

HOW 'TEDDY' CAME

No Flourish of Trumpets Herald Roosevelt.

Just One of the Crowd Doing Good Work in Hopi Land, but Supreme in Quality of Leadership—Proved His Energy.

I was travel stained from head to foot, and on the front of my khaki riding skirt flared with a placid disregard of all conventions a large, round circle of black axle grease, where the camp wagon had branded me for my affront of trying to climb in over the wheel, writes Natalie Curtis in the Outlook. My companions called the round stain an "Indian sun symbol," and it was not comforting to hear them jeer that nothing but a bath of gasoline could ever make me clean again.

I ran across the sandhills to the little schoolhouse to which the Hopi children trail down from the mesa top to be taught in the ways of the white man. All the white employees of the government school were busy with scrubbing brushes—so busy that they did not look up from their work as they said, "Sorry, we can't bother about anything now. We're cleaning up for Roosevelt." "But so am I," I cried. Yet they only went on scrubbing.

At last I spied a silent and empty motor car. A man on horseback seemed to be the owner. "I am going to meet Col. Roosevelt," he said; "too busy to help you now. You can have as much gasoline as you like if you get it for yourself." I fetched a handleless cup from the schoolhouse, but I gazed at the car in despair. I was as ignorant of its inner workings as an Indian. Presently a handsome and deep-tanned young cowboy in blue overalls passed me, leading some horses.

"I wonder if you could get me some gasoline from this car?" I called. "I am allowed to have it. You see," I continued, confidentially, "we are all trying to clean up in honor of Col. Roosevelt—he is expected today some time." The young man smiled, and a few minutes later he lay in utter chivalry under the car, milking gasoline into my cup. I thanked him warmly and sped away. I was glad to see that he was just as weather stained as I.

As I climbed the crest of one of the sandhills I stopped short, open mouthed in wonder. A stalwart figure on a cow pony was riding up the hill, alone and unattended; without any flourish of trumpets, Col. Roosevelt had arrived! His sunburned face was partly shaded by a big felt hat, a red handkerchief fluttered at his throat, and he, too, looked as though gasoline might improve his khakis. I waved my sombrero and cried "Hall to the chief!" No one had expected the great guest so soon, but it was like him to be ahead of the rest of the world.

He leaped from the saddle and we shook hands warmly. "This is capital!" he exclaimed. "But don't spill my gasoline," I cried. "Every one in Hopi land is trying to clean up for you!" He laughed heartily. "You must meet my boy," he said, and called loudly, "Archie!"—and at this the knight in overalls appeared!

"We have met today before," he said, with a smile, and glanced significantly at my cup. It was nearly empty. The desert sun was drinking up all my efforts, but I did not care. The stars were still alight the next morning when we left our camp fire, but we paused for a moment to fill a bottle with hot coffee for the colonel, who had made his headquarters in the schoolhouse. When we reached the schoolhouse, the colonel's room was empty. "One must indeed get up early to be abreast of Theodore Roosevelt," we told each other, rather shamefacedly.

Now, to climb the Waipi trail, a steep 600 feet, even on horseback, is no pleasant task before daylight (and breakfast)! But when we scrambled on foot to the summit, tired and breathless, there stood the colonel, strong and secure, among the topmost rocks of the Hopi buttes, silhouetted against the "yellow line," as the Hopis call the dawn. The little incident was characteristic of his natural drive of energy, his unflinching promptitude and his inborn quality of leadership.

Portia to Date.
For the first time in history a woman lawyer, Signora Comani, has conducted a case in an Italian courtroom; and commentators are naturally reminded of Portia and the famous case of Shylock vs. Antonio. Shakespeare may have found his idea for the scene in an Italian tradition, for the tale comes down from the fourteenth century of how the daughter of a jurist-consult in old Bologna took her father's place in the law school.

But even if the tradition is based on fact, it detracts nothing from Signora Comani's appearance in an Italian law court, for law schools and law courts are somewhat different, and the "lady lawyer" of Bologna did not appear publicly; she taught law to her father's students from behind a curtain.—Christian Science Monitor.

Partnership.
Broker—Darling, we are ruined! I have lost every dollar.
Wife—Not so, dear; I still have the stock that you gave me last Christmas.
Broker—You have—really?
Wife—Yes, pet; so only you are ruined—not we.

OYSTER RAISING IN HOLLAND

Highly Scientific Methods Employed in That Country Have Been Remarkably Successful.

In the industry represented by oyster cultivation, Holland is the most systematic in its operations and employs more elaborate methods than any other country in the world. The numerous sounds that indent the coast of Holland, particularly in the region of the River Scheldt, afford excellent facilities for the propagation of the oyster and enable the country to conduct the most successful oyster industry in Europe. Public dredging is not permitted, as the result of that system was the threatened exhaustion of the fisheries, and the beds have been carefully surveyed and specific tracts are leased to individuals and companies, who are thus enabled to conduct the propagation of the oyster in a systematic manner that insures the best results from the territory available. Many growers lease several tracts in different localities, and adapted to different purposes, which facilitates the various operations, as the oysters can be shifted from one place to another, according to the season and the stage of development. A few of the oystermen plant shells on the banks, as is done in many places in this country, but the largest and most successful propagators are equipped with their own tanks and ponds, located in convenient shallow bays, in which they carry on the culture.

MEASURE HEAT OF STARS

Scientific Instrument Used at Washington is Sensitive to an Almost Miraculous Degree.

One of the experts employed by the government bureau of standards in Washington has perfected an instrument which measures the heat of a star so far away that it can't be seen with the unaided eye. This same instrument is sensitive enough to be affected by the heat of a candle 100 miles away. "What is the practical value of such labor?" asks Thomas H. Uzzell in Everybody's. "Well, for one thing, these experiments by Doctor Coblenz have made a substantial contribution to the theory and technology of measuring high temperatures which will melt any known substance. Making use of this new knowledge, other bureau men have greatly improved the high-temperature thermometers which are used in the steel industry to measure the temperature of molten steel. One of the biggest improvements in the production of steel in recent years is the result.

"Formerly many millions of dollars' worth of steel products depended upon the trained eye of the foreman in estimating the temperature of steel from its color. But these new thermometers don't drink; they don't fall; and their accuracy means vast savings in money, better steel, a decided step forward in America's industrial sovereignty."

On Toads.
"Many stories are extant tending to show that toads have been found alive in rocks or in soil deep in the earth; yet so far as investigated by the writer in no case has the evidence been at all conclusive," says A. H. Kirkland in Boys' Life. "On the other hand, experiments have shown that toads may be kept alive at least 18 months sealed up in plaster or limestone. There is little doubt that the toad may live to be 20 years old, or more.

"Though it lives alone in summer, toads often hibernate in colonies of half a dozen or more. In feeding, usually by night, the toad patrols a fairly well-defined beat; garden and flower beds are frequented, and particularly the ground under arc lights, where numerous insects fall fluttering from the lamps above. When food is abundant, as shown by experiments on toads in cages, the animal eats an equivalent of four square meals daily, consisting of caterpillars, cut-worms, beetles, ants, etc."

First Clocks Simple Affairs.
The first clocks were simple affairs which showed the hour alone; then followed the addition of the minute hand, and later came clocks which recorded the day of the month, the phases of the moon, and many other pieces of information, generally of a more or less astronomical character. During the sixteenth century, the Italian and German clockmakers, notably those of Nuremberg and Augsburg, made great progress in their art. There are those who claim that one Richard Harris, an Englishman, invented and set up the earliest pendulum clock some time during the first four decades of the seventeenth century; but this story does not appear to be well authenticated, and the honor of introducing the pendulum seems to belong to the Dutchman, Huygens.

Kangaroo Tendons Best Sutures.
The kangaroo, which propels its body over the ground in a series of long leaps or bounds, has a very powerful tail which is of great assistance to the legs in enabling it to leap. A great muscle or group of muscles, each little bundle of them with its own tendons extending to the extremity of the tail, gives power to this important organ. Dr. Henry O. Marcy of Boston discovered that these tendons were the ideal thing to use in sewing up muscles after a surgical operation, as they are not elastic and they do not soften until their work is done, and then they are absorbed by the tissues.

SUMMONS.

All of the above described lands are situated in Tillamook County, State of Oregon.

You, and each of you, are hereby notified that there is now due and owing and unpaid to the plaintiff, Tillamook County, on said Certificate upon the several pieces and parcels of real property hereinbefore described, the sums of money set opposite each of such tracts, and in addition thereto, there is due and owing and unpaid on the respective sums, further sums for interest thereon at the rate of twelve per cent per annum from the 30th day of August, 1919; and you are further notified that the plaintiff, Tillamook County, will apply to the circuit court of the State of Oregon, for the County of Tillamook, for a decree foreclosing the liens against each and all of the said several pieces and parcels of real property mentioned in said Certificate.

And you and each of you are directed and summoned to appear within sixty days after the date of the first publication of this summons, exclusive of the date of said first publication, and to defend the action or pay the amounts due; and in case of your failure to do so, a decree will be rendered by said court, foreclosing the liens of said taxes and costs against the lands and the premises named in this notice and set opposite your respective names.

The date of the first publication of this summons is the 25th day of December, A. D., 1919.

All processes and papers in this proceeding may be served on the District Attorney of Tillamook County, Oregon, at Tillamook, Oregon.

W. L. Campbell,
Sheriff of Tillamook
County, Oregon.

WHY THAT LAME BACK?

That morning lameness—those sharp pains when bending or lifting, make work a burden and rest impossible. Don't be handicapped by a bad back—look to your kidneys. You will make no mistake by following this Portland resident's example.

Mrs. J. H. Van Buren, 807 Mallory Ave, Portland, Ore., says: "I had suffered for a good while and had failed to find anything to help me. Doan's Kidney Pills cured me of kidney trouble. Doan's built me up, giving me excellent health and I shall always praise them. I am hardly ever without Doan's Kidney Pills in the house and using them now and then keeps me well. There is nothing as good for anyone suffering with a weak, aching back and dizzy spells and whose kidneys don't act right."

Price 60c., at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Van Buren had. Foster-Milburn Co., Mfrs., Buffalo, N. Y. — Pd Adv.

Immediate Delivery on Nash and Overland Cars.

The Nash Six with Perfected Valve-in-Head Motor.

THE wide-spread and heavy demand which exists for the Nash Six with Perfected Valve-in-Head Motor but reflects the quality of its performance in owners service.

This big and steadily increasing demand is certain proof that this car has more than met the expectations of its owners in practically every community from coast to coast.

It has performed and is performing in a way that creates for its hosts of admirers wherever it is in service. Because of the high character of this performance the Nash Six is now generally reorganized to be a class leader—to offer an unusually attractive value at its price.

The thousands of Nash Sixes in use have demonstrated conclusively that they do possess the three qualities which owners appreciate most in a motor car. The Nash Six is unusually powerful—unusually economical and unusually comfortable to ride in and to drive. Its Nash Perfected Valve-in-Head Motor is now generally accepted as marking a distinct step forward in motor car engineering.

Price \$1720.00 Tillamook, Ore.

Celebrated Nash Truck.
See us if you are contemplating buying a Truck, for you want the Best.

OVERLAND 4

OVERLAND 4 marks a fundamental advance in motor car construction—the most important improvement in comfort to the passengers and in preserving the chassis from real shocks since pneumatic tires made motoring possible.

Its Three-Point Cantilever Springs create a riding buoyancy which establishes Overland 4 as a new type of car.

Before the Overland 4 was submitted to the verdict of the public it was subjected to preliminary trials covering more than 250,000 miles in widely varying climates and road conditions. In high and low altitudes, in rock and sand, in mud and snow and dust, the Overland 4 withstood every ordeal. And in so doing, this car established a new standard, not merely of roadability, but of economy.

Price \$1090 Tillamook, Ore.
