One \$1,000 thorough bred Jersey bull. All necessary farming implements. Creamery check last year over \$7,000.00. Three good dwelling houses on place and one large barn with double silo. Would cut up into three good ranches. School house on farm. 2 1/2 miles from Myrtle Point, a town of 1200 inhabitants with good grade schools. \$20,000.00 cash will handle. 6 per cent on balance.

Coos and Curry Land Co. Inc. Myrtle Point, Oregon.

Reformed Church.

During Holy week the true Christian will center his thoughts around the suffering Lord. He will have before him his crucified Savior, and will hear Him say, "This have I done for thee, what has thou done for me?" He will hear the organizing cry of Jesus: "My God, why hast thou forsaken me?" Then he will realize the greatness of his sins, repent and plead for mercy. Thus the Christian will be prepared for a visit to the open Easter tomb, and to appear as a worthy guest at the Easter Communion.

Good Friday services at 8 p.m. Subject: "It is Finished."

Easter services, Sunday School at 10 a.m. Morning worship at 11 a.m. Subject: "The Meaning of the resurrection"

Evening service at 8 p.m. Subject: "Peter and John at the Open Tomb"

After these services social gathering and reception for the new members.

Notice to Contractors.

Notice is hereby given that the County Court of Tillamook County will until 10 o'clock on April 10th, 1920, receive bids for the clearing and grubbing of the county road right of way from the Zaddach bridge to the North Fork of Nehalem river road at Camp 4, a distance of approximately 1 1/2 miles.

No bid will be considered unless accompanied by cash, bidders bond, or certified check for an amount equal to at least 5 per cent of the total amount of the bid.

Specifications may be seen at the office of the county clerk of Tillamook County, Oregon.

The right is reserved to reject any and all proposals, or to accept the proposal deemed best for Tillamook county.

First publication April 1, 1920. Last publication April 9, 1920. Homer J. Mason, County Clerk.

WHERE EAST AND WEST MEET

Young Chinese Girls in San Francisco Learning Language and Customs of the Country.

Young Chinese girls in San Francisco's Chinatown offer the most striking examples of the meeting of the East and West. Physically and mentally they show the two opposite influences under which they live, says the Christian Science Monitor. Their conversation is a curious mixture of English and Chinese. In their homes they speak Chinese, but by the time they reach fifteen or sixteen they know English better than their mother tongue.

Among the families who can afford to do so, the girls are sent to read and write their mother tongue, outside of school hours. For the fathers and the mothers have a wistful hope of returning some day to China, and it would never do if the children were instructed only in a foreign tongue.

The life of a Chinese girl is not altogether simple. In the poorer and more ignorant families the parents are often filled with superstition and prejudice against the education of women. In spite of the many obstacles, however, they usually manage to get in touch with some of the advantages offered in their quarters, being aided by social settlement workers of Chinatown.

REMINISCENT OF OTHER DAYS

Century-Old Building in Providence, Rhode Island, is a Survival of Napoleonic Era.

A recent incident in Providence, Rhode Island, calls attention to an old landmark reminiscent of Napoleon and his construction of the Madeleine in Paris. Napoleon's building set a little fashion in America, and several structures more or less like it were built in different cities. The Arcade building, in Providence, is the only one of them left.

Erected about 1820, it became an Ionic temple, that was also a center of retail trade, and its pillars remain today the largest monoliths in the country, except those which have been raised for the growing Cathedral of St. John the Divine, in New York. The record tells how they were cut by hand in the town of Johnston, and dragged to Providence on sleds, nearly a hundred years ago.

It tells also that the dedication of the building was a grand public affair, and that the temple was long held to be one of the architectural wonders of the United States. It is not of such commercial importance as it used to be, but one may be glad that the city has not lost such a reminder of the Napoleonic era.

Hops.

Hops are grown in a number of states. In the central and northern part of the state of New York many farmers make a specialty of their growth. The yield is from 700 to 800 pounds the acre in that state, but on the Pacific coast, where most of the hops consumed here are grown, the yield is between 1,000 and 2,000 pounds per acre. Oregon produces more hops than any other state in the Union. By far the greater part of the hops raised have been consumed in the breweries of the country, but they are also used in pharmaceutical preparations.

The present one-half of 1 per cent beer contains hops, but not in such large quantities as in beers of the larger alcoholic content. And then it is not likely that the kind of beer permitted under the prohibitory law will appeal largely to the drinkers of old-time beer. It seems certain that the demand for hops will fall off greatly.

Coal Gas as Automobile Fuel.

In the course of the world war many motor vehicles were operated in England with coal gas because of the scarcity of gasoline. The gas was contained in collapsible bags made of rubberized balloon fabric. At present, however, compressed gas in steel cylinders is being tried. It is stated that the gas is forced in to pressures as high as 2,250 pounds per square inch.

The cost of compression is stated to vary between 40 and 75 cents per 1,000 cubic feet of free gas, and the cost as fuel in the engine is equivalent to a cost of 12 cents per gallon on the liquid fuel replaced.—Scientific American.

Detested Cowardice.

Ceill is not particularly pugnacious, but he detested cowardice in any one, and, noting George's aversion to games in which he might get hurt, he determined to initiate him. The teacher caught him holding George down, and he was asked to explain.

"Well," he answered, "I dared George to fight, and he ran; so I'm holding him till I can argue some courage into him; then we are going to have a scrap."

What He Got for His Dollar.

"Ever answer any of those coal saving advertisements?" "Answered 'em all, I guess. But I only got one recipe that had any merit."

"What was that?" "It read: 'Coal may be made to last longer by keeping it away from the stoves and furnace.'—Boston Transcript.

Sure Thing.

"Till bet," said Mr. Growcher, "the government would have all the money it needs in a hundred years if the conscience fund could get hold of all that's coming to it."

See these two improved models Model 19—Republic INVINCIBLE 2-2 1/2 Tons

This sturdy, well balanced truck will handle a wide range of hauling. Its Continental Red Seal Motor develops 28.88 horse power at 1000 r.p.m. A late type, float-feed carburetor insures fuel economy. Constant speed oil governor holds truck to rated speed and delivers full power at all speeds. Four speed selective sliding gear transmission with center control operating in ball-in-socket joint gives extreme flexibility. Drive, two piece shaft, tapered at ends, with three universal joints and supported at center by self aligning bearing. Rear spring suspension constructed according to government design. Wheels are artillery type; wheelbase 144', optional 168'—Firestone pressed-on tires 36' x 4' front, 36' x 7' rear; Pneumatics, extra price.

Model 20—Republic DREADNAUGHT—3 1/2 Tons

Here is a truck built with ample strength and power for heaviest hauling. Red Seal Continental motor gives 32.40 horse power at 1000 r.p.m. Carburetor of late improved float-feed type is specially designed and adjusted for power and economy. Perfected oil governor absolutely controls speed and delivers maximum power at all speeds. Four speed transmission gives flexibility and adds power at low speeds. Two piece drive shaft, tapered at ends, with three universal joints and supported at center by self-aligning bearing insures smooth, even transmission of power. Rear spring suspension constructed according to government design. Heavy steel wheels of spoke type, equal to the severest service; wheelbase, 165 inches; Pressed-on Firestone tires 36' x 5' front, 36' x 5' dual rear; Pneumatics, extra price.

Both these models give extra value that is apparent to the experienced truck buyer—the minute he sees them they are the result of Republic's experience in building the more than 50,000 Republic Trucks now in use.

Every particle of Republic's vast resources and manufacturing facilities has been efficiently used to make these two improved models the best in the entire field of medium heavy haulage. They have been the center of attention at every truck show. Capacity ratings are extremely conservative as you will appreciate when you see these staunch, sturdy trucks. Arrange to see them now. Telephone us and our representative will call with full particulars.

GEORGE WILLIAMS.
