We pay top prices for Hides.

**"I Don't Need to Tell You"**  
says the Good Judge

Why so many men are going to the *small chew* of this good tobacco.

You get real tobacco satisfaction out of this small chew. The rich taste lasts and lasts. You don't need a fresh chew so often. Any man who uses the *Real Tobacco Chew* will tell you that.

Put Up In Two Styles

**RIGHT CUT** is a short-cut tobacco  
**W-B CUT** is a long fine-cut tobacco

Weyman Brothers Company, 1127 Broadway, New York, C.

## VETERANS ARE NOT ENVOIOUS

Soldiers Who Took Part in the Civil War Proud of the Youngsters of Today.

Recently one of the current magazines contained a picture called, "His Place Usurped." It showed the usual village crowd of youngsters listening to a returned soldier tell stories of his life "over there." Sitting at one side of the picture, entirely deserted by every one, was a Civil war veteran. His face was full of sorrow over his desertion by his usual audience.

"We wondered whether that was really the way people were doing—forgetting the old soldiers—also whether the old soldiers were feeling as this old man in the picture seemed to feel," said an Indiana man. "So we took the picture and showed it to an old man who is a very familiar figure in our streets—on account of his faded army uniform. He looked at the picture and then he chuckled:

"Why, bless your soul. I don't feel that way," he told us. "I want to listen to 'em myself," he continued. "I want to know how they fought at Ypres and see if it was like we did at Antietam. And then, too," he smiled more, "it's just this way. I've been honored for more than 50 years now, and during that time one gets just a little hungry for a chance to do a little honorin' himself. So now it's my chance to honor the young fellows. I'm glad the tables are turned for a little while, and I bet most of the other old comrades are, too."

## DISCOVERED VAST DEAD CITY

Photographs Taken by Airman Over Mesopotamia Reveal Site of Once Vast Metropolis.

Lieut. Col. J. A. Benzeley gives in *Geographical Journal* (London) an interesting example of how photography from an airship can extend our knowledge. When making an aerial reconnaissance in Mesopotamia over territory occupied by the Turks he took a series of photographs near Samarra which shows distinctly the ruins of an ancient city extending 20 miles along the Tigris river and two miles and a half wide, large enough to shelter easily 4,000,000 inhabitants.

This city would never have been noticed on earth, since it is not marked by anything but scattered hillocks, although pottery and medals had been discovered on the site. But the photographs show clearly its whole plan, with its fortifications, canals for irrigation, and streets.

The fall of the airplanes within the enemy lines and the capture of its passengers did not permit Colonel Benzeley to pursue his researches, but since the British occupied the territory an archeological expedition, guided by the photographs, has begun to explore the dead city.

## Conquered Desert Sand.

The British adopted a giant "snowshoe" to conquer the sands of the Egyptian desert, according to Maj. John Bain of the British army, who served in the near East. The scheme, which was based on the same theory that caused the Indian to adopt the snowshoe, was discovered while the army was marching to Palestine. The fine sands impeded both the infantry and horses, so that a day's march never resulted in much more than a two or three mile advance.

"Finally some inventive genius tried laying rather close-meshed chicken wire on the sands," said Major Bain. "The Tommies were thus given something that didn't yield so readily as the soft sands, and the horses got a better footing. Immediately we found that much greater progress was made, and our advances soon amounted to nine and ten miles a day."

## Development of Army Searchlight.

A review of the work of the army engineer corps in the war, first issued by the war department, says that the corps produced a new form of searchlight more powerful than any that had preceded it in any army, with which the Second field army had been partially equipped. "It weighed," the report says, "one-eighth as much as lamps of former design, cost only one-third as much, was about one-fourth as large in bulk, and threw a light 10 per cent stronger than any other portable projector in existence." Still further to perfect the searchlight, our engineers were at work on a remote control when hostilities ceased.—Scientific American.

## Honey 92.1 Per Cent of Normal.

The honey crop of the United States was 92.1 per cent of normal on July 1, according to the estimates of the United States department of agriculture. Reports to the bureau of crop estimates warrant the estimate that the yield of surplus honey per colony was 25.8 pounds and that about one-half of the annual product per colony was realized by July 1. The high condition of 92.1 per cent of normal on July 1 this year compares with 68.7 in 1918 and 80.3 in 1917.

## Electrical Undertakings in Japan.

There are 715 electrical undertakings in Japan, including 625 power plants, 42 electric railways, and 48 companies operating both power plants and tramways. This is an increase of 40 companies over last year. The total amount of invested capital in these enterprises is about \$388,000,000, including \$193,000,000 for power plants, \$22,000,000 for railways, and \$173,000,000 for those rendering combined service—an increase of about \$8,000,000 over last year.

## AGAINST WAGES FOR WIVES

Gathering of Women Ridicule the Idea, Labeling it as "Commercializing the Home."

Wages for wives were turned down by an audience largely of women here the other night after a debate on whether husbands should be required to pay such wages, says the Philadelphia Evening Bulletin.

One speaker drew a dismal picture of the future of romance with wives working for wages.

"Imagine a scene like this," he said: "Honey, do you love me?"

"Of course I love you."

"Then will you marry me?"

"Well, maybe. How much do you pay?"

"Suppose the wives were to join the soviet of waiters-up and charge triple wages for waiting up nights for husbands," he said.

"Imagine a wife going into society and being labeled a \$15-a-week wife. A woman can take a last-year hat and make it look like new. But when she signed a contract for \$15 a week there would be no hiding it from the neighbors."

Another speaker pleaded that "woman shall not be brought down from her pedestal as a queen and made a mere employee of man." In depicting the future of romance under the wage system he said the marriage ceremony would have to be revised to read:

"With this ring I hire thee, and will pay thee \$15 a week by the aid of the world, the flesh and the devil."

Notices like the following he predicted would be published:

"Married—John Brown and Mary Smith, by Rev. Russell H. Conwell. They will live in Logan and the wife's wages will be \$15 a week."

Scenes like the following in court were forecast:

"Judge, he hired me for \$20 a week and he is now two weeks overdue in my pay. I'm going to get a new boss."

## LOOKING AHEAD A FEW YEARS

Remarks That Will Be Merely Ordinary When the Blimp Has Been Finally Perfected.

Augustus Tolliver, the soap king, strode wrathfully out of his stateroom aboard the blimp and seized the arm of the porter.

"Idiot!" he roared, "why didn't you give me a call this morning? I told you I had to be in London for a directors' meeting at 9 a. m. sharp, and now London is Lord knows how many thousands of miles in our rear."

"Ah pounded on yo' door, boss, but yo' refuses to waken," replied the porter.

The soap king pulled out a watch.

"Eleven-thirty," he grunted disgustedly. "Where are we now?"

"Jest passed over St. Louis, boss; we'll be back in N'Yawk at 12:05."

"Oh! well," said Tolliver, "I can attend that 12:30 meeting of the soap powder people and catch the 1:30 blimp for London."

## Rat Skins for Leather.

The suggestion has been made that the rat problem might be best solved by making use of the skins of the rodents for the purpose of leather.

Somebody with the gift of guessing computes that there are 10,000,000 in this country, and the damage they do would feed a good-sized army. It would take at least 5,000 skins a day to supply a small modern tannery.

Nobody wants the rats, they belong to anybody that can catch them, and then deliver the goods. There is not enough leather to go around.

Fish skins are susceptible of tanning, and there are rat skins which make good leather, large enough for many purposes.

## Cure for Poison Ivy.

Mrs. Evelyn S. Trenbath, wife of the Rev. Robert W. Trenbath, rector of St. James's Episcopal church of Montclair, N. J., has conferred a boon on sufferers from poison ivy by announcing a remedy which those who have tried it say is a most efficacious remedy. It is simply the green leaves of common catnip rubbed on the affected parts until the juice runs.

This never fails, Mrs. Trenbath says, no matter how advanced the case may be, and is simple to use, especially in the case of children. The plant grows usually in great abundance behind old barns, and is said to be so antagonistic to the ivy that if planted near it the ivy disappears.

## Volcano That Emits Lava.

The following is reported by an observer in Hawaii: Tremendous changes are in progress at Kilauea, and there is no indication whatsoever of any cessation of the monumental rising of the entire vast lava column. Over the southwest brink a wide stream of glistening lava is sluggishly flowing in the direction of the Kalu desert, not with the spectacular cascading torrents of the southeastern flows of last March, but with a steady, stealthy gliding, which gains ground slowly at its base, but which piles up into tremendous masses from its source forward.

## Dry Lead for Batteries.

A dry battery utilizing red lead, instead of the usual manganese compound, has been patented by H. Canoyl. It is claimed that the red lead battery lasts longer than the type now in vogue, may be kept inactive for months without any deterioration and may be recharged at least ten times, with each recharge as efficient as any present battery.

## BAYOCEAN SHEET METAL WORKS, TILLAMOOK, ORE.

**FIRST CLASS PLUMBING**

**Todd Bldg. NEXT TO WILLARD SERVICE STATION.**

## ARMOURED INNER TUBES Prevents Punctures and Blowouts.

Armoured Inner Tires are a practical, common sense, money-saving tire necessity for all tire users. By preventing punctures and blowouts, they add pleasure, safety and economy to motoring. Lubricated inside and out, they require no cementing and no vulcanizing. Placed on your tires as easily as inner tube.

**C. MILLS, Agent, Tillamook, Ore.**

## CLOUGH'S CARBOLIC COMPOUND

For disinfecting where Contagious or infectious diseases are prevailing.

**CARBOLIC COMPOUND** is a powerful Germicidal mixture and by its use will improve general stable conditions.

**C. I. CLOUGH CO.**  
RELIABLE DRUGGISTS.

## Expert Dyeing

That Old Coat, Dress or Suit can be dyed to look like new at a Small Cost.
