

How much should I give to make this a better world?

A CERTAIN man in New York filled out his income tax report.

It showed an income so large that his tax was 53%. And his total gifts to church and charity for the year were \$148.

Think of it—thousands spent for luxuries and pleasure for himself, and \$148 to leave the world a little better than he found it!

Most of us do better than that; but not so very much better.

Our average daily gift for all church causes is

- less than we spend for daily papers
- less than a local telephone call
- less than a third of the day's car fare
- less than 3 cents a day

No wonder that 80% of the ministers of America are paid less than \$20 a week. No wonder that the church hospitals turn away thousands of sick people a year. No wonder that China has only one doctor for every 400,000 people. No wonder that every church board and charity society is forever meeting deficits, forever passing the hat.

It isn't because we are selfish; it isn't because we don't want to help. It's just because no one has ever put up a great big program to us, and asked us to think of the work of the church in a systematic businesslike way.

The Interchurch World Movement represents the united program of thirty denominations. They have surveyed their whole task, no business could have done it better.

They have budgeted their needs; no business could have a more scientific budget. They have united to prevent the possibility of waste and duplication. At least a million dollars will be saved by the fact that thirty individual campaigns are joined in one united effort.

And they come to the men or women who love America—to you—this week asking you to use them as the channel through which a certain definite part of your income can be applied to make this a better world.

Only you can determine what part of your income that should be.

It's a good time right now to answer that question. We're passing through the world just once; how much better will the world be because you passed through?

United Financial Campaign

April 25th to May 2nd

The INTERCHURCH World Movement of North America

The publication of this advertisement is made possible through the cooperation of thirty denominations.

Facts!

You cannot deny them.

Motorists buy Zerolene because it is good lubricating oil; because it makes the car last longer.

More than half the motorists of the Pacific Coast states use Zerolene. Such approval is never an accident; it is given only as a reward to products of highest quality.

Use Zerolene for Correct Lubrication of your automobile, truck or tractor.

STANDARD OIL COMPANY (California)

A grade for each type of engine

H. C. BOONE, Special Agent, Standard Oil Co., Tillamook, Oregon.

BAYOCEAN SHEET METAL WORKS, TILLAMOOK, ORE.

YOU'VE SIMPLY GOT TO LISTEN to our invitation to pay us a visit. A hurry call for a plumber will always find us ready to answer it at once. And we advise you to make that call without delay the minute anything goes wrong with any part of your plumbing. Delay in such matters is not alone dangerous—it is expensive.

Bayocean Sheet Metal Works, 21st Street, Tillamook, Oregon.

REALLY A CHAMELEON CITY

Barcelona Presents an Odd Mixture of the Past and Present—Once Center of Commerce.

Barcelona is the chameleon city of Spain. In some quarters of the city the streets are narrower and more crooked than those of old London, while in others are avenues, boulevards, shops and cafes which vie with those of Paris. The city has an aristocracy which lives so far in the past that its scions still deplore the discovery of America, according to a bulletin of the National Geographic Society.

Until 1492 Barcelona was the New York of the Mediterranean. Columbus' voyage was considered a bit of impertinence on the part of the Castilian government to upset the balance of trade in favor of cities in western and southern Spain. As a result a movement swept the Catalan provinces, of which Barcelona is the center, for annexation to France. The revolt against Philip IV in 1640 resulting in the district giving itself over to French protection.

Catalonia's old allegiance, however, was renewed in 1922, four centuries later. The resentment, ameliorating enough to permit the placing of a statue of Christopher Columbus in the Rambla, Fifth Avenue of Barcelona. After the Spanish-American war mobs of Barcelona citizens stoned and egged the explorer's statue "as punishment for having ventured to find so troublesome a new world for Spain."

BELONG TO HOLIDAY SEASON

Christmas Festivities Would Not Be Complete Without the Holly and the Mistletoe.

Several thousand tons of holly as well as hundreds of tons of mistletoe are shipped over the railroads each year before the opening of the holiday season. The mistletoe is placed in small packages because it is easy to break off the tiny white berries, and the plant is more rare and costly.

Holly abounds all over the world, over 100 species having been determined, but only 14 varieties are to be found in the United States. The finest American species of holly is the Ilex Opaca, but the mountain holly is also a choice variety. The English holly has a sturdier leaf, and a more vivid and lustrous green. The wood of the holly is very hard and smooth in the grain, and is almost equal to boxwood for engraving purposes, while its leaves are the emblem of force, thought because of the protection given to the buds by the defensive thorns.

The holly, however, is not so highly prized for the Christmas season as the mistletoe, which is rare, delicate and beautiful and the source of many ancient Druidic legends. In the United States mistletoe is chiefly found in the southern states, while that used in England is chiefly produced in the orchards of Normandy. It is also the state flower of Oklahoma.

Orange Blossoms and Brides. Various theories have been given regarding the use of orange blossoms as bridal ornaments. The custom is supposed to have been brought to Europe by the Crusaders from the East, the Saracen brides being accustomed to wear orange wreaths at their marriage. To this objection was raised that although the orange tree was brought to England as early as 1290, it was long before there was any real cultivation of it even in greenhouses. A second theory is that orange blossoms came to be worn by brides on their marriage because they were not only scented but also were rare and costly, and so within the reach of only the noble and rich, that indicating the bride had to be of high rank. A third is that orange bridal wreaths had their origin in Spain, where oranges have been cultivated for centuries. Thence the fashion passed to France, and by means of French millinery was spread to other lands.

Fish Comfortable Under Ice. By the way, says a writer in the Kansas City Star, the water never gets colder than about 39 degrees, below the ice. So no matter how cold the day, and no matter how thick the ice upon the stream or lake, the fishes are enjoying a temperature of about 39 degrees, and they move about in the water and gather supplies very well at that temperature. Through the clear ice one may see fish with their backs against it, where the temperature must be 32 degrees, and if you strike the ice immediately above them with the back of an ax, or a sledge hammer, you will kill the fish. The concussion does the business and the fish will turn up its white belly against the ice. A dead fish floats with its belly upward, always. It is a common enough thing in some regions for boys to kill fish through the ice, and then to cut a hole and get them out.

Hysterical Somnolence. A youth of nineteen who since early childhood had been liable to drop off to sleep at any time and without any feeling of fatigue is described by Dr. H. Carlill in the Lancet (London). He was perfectly normal and Doctor Carlill became convinced that the attacks were hysterical and self-suggested; in other words that he hypnotized himself. They told him his attacks were due to a thickened spot on his skull, and cured him by cutting out a tiny piece of bone and letting him handle it.

Holstein Breeders Attention. I have for sale some of the very best bred heifers and bull calves in Tillamook. These calves are from world's record breeding, climated and health certified herds. The dairy man of Tillamook County who has a scrub bull in his herd can make no better investment at this time than seeing me at once and getting a registered bull now, for service in his herd next year.

Rollie W. Watson, Sec-Treas. Tillamook Co Holstein Breeders Assn.

IS OLDEST MILITARY BODY

Organization of Knights of Windsor, Still in Existence, Was Founded by King Edward III.

The Military Knights of Windsor is the oldest military body in the world, having been founded by Edward III from the veterans of Crecy and Poitiers, originally having had the prefix "Sir." They are now selected by the king from the old regular officers of the British army.

The Windsor knights are picturesque old gentlemen, their uniforms consisting of a scarlet coat with gold epaulets. Their somewhat expansive waists are lashed round with a crimson sash and they have a very dandy-looking cross-belt of white leather, on which is a breastplate embossed with the garter arms, the garter sword hanging from the belt. There is a bright crimson stripe on the outside of their trousers. Their hats are the most luxuriant creation of feathers, plumes and cockades.

The duties of these old warriors are not now very exacting. At one time they were bound to attend the chapel of St. George at Windsor twice a day. Their devotional duties were later reduced to their presence at divine service only once a week and on the birthdays of certain members of the royal family. The strength of the corps at the present time is only 18, which consists of 13 knights of the upper foundation and five in the lower.

GOT RID OF MALCONTENTS

Pilgrim Fathers Had a Highly Effective Way of Dealing With the Colony's Undesirables.

Deportation of "undesirables" is not an innovation in this country. The Pilgrim Fathers, confronted with the problem of dealing with malcontents among them, shipped the disgruntled ones overseas. Governor Bradford's story of the Plymouth colony shows how things were done in those days.

According to Bradford's story the "reds" in the Plymouth colony were represented by John Liford and John Oldham, who conspired together, both against the church and the government of the colony, endeavoring to entice others with them. Oldham refused duty when called upon by Captain Standish, whereupon it was determined to place Oldham and Liford on trial, all the members of the colony being present. They were convicted, the court ordering them expelled from the colony, both being deported ultimately.

Oldham came once again to the colony and created a serious breach of the peace, whereupon "they committed him till he was tamer, and then appointed a guard of musketeers which he was to pass through, and everyone was ordered to give him a thump on ye birch, with ye butt end of his musket and then was conveyed to ye waterside, where a boat was ready to carry him away. Then they bid him goe and mende his manners."

Eucalyptus Fuel. Eucalyptus trees planted on tropical mountain sides would produce fuel at the rate of 20 tons, dry weight (80 pounds to the cubic foot), per acre annually. This in perpetuity, the plantations when cut reproducing themselves without further expense.

Such is the declaration of a scientist who says that by this means the sun's heat in hot latitudes can be economically stored, the dry eucalypt timber being heavier than coal and possessing more heating power, bulk for bulk.

An acre of eucalypts in the tropics, he asserts, would produce the equivalent of at least twenty tons of coal per annum, the only requirements being powerful sunshine and heavy rainfall to insure rapid growth. So, with such a possible resource available, why worry about the threatened exhaustion of the coal mines?—Exchange.

Janitor Rang Class Gong.

New York university has just come into possession of an original photograph of the first janitor of that institution, equipped with the gong and stick with which he called the students to classes, says the New York Evening Sun.

When the university was founded, January 8, 1830, and students met in the original building back of the city hall, there was, of course, no electric bell ringing system. The responsibility of attendance at recitation was shunted onto the janitor.

Promptly on the hour he would proceed through the corridors armed with a huge metal gong in one hand and the gong stick in the other. Pausing outside the classrooms, he would beat his tattoo until the professor ceased his lecture and the students moved on to the next room on their program.

Friendship. The capacity for making friends, the ability to win others to us, to fasten them to our souls with hooks of steel, to surround ourselves with those who are loyal and true, is a wonderful power. Some possess it in a marvelous degree; they make friends without effort. But although comparatively few are thus gifted it is possible for every one to develop the power in greater or less degree.

"Only be admonished," as Emerson says, "not to strike leagues of friendship with cheap persons where no friendships can be. Our impatience betrays us into rash and foolish alliances."—Orison Swett Marden, in Chicago Daily News.

Announcement.

C. J. Edwards, of Tillamook, Oregon, solicits the support of the Republican voters of Washington, Yamhill, Lincoln, and Tillamook counties for joint senator. A resident of Yamhill county for thirty-four years, and the past six of Tillamook, together with having served in the house the past two sessions gives him a knowledge which has qualified him for the position of joint senator. Your vote is solicited May 21st.

KNOW NOTHING OF DYSPEPSIA

Eskimos Apparently Able to Digest Anything in the Form of Food, Without Cooking It.

There is at least one native race of America that is little troubled with dyspepsia. The Eskimo seems to defy all laws in this relation and to thrive. He eats until he is satisfied, and it takes much to satisfy him, if, indeed, he ever is satisfied. He eats as long as there is a shred of the feast before him. His capacity is limited only by the supply.

The Eskimo, it further appears, can make no mistake in the manner of cooking his food for the very simple reason that he does not cook it. Nor so far as the blubber or fat of the Arctic is concerned, he is worried about his manner of eating it. Indeed, he may be said not to eat it at all. He cuts it into long strips an inch wide and an inch thick and then lowers the strip down his throat as one might lower a rope into a well. Notwithstanding all this, the Eskimo does not suffer from indigestion. He can make a good meal of the flesh and skin of the walrus, provision so hard and gritty that in cutting up the animal the knife must be continually sharpened.

The teeth of a little Eskimo child will, it is said by those who know, meet in a bit of walrus skin as the teeth of one of our children would meet in the flesh of an apple, although the hide of the walrus is from half an inch to an inch in thickness and bears considerable resemblance to the hide of an elephant. The child of the Arctic will bite it and digest it and never know what dyspepsia means.

WELL ENDOWED BY NATURE

Mountain Goat Thoroughly Equipped for Life in High Altitudes Amid Snow and Rocks.

"The mountain goat is equally at home on rock, ice, snow or meadow, and it lives in bands of two to twenty," says Dr. William T. Hornaday, writing of "The Rocky Mountain Goat at Home," in Boys' Life. "Its big black hoofs have chisel edges for ice and a center of rubber cushion for slippery rock. In steep climbing the front of the hoof digs in like a garden trowel, and in going down steep places the rear dewclaws make wonderfully effective brakes. The heavy coat of fine and dense white wool is impervious to dry cold, but the wet and cold rains of New York winters quickly put mountain goats down and out. In the East they must be sheltered from all cold rains, or they contract pneumonia and die. Of dry cold they can endure any amount."

In the matter of food, we must say that the goat is herbivorous, and explain that it feeds on a great variety of mountain plants, according to season. On the summits they find very little real grass, but they find pulsatilla and other queer pasture plants that are literally "just as good." In the spring they feed on the wild onions that grow abundantly in their home pastures, which imparts to their flesh a strong onion flavor."

Memory System.

A middle-aged suburbanite overtaken on his Saturday afternoon stroll by a young married friend whom he knew was taking a memory-training course, inquired as to the progress made. "Doing fine!" was the reply. "Fill your pipe from my pouch and I'll tell you while we perambulate." But the last word was hardly uttered when he made a right-about-face and returned to the double on his tracks. In the evening the middle-aged man called to return the pouch. "Thanks," smiled the owner. "You'd wonder why I left you so abruptly. Law of association—worked beautifully. The word 'tobacco,' followed by 'perambulate' reminded me of something." "Important?" "Well—yes. Don't breathe a word to the wife. I'd left the perambulator outside the tobacconist's and the baby was in it!"—Manchester Guardian.

Facts About Corn Culture.

The tribes of North America saw the possibilities of corn and hastened its evolution. There has been cross-breeding by white farmers, yet, as a matter of fact, the corn culture of the present day is practically as it came from the hand of the Indian. He has adapted and modified it to various sections of the country by a process of careful selection.

Recently it occurred to some scientists that despite the drawback of the weather the Mandan Indians of the North were raising corn. An expedition made a study of the agricultural methods of the Mandans, and it developed that for centuries the farmers of the tribes had been developing a hardy corn. The seed had been selected from year to year from stalks which showed no effect from frost.

Was Here Before Columbus.

On a farm near Rosewell, N. M., is an irrigation ditch, or rather a raised irrigation ditch, which is one of the oldest evidences of man's inventive powers on this continent. It was built centuries before Columbus learned navigation. The walls of the canal are believed to have been made of sediment taken from a nearby spring, a claylike material that exposure to the air has made as hard as stone.

The making of two blades of grass to grow where but one grew before through irrigation is a very ancient practice. It was carried on crudely by the Egyptians at least as early as 4,000 B. C.—Popular Science Monthly.

To the Members of the Republican Party.

I am a candidate for the office of District Attorney for Tillamook County and will be glad to have your support at the coming primary election.

If I am nominated and elected I will perform the duties of the office to the best of my ability, and endeavor to serve all of the people by an efficient, just and equal enforcement of the law.

T. H. Goyno.

TILLAMOOK COUNTY BANK

CAPITAL AND SURPLUS,

\$50,000.

Member Federal Reserve System.

Back of YOU there is always a FEDERAL RESERVE BANK.

BACK of every member bank in the Federal Reserve System is the strength of the organized banking resources of the country.

By dealing with this bank which is a member of the Federal Reserve System, the system's facilities and resources are available to you—virtually just across the street—What is this worth to you in giving confidence as to the stability of your banking arrangements.
