

### Victory Announcement

More Mileage Adjustment on GOODRICH TIRES  
FABRICS . . . 6,000  
CORDS . . . 8,000

To automobile owners and drivers—to Goodrich Dealers—the B. F. Goodrich Rubber Company herewith declares a more mileage adjustment on Goodrich Tires—6,000 miles for SAFETY TREADS, and 8,000 miles for SILVERTOWN CORDS.

Fix these new Goodrich Adjustment figures firmly in your mind—6,000 for SAFETY TREADS—8,000 miles for SILVERTOWN CORDS—instead of the 3,500 and 5,000 miles respectively heretofore in force.

This new adjustment stands back of all Goodrich Tires, including Tires already purchased in the hands of user or dealer.

Goodrich Tires in actual usage are today unfolding such matchless mileage, regularly in excess of adjustment basis, that Goodrich knows it has the strongest, most durable tires the rubber industry has produced.

The Goodrich adjustment mileage is increased because Goodrich knows the mileage in its tires, and it wants to give every motorist a share in their economy.

Go to a Goodrich Dealer, and buy a Goodrich Tire, sure that with fair and square usage a Safety Tread will render you at least 6,000 miles; and a Silvertown Cord at least 8,000.

Buy Goodrich Tires from a Dealer

## GOODRICH TIRES

"BEST IN THE LONG RUN"

### GUM TAKES PLACE OF WATER

Assuages Thirst of Soldiers Fighting in Country Where Liquid Was Practically Unobtainable.

Of all the varied means of mastatory stimulation which have been resorted to by man in all climes and ages the great American gum seems least harmful and most helpful. That there is a physiological demand for some mastatory stimulant, says the New York Medical Journal, is shown by the universality of the practice of chewing. Whether it be the tobacco of the American Indian, the betel nut of the East, the slippery elm bark, the tamarack and the spruce gum of the down-east Yankee, the sweet gum of the Gulf states, the chicle of the Mexicans, which, in its American adaptation, becomes the great American chewing gum, man has always felt the necessity of chewing something more than his meals. That there is a practically useful side for this habit is evidenced by the orders placed by the quartermaster of the United States army for 2,300,000 packages of this standard American dainty. We learn from the war department that the commanding officer of a field artillery regiment, about to embark, stated that 250 pounds of chewing gum would take the place of hundreds of gallons of drinking water when water was most needed and least readily obtainable. The American Red Cross recently cabled an order for chewing gum for use in the reconquered territory where the wells had been poisoned by the retreating Germans.

### YANKS DO THE "IMPOSSIBLE"

For First Time in History Stone Houses Have Been Successfully Moved in France.

Declaring that this is the first time that a stone house has been moved in France, Sergeants Abe Griesner and Mike Murphy of Company C have recently finished a job of moving a 350-ton structure and have set it down on its new site.

The French said it could not be done and declared that the only way the road could be cleared for the new line of railway track would be to tear the house down. But the sergeants with their detail of fifteen men started to work with jacks and rollers and soon had the house moving across the fields. News of the feat spread and the authorities sent a photographer from the French Academy of Sciences to record officially the stages of the work.

The house was placed upon its new site without a crack. It is believed that this demonstration of American ingenuity will save many stations along the lines where the Yankee engineers are building additional tracks and switching yards.—From the Spiker, France.

### New Surgical Battle Formation.

The French Aid Society for Wounded Soldiers (Société Française de Secours aux Blessés Militaires) has devised a new type of surgical ambulance which meets the needs arising during active military operations. This ambulance can be advanced and moved back quickly, being essentially different from those in use for some months. Furthermore, it enables the surgeons to render speedy, immediate and complete service to patients with extensive wounds of the thorax, abdomen or head. It consists of a number of large tents, one serving as a salle de triage, a second for local administration, another for preparing the wounded for operation, a fourth for radiography; an operating tent, connected with the sterilizer canon, which contains two autoclaves, and, finally, the hospitalization or ward tents. For transport, the whole outfit is carried in two camions or trucks and two trailers.

### Long Record of Work.

Miss Jessie E. Cone of Granville, Mass., has worked for more than 32 years tacking hoops on drums in the Granville drum shops, averaging 2,000 hoops a day. She has used the same hammer all the time and has worn out three handles in the work. After working from 6 a. m. until 5:30 or 6 in the evening, she goes home and helps her sister on the farm, where besides milking the cow and doing other work, she has raised 25 bushels of potatoes and has dried beans and canned more than 70 jars of vegetables the last year.

### British Air Uniform.

British air ministry announces in London that a light blue uniform has been approved for officers, and airmen of the royal air force. Some months must elapse before the new uniform can be generally provided, but khaki uniform will shortly be available, and will gradually be replaced by blue uniform.

### When Meat Was Cheap.

The proprietor of "Sweets," an old New York Riverside restaurant that has gone into bankruptcy, says: "When I came here, after the Civil war, to help out my father, we used to cook and serve the finest steaks in the world for 6 cents—and make money on them, too."

### Gas Masks for Horses.

The war department recently announced that more than 5,000 gas masks for horses were being turned out daily by the gas defense service and that they are being shipped at once to France for the use of the animals employed by the American expeditionary forces.

\$50.00 Capes now \$33.90  
\$72.00 Coats now \$48.00

## Haltom's

TILLAMOOK, OREGON.

### Thanks Editor for Boosting Roosevelt and Irrigation Measures.

Mr. Fred C. Baker, Tillamook, Ore.

My Dear Mr. Baker—I wish to congratulate you and other Tillamook friends upon the passage of the Roosevelt highway measure, and to express to you personally, as one interested in this, my appreciation of the very effective efforts you made in its behalf.

For one who knows the needs as well as the possibility of the coast counties as I do, this seems to me as one of the most important measures that has been presented to us for a long time. With best wishes, I am, Yours sincerely, W. R. Rutherford.

(Lane was one of the counties where the editor put in some good ticks of work, and Mr. Rutherford was one of the gentlemen he called upon, who was heart and soul in favor of the Roosevelt highway. No doubt Mr. Rutherford is just as pleased that Lane county rolled up a big majority for the highway as the editor is.)

Mr. Fred C. Baker, Tillamook, Ore.

Dear Sir—The voters have given their approval to the program submitted by the legislature and the people of Oregon have shown their willingness to develop the natural resources of the state and have wisely adopted a course which will give every section of the state of Oregon an opportunity to share in the unprecedented prosperity which is opening to the people of this state.

ern Oregon will especially share in the general prosperity through the adoption of the measure which has authorized the state to guarantee the interest on bonds issued by drainage and irrigation districts. The development of the arid lands in Eastern Oregon will proceed without ostentation, but when these waste lands are turned into fertile farms, it's effect in increased business and population in the other portions of the state will be magical.

To you and the loyal and effective support you have given this measure, the people of Oregon owe a debt of gratitude, and in behalf of all the irrigation interests of Oregon, I wish to thank you for the good work you have done without compensation and solely in the interest of the general welfare and a better and bigger Oregon.

Yours very truly,  
J. H. Upton, President.

### Pure-Bred Sires Prove Their Worth.

Wisconsin dairymen and farmers, desirous of increasing their profits and adding still greater profits to their already famous dairy state, have joined in a state wide campaign to eliminate the scrub bull and use only pure-bred sires. The record made last year in the Brown County Cow-Testing Association typifies the merits of pure bred bulls and illustrates why farmers and dairymen will not tolerate the scrub. In this association 12 cows qualified for the register of production. All of these cows were daughters of pure-bred sires, six of them being daughters of

one sire. The five best herds in the association are headed by pure-bred sires, while the five poorest herds are all headed by grade or scrub sires. The herds of those farmers who used pure-bred sires averaged 85 pounds more fat a cow than those using grades or scrubs. Last year eight of the members purchased pure-bred sires of known breeding to replace their scrubs.

U. S. Dept., of Agriculture.

Harry Hawker and his foolhardy companion, Mackenzie Grieve, have sufficient nerve, pluck and grit to entitle them to a seat of honor alongside the indomitable Yank.—The Sentinel.

Lenine says, he cares nothing for Russians as Russians. "The sole consideration," he says, "is internationalism." Great socialists seem to think alike.

The Atlantic Georgian says: "The Democratic party will fail if it ceases to be radical." Worse than that. It has failed before it ceased to be radical. That is radical in some things. It has never been exactly what you might call radical about letting the people rule in Georgia, for instance.

An oversea negro soldier was lynched at Blakely, Ga., for failing to take off his uniform after he had been informed by a vigilance committee that he had worn it long enough. Anyway the boy was doubtless glad that he had a chance to help save the world for Democrats before he died.

Attorney General Palmer says if President Wilson wishes it he can be nominated and elected to a third term. Mr. Palmer may be half right.
