Commencement Excercises

evening. June 4th.

The following program will be rendered:

Invocation, Rev. Oliver. Violin solo, Selected, Robert Driscol Address, "The Grip That Holds," Dr. V. P. Poling

Vocal solo, "The Nightingales of Lincoln's Inn," John Carroll Presentation of Diplomas, H. T. Botts. Chairman of Board Education. Girls' Glee Club (a) "Carmena" (b) Waltz Serenade, "Softly The Wind Sighs Tonight."

Benediction, Rev. Wriggle.

Cheese Takes a Tumble

Carl Haberlach reports having received the following telegram from Wisconsin this week:

"Daisies twenty three half, Twins twenty two three quarters, Horns Men Wanted-Tillamook Lumber Co. twenty four quarter."

In order to keep Wisconsin from taking all our markets, it was found For Sale: Hamilton piano. \$150 cash. necessary to place the Tillamook triplets price at 28c Tillamook, and Longhorns and Y. A.'s at 29c Tillamook.

It is hoped that the Wisconsin market has reached bottom for the season, as otherwise our prices will have to go down further. The price now asked by Wisconsin makers cannot show the dairymen a profit. They sell considerable cheese at auction each week, and when offerings are heavy and demand light, prices decline fast. It seems to Tillamook dairymen that Wisconsin cheese makers, producing about seventy per cent of the cheese in the United States, should get together, as they would have absolute control of the cheese market. The cheese market and all dairy markets in fact, should be put on a cost of production, plus For Sale: New Ford truck, bed and reasonable profit, basis.

O. E. S. Kensington Club.

The club met at the club rooms on the regular day.

There was the largest attendance present in months, five new members signing the roll for the remainder of the year. On account of the absence Wanted— Employment by the month on dairy ranch. Call Mrs. Schultz Some seashore locations are almost, if of both President and Vice-president, the Secretary, Mrs. Bales, called the meeting to order.

The 23rd Psalm was repeated by all present and the regular routine of business transacted.

Mrs. O. M. Cook favored the club ith vocal music, with Mrs. Tucker bring you "Vaughn" Best drag saw with vocal music, with Mrs. Tucker as pianist.

The hostesses, Mrs. Botts and Mrs. Bales, served a dainty luncheon quite typicial of "rare June days." Buttercups were scattered in profusion on the table cover with a huge basket full gracing the center. Place cards carried out the same dainty

Guests for the afternoon were as follows: Mesdames B. C. Lamb, Merriel Smith, Ira Smith, Erwin Harrison and Schnal, also the Misses Imus and McNair.

The meeting to be entertained in July with the Misses O. M. and H. F. Cook as the hostesses.

Gasoline Situation Very Acute.

Messrs F R Reals C I Edwards and R. B. Miller were appointed, at a public meeting, as a committee to go to Portland and investigate the gas situation.

of the Shell Co. and Messrs Balsley and Donaldson of the Standard Oil Co. we are obliged to report that the shortage of gas on the Pacific Coast is so acute as to warrant the statement that for the next ten weeks there will be a approximately fifty per cent of the normal requirements for California and Washington and slightly less for Oregon. This difference against Oregon being due to the fact that there is no reserve supply in Oregon due to our special gravity

To Trade: Merry-go-round for touring car. No junk. Box 397. in Oregon due to our special gravity

This will necessitate a curtailment of gasoline use to actual necessities that the essential industries may continue to operate.

During this ten weeks of limited supply the use of gas for pleasure driving must be very limited if not entirely eliminated.

The shortage is a positive fact, all reports to the contrary notwithstanding and is a condition that we must adjust ourselves to.

State Fire Marshal and

J. W. Stephens Coming Thos Coates is in receipt of the

following letter from A. C. Barber, the State Fire Marshal:

A. C. Bosmon. tions. Sunlight has been found to be one of the best cures for torpid wounds, gangrene, frostbite and other similar lesions. It is not the heat in the rays that is beneficial, but the blue and violet rays, and they are strongly bactericidal. But the sunlight is not merely bactericidal; it is a powerful stimulant to every act of animal life, particularly the oxidation which gives the blood its power to eliminate

Cloth From the Pineapple.

The pineapple, naturally, gets its chief notoriety from its excellent fruit, but there is another use widely known in the Philippine islands and other torrid lands. The same species, or perhaps a near ally, can be so grown as to produce leaves eight feet long and containing a fiber of such strength these countries.

But no machine has yet been found by which the fibers can be cheaply extracted. The outer skin is remarkably tough and a force strong enough to crush it spoils the fiber, so it has to be peeled off with a knife and the

fibers pulled out by hand. This is a long process, and, however cheap labor is, the fiber is still for making cloth, because of its silky pine Islands often bring back, as a souvenir, a piece of this "pina cloth." so greatly prized by the Filipinos.

First Use of Word "Jingo."

Jingo was coined in the Russo-Turkish war. The apprehension in England over the outcome of that struggle found vent in the patriotic song whose refrain was:

"We don't want to fight: but by jingo, if we do, we've got the men; we've got the ships; we've got the money, too!"

The song became popular, was heard on every street corner and from every organ grinder, and was whistled by every bootblack. Shortly after this the election campaign began, in which Gladstone, the head of the Liberals, attacked the Tory party, then led by the Earl of Beaconsfield. The Tory foreign policy was ridiculed by the Liberals as "bloodshed, glory and jingle." Since that time the word jingo has been used to designate an individual or section of a party prome to rush, without mature consideration, into the

Anciente Used Slang.

horrors of war.

An ancient use of a modern slang idion, was mentioned by T. E. Peet, the lecturer in Egyptology at Manches-ter university, according to the Man-chester Guardian. He said that the Egyptians always used the verb "to do" in referring to a visit to a country just as an American today speaks "doing" Parts or London, After this it will not surprise us to learn that Hannibal considered his expeditions as nothing more than "stunts" or that the Roman populace was rather annoyed when Julius Caesar was "done in."

HAD BATTLE IN OPEN GRAVE VERA CRUZ WORTH VISITING

Mexican City Has a Number of Attractions That Invite the Wandering Tourist.

Vera Cruz is a city of contrasts. Its rividly painted houses of red, blue and vellow, built close to the narrow streets, have grated windows and heavy, forbidding doors, which give little evidence of the charming interiors with their patios, palm-shaded. filled with exotic flowers and cooled

by fountains. Modern street cars look out of place in the same streets with burros laden with merchandise, fruits and vegetables, and caballeros in their broad sombreros, vividly colored blankets, with a reputation. 'This 'sport' enormous spurs and silver-mounted thought the opportunity to see a fight saddles. Even the tropical climate is good to be lost, and the majority in sharp contrast with the snowcapped, extinct volcano, Orizaba, which towers almost 20,000 feet into the cold ed, 'I'm sure Dick won't mind waiting air above. Although this peak is neara bit. Indade, it's himself would like ly fifty miles away from the city, it to be standing up to see the fun, God can be plainly seen from there and makes a beautiful picture standing white against the sky or catching all

Another point of interest is the ancient fortress of San Juan d'Ullon, of the battle. Both animals had their which is built on an island, connected to the mainiand at the northern end made by the crowd as it surged around by a long sea wall. It has a fair exthe grave. The contest was short, terior, being painted a pure and radi-For Sale: 30 head of well bred Ang- sharp and decisive, the cat 'going un- ant white, but hidden beneath this innocent mantle are dark and noisome dungeons where many political prisoners of Mexico have been kept for

Turning hastily from this unpleasant scene, gentle reader, let us retrace our steps to the center of the city, which is marked by the plaza. This is a large and beautiful square filled with palms and flowers, and watched over benignly by the ancient and stately cathedral. Every evening during the band concert it is the quaint custom of the youths of Vera Cruz to promenade around the square on the outside of the walk in one direction, while the young girls, carefully watched over by their duennas, walk in the opposite direction on the inside, In this way most Mexican flirtations are

KNOW ALL ABOUT WEATHER

Animals, in the Construction of Their Houses, Show They Can Foretell the Seasons.

The weather man has co-partners in the prediction of a bad season in the wild animals who qualify as weather prophets for the experienced

"Trappers believe firmly in the ability of wild animals to forecast weathconditions," says the Hunter-Trader-Trapper, published in Columbus, O.

"The type of house which the muskrat builds for the season indicates the kind of weather he expects. When the muskrats build large houses, with thicker walls, a cold winter is to be expected. If the houses are made unusually high, much snow and high water will come

"Just before a storm, all animals are unusually active and travel fast and far. Even human beings notice a difference in their feelings just before a storm, especially if they are troubled with rheumatism or other ailments of a like nature.

"It is reasonable that nature has with what we have to offer at the and beauty that its cultivation has provided animals with a sixth sense long formed an important industry in for forecasting weather conditions which mean so much to them."

Desert Compensations.

For all the toll the desert takes of a man it gives compensations, deep breaths, deep sleep, and the communion of the stars. It comes upon one with new force in the pauses of the night that the Chaldeans were a desert-bred people. It is hard to esexpensive. But it is greatly prized cape the sense of mystery as the stars move in the wide, clear heavens to luster. Europeans visiting the Philip- risings and settings unobscured. They look large and near and palpitant, as if they moved on some stately service, not needful to declare. Wheeling to their appointed stations in the sky, they make the poor world-fret of no account. Of no account you who He out there watching, nor the lean coyote that stands off in the scrub from you and howls and howls,-Mary Austin, in "The Land of Little Rain."

Not a Stickup. While motoring in Tennessee on a lonely road one night we were being followed in a machine containing five colored men. They kept uncomfortably near us, and after a few miles we motioned them to pass, hoping they would speed along, as we feared a possible holdup. Instead of continuing on, they stopped directly in front of us, and when one big black fellow asked us to stop our hearts were almost at a standstill. However, we breathed easier when he said: "Will you-all be so kind as to let us have a little gas? We sho' can't make it to town, fo' we am about out."-Exchange.

American Pearls There is a species of green or iridescent pearl found occasionally in the abalones, or ear shells, of the California coast. Black and gray pearls are found in Lower California waters; white, pink, brown and other colored pearls in some of the fresh water brooks of Ohlo, Tennessee, Texas, Kentucky, and Wisconsin; purple and black pearls are sometimes found in the shells of the common clam of Long Island sound and the Atlantic coast. The principal pearl fisheries of the world are Ceylon, the Persian guif. western Australia, Torres straits and the Sulu archipelago.

KURDS A PRE-ARYAN RACES QUAINT OLD NORWEGIAN CITY

Fierce Warriors Have Been Distin

guished for Their Turbulence

Since Days of Xenophon.

Perhaps the most interesting thing about the Kurds is that at least one ethnologist has said of them that they might easily be taken for Germans in color of hair, skin and eyes. They are one of the races which have provided plenty of speculation, and they have been classed as of the Caucasian type, though one authority has described them as representing probably the aboriginal race, pre-Ayran, which extended once over the whole of Armenia, Luristan and Kurdistan. It seems pretty certain that they are descendants of those Carduchi whom Xenophon mentions as harassing the retreat of the Ten Thousand, and they still use the caves he mentions for their winter quarters. Whatever their race, there is no doubt about their turbulence. They have the air of fierce warriors, and they live up to their appearance, having given end-

less trouble to the Persians at one time or another. But they have a reputation for honor as well as courage, and, just as the Romanoffs chose their personal guards from among the flerce Cossacks, so the Persian shahs have been accustomed to confide themselves more willingly to Kurdish officers. At one time or another the Kurds have been the scourge of Armenia, and have committed some terrible excesses

NOT ALWAYS A DANGER SIGN

there in their forays.

Mistaken Idea that Spitting Blood Invariably Denotes the Presence of Tuberculosis.

There is no need to become alarmed if one spits blood. It is not, as so many think, a sure sign of consumption, for the overwhelming majority of tuberculosis patients never have this symptom, and the blood may come from the larynx, pharynx, teeth, stomach or even the small intestine.

Dr. H. Rabinowitsch of New York points out in the Medical Journal that when we consider the great size of the arteries that enter the lung and their minute ramification on the surface of the delicate air cells we should not wonder if blood is sometimes coughed up from the lungs. Severe coughing or straining may easily break a small branch of one of these arteries.

Dr. Rabinowitsch says the hemorrhage itself is of slight moment. If it tient obey the doctor's orders.

The treatment is directed to cause and not to the hemorrhage.

Elf Arrews Elf arrow is a name given to a triangular piece of flint, formerly used as an arrowhead by early inhabitants of Great Britain and Europe generally. It was once believed that these barbs of flint were shot by elves or invisible beings at cattle or men to bewifch them, hence the name. Cattle dying suddenly in the fields were said to have been struck by an elf arrow; and this superstition still lingers in Ireland at the present day. Elf arrows set in silver, were frequently worn as talismans, and were considered most efficacious as preventives against polson and witchcraft. They are also called elf bolts, elf darts, elf shot and elf stones.

Mocking Bird Is a Fighter. have ever seen drive away a cat; he chick. will peck and dart about so fast and bewilderingly that the cat becomes her assailant is a mere bird, but hur- when the young are able to fly strongries off in a panic to escape such a dan- ly. Two or three months later the gerous foe. He even distrusts the birds are found skirting the edge of clumsy old turkey bussard, who has the antarctic continent, 11,000 miles lighted down in the yard to investi- away. What their track is over that gate the garbage can to see if by any chance the cover has been left off, and the buzzard, like the cat, never tries to defend itself, but sidesteps and dodges and finally flees from its small enemy-never seeming to think that one sweep of its big wing would grind it to dust .- Exchange.

Land Worse Than Worthlobs The desert of Gobi is central Asfa, where bone-dryness life been the fashion for thousands of years, is also difficult place to obtain a drink, Its largest streams either vanish th Caravan routes from China to Russia are still important trade channels, for the Russians insist that a sea voyage destroys the flavor of tea. This great arid waste is 1,800 miles wide and 100 miles deep and the almost rainless sands to the dryness that drifts lowed. in gyrating sand waves and snuffs out regetation with its hot breah.

Many Neglect Their Heira

One who is at all curious in such matters cannot fall to be amazed at the inconsequent fashion in which men transmit the money that has represented the work and savings of their lives. Death, like birth, is an inevitable fact in human experience; yet the average man lives as though he were to be the one exception to the common rule and might confidently expect to live forever. In nine cases out of ten he does not take even the rudimentary precaution of making a will. - Cultier's

Bergen Known for Many Things Besides its Proverbial Wetness Was Home of Ole Bull.

The old Norwegian port of Bergen is known as the rainy city. "Always carry an umbrella in Bergen," is the rule widely followed both by inhabitants and strangers. That the umbrella is an accepted part of the Bergen costume is shown by the extravagant old saying that a man once walked in the streets of Bergen without an umbrella, at which sight the horses were so frightened that they reared and shied and even ran away. In spite of its reputation. Bergen has many beautiful sunny days, when the only reason for wearing an umbrella would be to conform to custom.

Whatever the atmospheric condi tions, the fish market of Bergen is the most crowded and noisy place in town. Fishwives are excitedly trying to sell their flopping, wriggling wares to undecided customers, while other buyers and venders grow heated over the

price of herring or trout. Away from this fascinating scene of confusion, in a quiet little park, is another significant phase of Bergen's interests. Here is a statute of Ole Bull, Norway's great violinist. Ole Bull was born in Bergen, and he now lies in its graveyard. The city's tribute to this genius is this statue of him, standing, as his fellow citizens had so often seen him stand before them, with his violin ready to play, but listening first to the rain and the birds and the talk of men that he might convert them into the language of the violin. This simple statue embodies more truly the spirit of Bergen than its scrambling, money hoarding markets, or its flippant attitude toward the weather probabilities. THE TRUE OF THE PERSON

HAVE THEIR OWN LANGUAGE

No Doubt at All That Birds and Beasts Hold Communication With Each Other.

trays more ignorance of the life around us than any other ever invented by our race, for, though no species save man has an articulate language, no one who has watched and attended to the ways of birds and beasts can doubt that they very thoroughly manage to convey to each other their wishes and intentions. Each, in its own way, communicates with its fellows, and if the language is not our language it at any comes from an aneurism, death is al- rate serves their purpose exceedingly most instantaneous; if it comes from well. Certainly the amount of individa congested area and is limited, it is uality that there is among the different in some ways beneficial by relieving specimens of the same species can only the congested area. It has another be realised by those who have had the congested area. It has another be realised by those who have had bough, as birds do now. Its eye was good effect—making a recalcitrant pamuch to do with wild creatures. No fitted with a sort of armor shield, as one mammal or bird is ever in char-acter and behavior the exact duplicate strong teeth. of the next; each differs in some way from its neighbor, so you can never depend on any two animals doing exactly the same thing under the same circumstances-in fact, we find that individuality reigns as supreme throughout Nature as It does throughout man, but then, after all, man is

Aretic Terns Love the Cold. For a long time it was thought that the golden plover bore off the palm for length of flight between summer and winter homes, but now that distinction s awarded to the arctic tern. This bird breeds as far north as it can find anything stable on which to construct its nest; it has been found with in seven and a half degrees of the pole. And that nest was found surrounded by a wall of newly fallen snow which the mother bird had care-The mocking bird is the only bird I fully scooped out from round her

National Review (England.)

The tern arrives in the far north about June 15, and leaves again for confused, and seems not to realize that the south toward the end of August, vast space no one yet knows.

> Mouse Fights Snakes. Everyone has heard of the remarkable combats of the Indian mongoose with venomous makes, in which little rikkitikki-tavvi comes off victor. The fact that the mongoose invariably survives has led to the suggestion that it is immune to snake poison. Other unimals said to be immune are

the pig and the hedgehog.

The experiments of a British naturaffet show that an animal of the
dormouse family must be added to the the sand or empty into salty lakes. Hist of immune. This animal is known as the lerot and is said to fight flercewith vipers. Large doses of viper's poison were injected into one lerot, from which injection no ill effects followed. On one occasion a lerot was badly bitten in the eye by years since antiquity have parched its a viper and no signs of poisoning fol-

A Gentleman.

A gentleman is full of consideration for others, a fee to violence of opinion or expression; an enemy at the same time of restraint, suspicion. gloom or resentment. He is merciful. gentle and tender; avolds unseasonable allusions or topics; never makes himself prominent in conversation, and suppresses his own egotism. He makes light of the favors which he does and sems to receive while he confers. He ecrupulous in imputing motives, is never mean or little, never takes unfair advantage and never mistakes ities or abuse for argument,-

MOST FAMOUS OF PALACES

Building Constructed by Brunelleschi for Count Pittl Is the Glery of Florence, Italy.

No country is richer in beautiful palaces than Italy. In most instances these have now become the property of the nation, so that the taxpayer is indirectly responsible for the general good while preserving their dignity and safeguarding their treasures. Throughout Italy, from Turin to Palermo, these monuments to the genius of the Middle ages are to be found, but perhaps none is so famous as the Pitti palace at Florence, built upon a hill above the Arno with the beautiful Boboli gardens stretching behind it. Count Pittl, chief magistrate of Florence in the fifteenth century, desiring to outrival Cosimo de' Medici, set himself to build a palace which should be the wonder of Italy. He employed the architect Brunelleschi, whom Cosimo when building his own palace had passed over because of his magnificent disregard for expenditure, and Brunelleschi was given a free hand. Pitti, however, fell into disgrace for plotting against the son of Cosimo and no workman could be found to continue his half-completed palace. Thus for a century it was to remain. until Eleanor of Toledo once more took it in hand and it became-oh. strange irony !-- the home of the Medicean grand dukes. The Pitti was not actually finished until 1839. The sightseer is aware as he wanders through this vast building today, and gazes at its walls lined with five hundred pictures, most of them masterpieces, that he is rather in a royal palace than a picture gallery, and he doubts not the truth of Macchiavelli's verdict, that the Pitti palace "is greater and more splendid than the house of any other private citizen whatsoever."

FIRST OF FEATHERED THINGS

Archaeopteryx Must Have Been a Remarkable Looking Bird From Accounts of Its Appearance.

That phrase, "dumb animals," be Today the birds are all quite different than they were years ago. The first bird that was ever seen on earth was called the Archaeopteryx, which is a Greek word, meaning "ancient wing." It was a very odd bird. It had a long, thick tail, with bows of flesh and with feathers growing from it. It was not like a bird's tall is now, but more like a lizard's tail. It had two legs, with which it could walk and perch in the trees. It also had two other limbs like hands, which it probably used to climb about the

such a bird should pass away. Even in these days two or three strange birds have died out. Men have killed many birds and animals, but in making the world what it now is, nature has killed far more. a part of Nature.-Frances Pitt in the Whole races of animals have been de-

stroyed by earthquakes and floods.

In time nature changes all things.

Of course there is no such bird as

this now, and it is not surprising that

and so she did the birds.

Longest of All the Arts. Let it be remembered that though all arts are long, the art of playwriting is the longest. And after years given to the study and practice of it you will find-precisely as in acting, writing, painting, sculpture, music, only more so-that it is never to be fully mastered. Every time you attempt a drama you learn something more about how to do it; and something more—wholesome lesson for vanity!-about your own ignorance and limitation. "I have played Hamlet now for 50 years," exclaimed the famous old actor Betterton when somebody told him his performance of that part was perfect, "and I believe I have not got to the depths of all its philosophy yet." I began playwriting when I was a child. I have been at it now for not less than 55 years, and I know I have nowhere near got to the depths of all the philosophy of it yet-and, what is more, that I never shall do so. -David Belasce in the Saturday Eve-

Had Darnums in These Days.
The love of monatrosities, which are usually mere freaks of nature, is still common; but it would appear to have been more popular in the good old times. In the year 1742 crowds frequented the Mitrs, Charing Cross, London, to view "the largest Thames monster, or miraculous man-eater, that was ever in the world. As a boy was washing his mop this surprising monster caught hold of it in his mouth, and had very like pull the boy into the river, but he calling out for help. several men came to his assistance. with great difficulty dragged this monster out, and he lived four hours after
