MOVE TO PLACE WOMEN IN MEN'S JOBS LAUNCHED.

Community Labor Boards Start Work of Weeding Male Employees Out of Non-Essential Positions.

Washington, Sept. 23—Machinery designed to force men out of non-essential employment and muster women of the nation to take their places, was put in motion today by 1,000 community labor boards reaching into every section of the country.

The boards are acting under detailed instructions from the government, working through the United States employment service.

Each board soon will publish lists of industries in its locality in which men should be replaced by women. The lists will be based on surveys on all industrial plants in each board's district. The surveys will be minute. Each job will be studied to determine whether a woman can fill it.

Publication of the list is expected to cause employers to comply and substitute women as a result of the moral pressure thus exerted. Where moral pressure fails stronger pressure may be taken. Employment service working through the war industries board, has the power to shut off the supply of ray materials from any plant.

Army Program Responsible.

This move is the result of the enlarged army program, under which four million men will be sent to France by next June. It is expected to weed out the non-essential employments every man in the nation. The result will be the probable induction of hundreds of thousands of women not only into essential war work, but into munitions factories as well. Officials say the numbers of women may run into the millions.

The women are imperatively needed to insure an adequate supply of material and munitions to the fighting men in France. Because of the nation wide labor shortage the munitions program faces serious delay. This is made plain in the instructions to local boards sent out by the employment service.

"To the extent that we fall behind in the supply of material, we shall have to make up the deficit from the living bodies of our young men," read the instructions. "This is not theoretical, it is plain military calculations. As soon as the facts are realized, Americans are going to cease carrying on business as usual and swarm into war work."

Classification is Strict.

The use of the term "non-essential employment" in the instructions to community boards has a special significance. Although a man is working in a munition factory and even is making shells, he still may be classified as a non-essential worker. This will occur when the community board's survey shows that a man's job can be filled by a woman.

The program really means, then, the women of the nation are to muster to help turn out the shells with which our soldiers will blast their path to Berlin.

In making the surveys the boards will lay emphasis on the job and not on the community as a whole.

The employment service which has a corner on all employment in the United States, will assume responsibility for listing and filling with women the jobs which its community boards pass on.

Every precaution will be taken to guard the health of women workers. Two women members will be added to the personnel of each community board. Boards are composed of representatives of both employers and employees.

Dairymen Will be Given Millfeed.

Washington, Sept. 23—Representative Hawley had a further conference with the food administration today urging that the government purchase flour in Portland and so enable the millers to mill wheat and with the millfeeds so obtained relieve the dairymen of the Pacific Northwest who are not able to obtain feeds for their herds. The following solution has been reached that, beginning within a week, the government will purchase from time to time for delivery in October 500,000 barrels of flour on the Pacific Coast. A very considerable part of such purchases will be made in Oregon. The food administration has applied for ships to move this flour.

Experience the Best Teacher.

It is generally admitted that experience is the best teacher, but should we not make use of the experience of others as well as our own. The experience of a thousand persons is more to depend upon than that of one individual. Many thousands of persons have used Chamberlain's Cough Remedy for coughs and colds with the best results, which shows it to be a thoroughly reliable preparation for those diseases. Try it. It is prompt and effectual and pleasant to take. For sale by Lamar's Drug Store.—Pd. Ad.
