

TILLAMOOK, OREGON, JANUARY 22, 1920.

## Tillamook Jottings.

A marriage license was issued to Caddie H. Hutchens and Lillie D. Hopkins.

Henry Story, of Bay City, was bound over to the grand jury on a statutory offence committed on his daughter.

When you think of wood, coal or drayage think of "Tillamook Transfer Co.", Liberty Temple. "We Deliver the Goods."

Married on January 15th, at the parsonage of the M. E. Church, the pastor, Rev. G. A. Oliver, officiating, Robert L. Andrews, of Yoncalla, Douglas county, and Hazel Dow, of this county.

Prof. Turnbull, superintendent of the city school, is putting on a lot of style these days. He is home with the mumps, and it is hoped that he will be the "scape goat" for the whole school.

State Senator T. B. Handley returned to the city Tuesday after attending the special session of the Legislature. He was one of the committee that framed the new game and fish bill.

Chas. A. Brown has rented the building vacated by J. W. Edwall, where he will be the local agent for the Columbia Six and Marbom Six autos, and Geo. B. Hageman will be the salesman.

If there has been anyone omitted in the census enumeration of Tillamook City, please call or drop a card giving your name and place of residence to me at once at the Tillamook hotel, Mrs. Nell Rasmussen.

Mrs. E. E. Doughty was in the city Saturday from Bay City, and renewed her subscription. It is 50 years ago that she came to Tillamook and was a vastly different place then to what it is now, there being only one small store here.

L. M. Thompson vs. Mary J. Thompson is a divorce suit filed in circuit court. These parties were married at Spokane, Wash., the 7th of May, 1917. The defendant, it is alleged, deserted and abandoned the plaintiff the following December. No children were born to the union.

Coming to the city this morning with his wife and family in his new auto, Joe Blazer ran into a pole near the Harrison fill, and his eldest son who was in the front seat had his face badly cut, breaking the windshield when his face came in contact with the glass. The boy was taken to Dr. Boals office and his injuries attended to. The auto was somewhat injured.

Representative C. J. Edwards returned from Salem on Sunday, the late legislature having kept "open house" until three o'clock that morning. Mr. Edwards was not at all pleased with the special session of the state legislature, owing to so many bills being introduced and so little time to discuss them. He said most members of the house were more or less disgusted with the special session.

Deputy Sheriff Kroner, of Lane county, came in from Eugene on Tuesday and left the next morning, bringing with him W. J. Lewis, who was arrested here for obtaining money under false pretenses at Eugene.

Golden who runs a store in that town sold the man some goods which he paid for with a check, but the man had no funds in the bank. When Golden came over here from Eugene he recognized the man and had him arrested.

At the country home of Mrs. Robinson on Jan. 8th a birthday celebration was given in honor of Bert Jr., celebrating his first birthday. The house was beautifully decorated with white carnations. The guests were Mrs. Fred Bohannon and daughter, Mrs. Paul Fitzpatrick and son, Mrs. Arthur Marolf and son, Mrs. Fred Nicklaus and son, Mrs. Mrs. Bell and son Floyd, Howard Edmunds, Mrs. Harold Rogers, Mrs. Preston Marolf, Mrs. Bert Neilson, Mrs. Clark Embum, Edward Brenner and Miss Sumerlin.

At the annual meeting of the Women's Relief Corps, the following officers were elected for the ensuing year: President, Minnie Johnson; Vice, Nettie Parazo; J. Vice, Mary Rice; Chaplain, Elizabeth Reynolds; Treasurer, Bula Thayer; Secretary, Mary Edwards; Press, Cor., Mrs. E. Rogers; Patriotic Inst., Mrs. Mahan; Conductor, Alice Woolfe; Con., Linnie Hill; Guard, Anna Jones; Asst. Guard, Jennie Coburn; Deacon, Bertha Boone; Color Bearer, Katie Stillwell; Bernice Lucas; Doty and Ollie Travis. The songs of the W. R. C. are very interesting and interesting.

## Elks Attention.

Elks in the county are urged to attend a meeting at the K. P. Hall in Tillamook City, Feb. 7, 1920, at 8 o'clock. Refreshments and then—Elks Committee.

## BAY CITY LAND COMPANY IS ABSORBED.

### New Companies Will Take Over Property and Bank.

An important real estate deal was made this week and will be consummated in a few days, in which the Bay City Land Company and the First Bank of Bay City is absorbed by the Bay City Development Company, which is incorporated for \$200,000, and the Bay City Industrial Company, incorporated for \$60,000. C. E. Cunningham and Frank Reader, president and vice president of the companies, will, it is expected, take over the property in a few days with the expectation of placing the property on the market and straightening out the affairs of the Bay City Land Company, which has been delinquent in taxes for several years. Considerable improvements are planned, one being the erection of a new bang building of Bay City.

## TILLAMOOK MILL IS SOLD.

### Russell Hawkins Buys Out New Orleans Interests.

(From The Oregonian.)

Russell Hawkins has bought the sawmill at Garibaldi, Tillamook county, owned by the Cummings-Moberly Lumber company of New Orleans. Mr. Hawkins purchased all the property the Louisiana concern had in Oregon for \$250,000. The deal was closed several weeks ago. This plant was never operated, for about the time it was to start the manager died and has remained idle.

Some alterations will be made by Mr. Hawkins. To accommodate the men who will work at the mill it will be necessary to build about 100 houses, making Garibaldi quite a town. Big things are pending in the vicinity of Tillamook Bay, Mr. Hawkins, who is a member of the port commission stated.

The Coats Lumber Co., has purchased the sawmill at Hobsonville for \$275,000 and will make a number of improvements. Mr. Hawkins has bought 22 donkey engines and these will be placed in the woods in the spring to get out logs.

A logging road is now being built into the Whitney Lumber company's holdings and the donkeys will go in over this line, which is being constructed as carefully as a standard railroad. The latest report shows that there is from 30 to 32 feet of water at low water on the bar, and the shoal contour inside the bay shows more than 24 feet at low water.

The port commission which has about \$250,000 available, intends to dredge the channel from the entrance of the bay to Hobsonville and to the Garibaldi cove, which will enable lumber vessels to reach the Coats mill and the big plant at Garibaldi. The Tacoma Dredging company has been awarded the contract for the work.

## The Cheese Situation.

Carl Haberlach reports that the November checks will be handed out generally this Saturday. Production for the year has been so heavy and prices have been so high, that the stocks on hand have been sufficient to carry most dealers and they have been buying very slowly lately.

Prices around Tillamook range from 76c to 81c for butter fat, the latter being paid at Holstein Creamery. At the distant factories where there are no whey separators, prices are down as low as 70c. At several of them, milk was received every second and every third day, and it is of course impossible for the cheese makers to get as good a yield out of that class of milk as where milk is delivered every day.

The following taken from government reports show the comparative storage holdings on Jan. 1st this year and a year ago. San Francisco, 1,271,257 lbs. cheese in storage Jan. 1st, 1920; 254,059 lbs. cheese in storage Jan. 1st, 1919. There is five times as much cheese there this year as last. Storage holdings in the United States Jan. 1st, 1920, 52,342,523 lbs., on hand Jan. 1st, 1919, 19,822,659 lbs., a gain of 169 per cent.

On January 1st, 1920, there was 53,685,987 lbs of butter in cold storage in the U. S., compared to 43,909,707 lbs. on Jan. 1st, 1919, a gain for this year of 22 per cent. On Jan. 17, 1920, San Francisco reported only 418,214 lbs. of butter in cold storage, yet butter prices have dropped considerable in the past two weeks.

Tillamook is now receiving 61c. for whey butter fat, while on Jan. 3rd, 1920, we were getting 77c.

## Junior Red Cross of Tillamook County Plans a Peace Time Program.

The Junior Red Cross of Tillamook County is entering upon a peace time program. Each school will be offered the opportunity of becoming a school auxiliary.

Flags and coins of foreign nations will be available for school exhibits, stereopticon slides and moving picture films of child life in foreign lands will be shown sometime during the year. The Junior Red Cross News will be sent monthly to every school auxiliary. It is a sixteen page magazine containing pictures of foreign children in their native costumes and describing how they work and play.

The health crusade of the educational department will be carried out. Tillamook children who are studying French will probably, next semester, write letters to French children who are attending French schools and want to become acquainted with American children. Many school auxiliaries during the year will give patriotic entertainments in order to secure small funds for their respective activities. No membership fee is charged for the Junior Red Cross but some money will be necessary for expenses.

The Chapter Executive Secretary, who is now being secured by the Tillamook Chapter A. R. C., will help the Chapter School Chairman, G. B. Lamb organize the Junior Red Cross.

## Teachers' Association Meeting.

A meeting of Tillamook County Teachers' Association is called for Saturday next at the Nehalem public school building, at 10 o'clock in the morning which will be called to order by E. K. Barnes, of the Nehalem High School.

The program consists of a selected subject by Prof. Barnes; primary work by Mrs. Clara Burge, primary department Tillamook City schools; The State Teachers' Association, by Prof. L. W. Turnbull, city superintendent Tillamook City schools; problems in school management, Mrs. Harriett Ford, Brighton; talk by Prof. H. S. Brimhall, principal Nehalem school; Our program for 1920, County School Superintendent G. B. Lamb. There will be discussion on each of the subjects.

The musical features will be by pupils of the Nehalem school, Misses Helen Miller and Ruth Barnes rendering a duet; instrumental solo by Miss Stevenson of the Nehalem H. S. and a duet by Misses Vivian Tohl and Mildred Morris.

Teachers are reminded that they are to bring their lunch.

## Tillamook County Will Have Red Cross Service.

The Tillamook County Chapter of the American Red Cross will employ a trained worker to give Red Cross Service to returned soldiers and sailors and their families.

At a meeting held Thursday of last week the Division Office of the Red Cross showed that there was much to be done. Dr. R. T. Boals, U. S. Public Health Service Physician, said he saw in his work each day many things which should be cared for by a Red Cross worker. The President and Secretary of the American Legion made a strong plea for service handled in an efficient manner. The vote to employ a Chapter Executive Secretary was unanimous.

The Red Cross offices will be those of the American Legion, in the Tillamook Building, which the Red Cross is having fixed up and furnished. Somewhere the Legion is going to find a desk, some chairs and a typewriter. There will be two rooms, one a reception room the other a place to discuss private business matters with the secretary.

E. J. Clausen, Commander of the Tillamook American Legion Post, was asked to serve as a member of the Executive Committee of the Red Cross. The Red Cross needs the Legion and the Legion needs the Red Cross.

Tillamook County Chapter is to be congratulated upon realizing the responsibility of a 100 percent fulfillment of its war obligation, and for taking the very best means of insuring that this obligation is fulfilled.

Fred C. Baker, chairman of the Tillamook County Red Cross, received a telegram from the Western Division that Miss Elizabeth Burrows was available for home service work in Tillamook county. She is a trained worker and a graduate of Syracuse University, New York. Served for two years as secretary of the Y. M. C. A. and had several years as high school teacher. She had special work in sociology at the university of California, took the Red Cross course and had experience in family welfare work. Mr. Baker sent a telegram to the Western Division accepting the services of Miss Burrows.

## Watch Taken From Guild Hall.

The party who took a gold watch from the Guild Hall last week is requested to return it to box 122, Tillamook, Ore., to prevent the person being arrested, as they are known.

## Presbyterian Church.

Sunday School, 10 a.m. Morning worship 11 a.m., subject: "The Wisdom of the Wise".

Evening worship, 7:30 p.m. Subject "The Eyes of the Heart".

## HOLSTEIN BREEDERS HOLD ANNUAL MEETING

### Report of Officers and Business Association Taken in Hand for the Coming Year.

The Seventh Annual Meeting of the Tillamook County Holstein Breeders' Association was held at the Court House on Monday, the 19th. The report of the president and secretary-treasurer for the past year was read and upon motion were approved and filed for future reference of the association.

Officers were elected for the year as follows: B. A. Folks, Pres.; Clay Daniels, Vice-Pres.; J. J. Rupp, director, 2 years; Jay Honey, director, 3 years; Rollie Watson, Sec.-Treas.

Many timely topics relative to the advancement of the live stock industry were discussed by Roy C. Jones. The meeting required most of the afternoon and adjournment was made with the understanding that the president was to call an Association meeting early in February. One interesting feature of the meeting was the address of the president, B. A. Folks. He said:

### President's Report.

Fellow Breeders—I am glad that we can meet together here today in this our 7th annual meeting. We can take pride in the growth and enthusiasm for our association. This last year has seen the largest membership of any year yet. It has also been one of progress by the great breed that we have chosen to follow. I say follow, for we are followers until we get to the point where we can produce something better than we started with, and in this respect we have not as yet attained leadership.

In attaining such leadership we have little discouragements such as have come to us in the past to overcome. Just as there can be no progress made in any line, without great effort, some failures and many disappointments, so it is with the pure bred live stock movement in Tillamook. Because the movement does not seem to get along as planned or that it has more knockers than boosters, is only a small obstacle to overcome in view of the wonderful possibilities of the development of the Holstein dairy cow in Tillamook. With the effort already put forth she has taken the lead as a producer of food of the highest quality for human consumption.

The two small importations of Holstein cattle that have been made to this county are beginning to be felt in a large way. The Holstein cow is paving the way to greater profits to her owners by her great producing ability and by the fact that her milk is of the greatest importance in cheese production.

"We have seen the healthy growth of the Holstein cheese factory and of its popularity. This is a real demonstration of what we can expect the Holstein cow to do for us.

"Where it is not possible at the present time for all of us to patronize this factory, there is open to us a fair way of treatment in the new method of payment of fat plus 6 method.

"All dairymen should familiarize themselves thoroughly with this method of payment. Just a word of explanation. When the man Babcock made his great discovery and consequent contribution to the dairy world, milk was just milk, a hundred pounds of one quality was worth as much as any like amount.

"Babcock saw the need of determining the quality of milk, hence the Babcock test. This test has been universally adopted for determining the amount of fat in milk, but as cheese is not made from fat alone, a method for determining milk values at these factories was needed, hence the new method of fat plus 6 method.

Low testing milk, yielding cheese greater in amount to the pound of fat than high testing milk and where they are mixed at the factory for cheese production it is necessary to adopt the nearest way of determining the value of each quality of milk. Under these conditions the fat plus 6 method is the best practical way we have at the present time.

"Some of our fellow dairymen seem to believe that they are sustaining a loss by this method of payment, while as a matter of fact there is not any loss to these high testers. They are getting pay for the cheese that their milk yields. The loss that they are supposedly sustaining is the amount that the low testing milk has been helping the higher testing milk and when this amount is diverted to its right place by the fat plus 6 method it is a very noticeable difference on the part of the higher testing milk.

"This method of paying is an honest, practical and easy way to pay all cheese factory patrons for what their milk yields. It is to be hoped that this association will take it upon itself to make this question understood throughout Tillamook county this year. If it does this it will

have accomplished a great and lasting good.

"Owing to the location, adaptability and climatic conditions, Tillamook county is, and in all probability, will remain to be, a strictly cheese producing section. Together with these facts, when we consider the progress that is being made by the Holstein cow, due solely to her merit and sturdiness as a producer of large and economical milk production, it is logical to reason that in the not distant future we as Holstein breeders can reasonably expect to profit in the sale of young stock. A market which up to the present time has not been touched. Testing will put us in touch with the buyer. The testings end of our business should be given greater consideration. The Noyes & Folks herd up to the present time is the only one that has been put on official test. They report a record of over four hundred pounds of butter fat on a two year old which will freshen in just 31 days after completion of her year record. It is reasonable to expect, from present indications, that their herd of eight will finish their ten month average with over 400 lbs. fat.

"However, when we compare these with the average of the breed we can better appreciate the quality of the wonderful herd. The ten best Holsteins compared with the ten best cows of their nearest competitor reveal to us the fact they lead by over \$100 pounds fat to the cow, and over eleven thousand pounds of milk.

"Likewise, the breed average is 512 pounds fat, which is 85 pounds ahead of their nearest competitor. The progress of the breed as great as it is, has a close rival in the National Ass'n. with over 13,000 members and new ones being added at the rate of 75 per week. In the recent drive in Wisconsin, in the short time of three weeks there were secured fifteen hundred members.

"The National Ass'n. is of great value to the members in keeping them posted on the progress of the breed and in the help they lend at fair time. In this connection I wish to refer to the assistance rendered at the recent International Live Stock Exposition, besides the much and helpful literature they helped in a financial way.

"The increase is due as contemplated is a reasonable demand, in that the extra 50 cents will go to the Holstein publication and in that way every member will be getting a breed periodical. We should lend our efforts toward the formation of a calf club for those that are interested in the Holstein calf.

"Let everyone lend his efforts to the successful accomplishment of the Tillamook County Fair. We made a splendid showing of the P. I. Now lets pull for Tillamook and remember that H. stands for Holstein, Health and Happiness."

### Secretary-Treasurer's Report.

Rollie W. Watson, the secretary-treasurer, also had an interesting report, which was as follows:

"As your secretary and treasurer during the past year of 1919, it is gratifying, indeed to make this annual report and to show a substantial growth all along the line of our endeavors. The year now passed into the history of development of the pure bred Holstein cattle of Tillamook county has conclusively shown that the Tillamook breeders are to be a factor in the future to contend with for honors rightly and justly won in competition at the National show.

Those of our association who showed their cattle at the Pacific International Exposition at Portland, Oregon, in November should feel very proud of the fact that every entrant secured a place for prize money and at the top of the awards, especially is this so, when taken into consideration that your cattle went up against such strong competition as shown by the Hollywood, Carnation and Bishop herds. The exhibit made by you gentlemen of the association has gained for Tillamook County a national reputation and many columns of publicity which has put the Holstein Breeders of Tillamook County on the map for all time to come.

"The Pacific International Live Stock Exhibition was attended by some seventy-five thousand people interested in live stock. It afforded me a great deal of pleasure and satisfaction to represent the National Holstein-Friesian Association of America, The Oregon Holstein Cattle Club and our association at the show while in charge of our booth and exhibit there: Our register contained over six hundred signatures of people who are interested in the breed, something over seven thousand pieces of literature on the Holstein cattle covering many subjects were distributed. The total expenses of the booth were provided for by the National Association.

"During the past year, we have secured over sixty columns, or practically ten pages of newspaper publicity. Your secretary has handled a large amount of correspondence on

various matters pertaining to the association work. There has been seven club meetings and four executive or board meetings during the year.

"The balance on hand in the treasury Jan. 4th, 1920, was \$28.10; paid out during the year, 1919, \$231.22; The balance in the treasury, Jan. 5, 1920 is \$43.66.

"In conclusion, I would like to see a greater personal interest taken by all the dairymen of Tillamook county and especially the breeders of Holstein cattle in association work. The reason for co-operation along the line of development of pure bred cattle is, that it is worth while. In ten years from now Tillamook county could and should produce one million dollars in pure bred cattle each year thereafter, I really believe that we should eventually sell as much pure bred stock as our cheese industry now realizes. Think this over and then go to it."

## GEM THEATRE PROGRAM

Friday, Jan. 23—"Hearts Adrift", Paramount production featuring Mary Pickford.

"The Bank," 2 reel Chaplin comedy.

Saturday, Jan. 24—"Splendid Sin," William Fox production, featuring Madeline Travers.

"The Rajah" Harold Lloyd comedy.

Sunday, Jan. 25—"The Studio Girl", Select production, featuring Constance Talmage.

"The Son of a Gun" 2 reel Sunshine comedy.

Monday, Jan. 26—"Putting it Over" Paramount production, featuring Bryant Washburn.

"Comedy."

Tuesday, Jan. 27—"The Knickerbocker Buckaroo," Arteract production featuring Douglas Fairbanks.

"Trying to Get Along", 2 reel Mack Sennett comedy.

Wednesday, Feb. 28—"Greased Lightning," Paramount production, featuring Charles Ray.

"Bray Pictograph."

Thursday, Jan. 29—"Lombardi Ltd.," A big seven reel special production featuring Bert Lytell. One of the most clever, cleanest, classiest and snappy comedies ever put on a film. Don't miss it.

## GUERNSEY BREEDERS TO IMPORT MORE STOCK.

### Association Held its Annual Meeting Erwin Harrison Made President.

The Tillamook County Guernsey Cattle Club held its annual meeting on January 20th, and elected Erwin Harrison, Pres., H. E. Tucker, vice-pres., and Homer Mason, Sec.-Treas. The directors are Rudolph Zweifel, Geo. Williams and J. L. Gay. It was voted to hold regular monthly meetings this year on the third Tuesday of each month. Everyone interested in the breed should keep this date in mind and be present at the meetings.

The club decided to take over 50 or 60 head of Guernsey heifers which are being imported direct from the Island by State Guernsey Club. Every man present endorsed a note signed by the officers of the club securing the banks of the county for a loan to finance the purchase of these heifers. The banks participating in the loan are the First National Bank, of Tillamook, Tillamook County Bank, Nehalem Valley Bank, and Nestucca Valley Bank. The State Club has already authorized Mr. Lepatoirel, one of the leading breeders on the island to secure 300 open heifers for them. Clackamas, Clatsop, Tillamook and Washington Counties will take the major portion of these heifers, the local club in each one of these counties have guaranteed the purchase. Upon arrival in Portland these heifers will be distributed to the counties by lot, and then it is up to the county clubs to arrange for distribution of the cattle in the county. There should be no trouble in placing from 50 to 75 head of heifers in this county as a great many different dairymen have signified their preference for the breed and their desire to obtain some foundation stock. There is a scarcity of females in this county, and the demand is so great that American prices are very high.

Several local bulls will be consigned for sale at the time these heifers are distributed. The local banks have signified their willingness to back up the Juvenile Calf Club and the Guernsey Club went on record as favoring this work and will attempt to find pure bred calves for all the boys and girls who wish to take up calf club work.

The club also voted to appoint a committee to work with the County Agent and Farm Bureau in the live stock improvement project.

This was one of the most enthusiastic meetings which the club has ever held and I believe that the next year will see much greater activities among Guernsey breeders in this county than in the past.

R. C. Jones, County Agent.
