HOLSTEIN BREEDERS MEET: PLAN FOR COUNTY FAIR.

Tillamook County Boosted in National Journal as Having Best Stock

The meeting was called to order by president B. A. Folks, at the home of J. B. Honey, on Kilchis river, where the association had gathered for the day to talk over various matters of the advancement of the Holstein development of Tillamook County. The forenoon was taken up in looking over the pure bred herd of Black and White of Mr. Honey and criticizing, at length, on the various individuals of Mr. Honey's herd. At noon hour a lunch was prepared, which all present enjoyed very much, at a temporary table arranged in the yard. After dinner the meeting was called to order by the President B. A. Folks, and the following business was transacted: The minutes of the secretary were read and approved after which business of general importance was discussed and reports of committees received. The following timely remarks were made by the President and are worthy of fullest consideration, at this time, in connection with the development of high grade pure bred cattle, and it is worthy of note that his remarks deal particularly with the value of animals at recent sales—when live stock sales throughout the world are enjoying prices at this time which are unusual and unheard of values of anything heretofore by the livestock industry.

"Many unthinking men living by habit rather than by reason are still trying to keep cows after the fashion of the pioneers, but the inevitable result is a failure, for the conditions are not only changed but are in the process of being revised from what was in practice only a few years ago. It requires a big sum of money to buy a good cow today. She eats expensive food, is attended by costly labor, occupies high priced land, amid costly surroundings. All this costs money and the dairyman who expects to succeed must get his methods, not by tradition, but by study, by reading, and by discussion with those who are successful. Dairying has become a business, and whoever forgets this fact, or fails to study the enterprise, as any other business is studied, is pretty certain in the end to discover he has failed in a business that commands itself to the best of thinking men, as an important means of service to humanity.

There has been no more encouragement given to the thinking man in the industry than that which obtains from the sale of dairy cattle. During the past year new high records have been scored all along the line, in both private and public sale. There are now more than a score of Holstein bulls that have sold for more than \$10,000. Four have brought the fabulous sum of \$60,000 or more, the highest is \$125,000. \$40,000 has been paid for a cow and a number have commanded \$20,000 or more.

There are unheard of prices that have been paid for animals to be used for the foundation of herds in the making. Thinking men are responsible for the prices paid. They have a vision for the part the dairy cow will play, not only in feeding the striving millions made hungry by the devastations of war, but in rebuilding the countries laid waste by the ravages of war. Thinking men can see in the industry an opportunity to serve humanity, and at the same time build for permanency the farms handed down to their posterity. Such men are of tremendous value to an industry, because their judgment and experience is valuable, and they set the pace for other men.

There never was a time when the world needs thinking men as it needs them today. In every line of activity there are problems, the solution of which is dependent upon changed conditions. The dairy industry offers no exceptions, men must think: they must use more intelligent methods. Waste must be avoided, we must conserve the soil and make it yield its maximum. We must conserve the crops and feed them with judgment. We must conserve our dairy cattle and breed and develop them more intelligently. We must conserve our labor and make it more efficient. Let me quote you a few figures on the dairy cow export trade that has been developed in the past few months.

French Orders for Grade Holsteins Materialize.

"Grade Holsteins in large numbers have already been purchased for shipment to France while orders from the French High Commission will cause a severe drain on the supply of grade Holsteins in most of the important dairy sections of this country. 600 head have been shipped from St. Charles, Ill., Fletcher & Fellows are taking care of an order for 1000 head per month. At St. Louis the Milton-Marshall Co. has an order for 500 head per month. In N. Y. state a definite order for 10,000 head has been received by G. N. Smith. Other orders have been reported to have been placed in New England. Think what this means to the dairyman of this country, a market for their cattle, higher prices, a greater demand for what dairy products are produced. Could the future look more prosperous, or more encouraging? Let each of us put into our business the greatest efforts possible and get that is justly ours."

In closing the above remarks, by President Folks, the following paragraphs were taken from the Holstein Preisan World and is quite an advertisement for Tillamook and the production of our cows:

Oregon Holstein Leads State for Milk
The highest milk producing cow in the Cow Testing Association for Oregon for the month of May, was Sadie Hengerveld Queen, a pure bred Holstein cow owned by J. B. Honey, of Tillamook. Her record was 2393 lbs. of milk and 71.79 lbs. of fat. Mr. Honey's herd of thirteen cows had an average production of 1869 lb. milk and 54.36 lbs. fat for the month.

"E. L. Westover, dairy husbandman of Oregon, reports that the movement for pure bred sires is gaining a strong impetus throughout the state. There is a strong effort being made to develop disease-free areas. Tillamook County from present indications, will be the first county in the west free from tuberculosis."

Mr. C. M. Gilmore as a committee man, in making arrangements at the Holstein Cattle Exposition at the County Fair, made a few remarks in connection with this matter and stated that he had been promised over 50 head for show at the fair. Mr. Clay Daniels, of Foley and Mr. Chas. Swenson, of Tillamook, with their families were present. Mr. Daniels and Mr. Swenson renewing their membership in the Holstein Breeders Association.

A motion was made and seconded that Prof. Fitts or Prof. Brandt of O. A. C. be secured as judges at the coming county fair by the Fair Board and that the fair board should be notified in this connection so that they could make arrangements to secure the services as judges of Prof. Fitts or Brandt.

A motion was made and carried that \$30.00 received from the sale of one of the heifers purchased at the Ohio consignment, being Forest City De Kol Hilda, be transferred from the Holstein Association funds to apply on the note at the Tillamook County Bank, which had been placed on deposit in the wrong funds.

A motion was made and carried that Mrs. B. A. Folks be allowed the sum of \$10.00 for decorations to be used in preparation for the Holstein Booth at the County Fair, which both Mrs. Folks has charge of.

A resolution was adopted as follows: That the Holstein Association go on record, at this time, that Lot 22 as shown in the Fair Catalogue, should be judged as provided in the milking contest rules—50 percent being for production and 50 percent on type and that the milking contest be judged on points of production the same as in the general milking contest entries.

The premium list of the County Fair came up for general discussion and a motion was made and carried that Roy C. Jones, County Agent, act in connection with the judges, in determining the entries in class 7 of the Holstein Association.

The Pomeroy sale, which was held at Scappoose, and at which sale a number of Tillamook breeders had attended, was discussed by Rollie Watson, and it was shown that the 3 year old herd bull sire, Hollywood Lillith Korndyke, sold for \$3,000.00, and the top price cow bringing \$1000.00 and a 4 day old calf bringing \$180.00. Two 3 month old bulls brought \$325 each. An average price for the whole sale being over \$460 per head.

Ben Kuppenbender, president of the County Dairymen's Association presented the matter of the Pacific International Live Stock show building that was being built in Portland and solicited for the same. Mr. Kuppenbender states that over \$1900 has been raised in Tillamook County of our quota of \$2500, which will be raised without a doubt before the county fair.

Dr. Reedy was present, as a visitor, and upon invitation addressed the meeting in regard to his new venture in the live stock exchange business, which he is now inaugurating in this county.

Taking it all together the day was very profitably spent in connection with the purpose for which it was called.

Dr. E. L. Glaisyer, County Veterinarian, was present and also a number of other visitors.

An invitation was given the Association to meet at the farm of Clay Daniels at the next meeting in September, and upon a rising vote of 'banks for the invitation it was unanimously decreed that Clay Daniels farm, on the Nehalem should be the next meeting place and upon adjournment at about 4 o'clock everybody joined in a vote of thanks for the day spent with Mr. and Mrs. Honey.

Cosh! How my back aches!
After influenza or colds the kidneys and bladder are often affected—called "nephritis" or inflammation of the kidneys.

This is the red-flag of danger—but be wise and check the further inroads of kidney disease by obtaining that wonderful new discovery of Dr. Pierce's known as "Anuric" (anti-uric), because "Anuric" expels the uric acid poison from the body and cures those pains, such as backache, rheumatism in muscles and joints.

Naturally when the kidneys are deranged the blood is filled with poisonous waste matter, which settles in the feet, ankles and wrists; or under the eyes in bag-like formations.

Dr. Pierce's Anuric is many times more potent than lithia and often eliminates uric acid as hot tea melts sugar.

Madera, Cal.—"I recommend Dr. Pierce's Anuric very highly. I have suffered for the last three years with catarrh of the bladder, having tried every remedy I heard of but without relief. I saw 'Anuric' advertised in the paper and like a drowning man grabbing at a straw I thought I would try it also, which I did with great success, as it relieved me almost immediately before I had taken all of the trial package, and having great confidence in the remedy I immediately sent to the drug store and bought a package. I can say to all suffering from any disease of the kidneys or uric acid troubles, try this remedy and suffer no longer. I have great faith in Dr. Pierce's Anuric."—D. P. Eason.

The first time Mr. Wilson visited Europe he traveled on a bicycle and made the tour on a few hundred dollars. It is too bad bicycles have gone out of style.
