Protect Your Feet and Legs With Sturdy Comfortable Rubber Boots

When you're afloat in all sorts of weather, it's sound sense to give your feet and legs the best protection possible.

U. S. "Protected" rubber boots provide exactly that. They keep your feet and legs warm, dry and comfortable under the hardest conditions. They're specially designed for heavy service aboard ship or on dock.

Fishermen need these rugged, double-duty rubber boots, just like the boys did in the navv. The Government probably used more U. S. "Protected" rubber boots during the war than of all other makes combined.

There's economy as well as reliability in U.S. "Protected" rubber boots. Reinforced where the wear is greatest, they stand the gaff of hard usage. Longer wear means money saved.

Your dealer has exactly the kind of "U. S." you want, or can get it quickly. Remember,

REPORT OF TILLAMOOK COW TESTING ASSN

6. N. Gilmore, Sec; H. J. Olson, H. Bochsler, testers. The high pure bred cow is a registered Holste Laura of Tillamook belonging to Adolph Schild, as made 1938 lbs. milk and 94.96 lbs fat at the age of fo

Jos Durrers' Cow Dot, a grade Jersey, leads the A sociation with 2210 lbs. milk and 103.87 lbs. fat at se en years old. Mr. Durrer also had the highest average production throughout the herd.

9 per cent of all cows tested produced over 60 lbs fa which we believe will compare favorably with any ass ciation in the United States.

The following gives the names and record of the cows in the association which have produced more tha 60 pounds of butter fat during the period of 30 day
