In South Carolina prejudice against the black man is, I think, more marked than in any other state of the Union.
