

Equip Your Smaller Car With Goodyear Tires

If you own a Ford, Chevrolet, Dort, Maxwell or any other car using 30x3, 30x3 1/2, or 31x4-inch tires, you can well take advantage of the high relative value built into all Goodyear Tires.

You can well do so because you can secure in the smaller Goodyear Tires the results of such skill and care as have made Goodyear Tires the preferred equipment on the highest priced automobiles of the day.

You can well do so because these smaller Goodyear Tires are easy to obtain, being produced at the rate of approximately 20,000 a day, and because their first cost usually is as low or lower than that of other tires in the same types and sizes.

Go to the nearest Goodyear Service Station Dealer for these tires, and for Goodyear Heavy Tourist Tubes. He supplies many other local owners of the smaller cars.

30x3 1/2 Goodyear Double-Cure Fabric, All-Weather Tread \$23.50
30x3 1/2 Goodyear Single-Cure Fabric, Anti-Skid Tread \$21.50

Goodyear Heavy Tourist Tubes are thick, strong tubes that reinforce casings properly. Why risk a good casing with a cheap tube? Goodyear Heavy Tourist Tubes cost little more than tubes of less merit. 30x3 1/2 size in waterproof bag \$4.50

Goodyear Service Station for Tillamook City is at the STAR GARAGE

TIRES, TUBES AND ASSESSORIES.

We Give Goodyear Service.

C. F. PANKOW, Proprietor.

Coaxing You to Smile.

Their Good-Night Message.
One of our loyal citizens tells this story, and he says it happened at a very prominent home: It occurred in the evening. I and several others were calling. As we chatted in the parlor we heard the patter of little feet at the head of the stairs above. The mother of this particular home raised her hand for silence. "Hush! The children are going to deliver their good night message," she said softly. "It always gives me a feeling of reverence to hear them. They are so much nearer the Creator than we are, and they speak the love that is in their hearts never so fully as when the dark has come. Listen." Then there was a moment of tense silence. Then, "Mamma," came the message from above, "Willie found a bedbug!"

He Was Boss There
Not long ago, the story runs, a traveling salesman visited a certain small town and sold the proprietor of its general store an order of jewelry. When the jewelry arrived it was not as represented, and the merchant consequently returned it. But the wholesale house nevertheless attempted to collect the bill, and drew a sight draft on the merchant through the local bank, which returned the draft unhonored. The wholesaler then wrote to the postmaster about the financial standing of the merchant and the postmaster replied laconically that it was O. K.

By return mail the wholesaler requested him to collect the account and the received the following reply: "The undersigned is the merchant on whom you attempted to palm off your worthless goods. The undersigned is president and owner of the bank to which you sent your sight draft. The undersigned is the postmaster to whom you wrote, and the undersigned is the lawyer whose services you sought to obtain for your nefarious business. If the undersigned were not also the pastor of the church at this place he would tell you to go to hell."

An Eye to Business
In a certain Sunday School on a Sunday afternoon one of the teachers

placed upon a form while the usual restoratives were applied. Suddenly a little girl stood up and persistently called, "Teacher! teacher!" in order to attract the attention of one of those who were attending to the unfortunate invalid.

At last the little one was heard, and the teacher, turning round, asked, in a somewhat hasty manner: "Well, what is it?" "Please, teacher," replied the child "my father makes coffins."

On the Jump
"I reckon you had a right lively time in Kansas City?" insinuated an acquaintance. "Tollable," replied Gabe Gossnell of Grudge, "but nothing like what I probably would have had if I wasn't considerably lively on my feet. You see, up in Kay See, if you meet a respectable looking man after 4 o'clock in the afternoon, anywhere the least bit off to one side, he's a hold-up and robs you."

"And if you meet one that don't look respectable, he's a plain clothes policeman, and pounds you because he thinks you're a hold-up. So I was practically on the keen jump all the time I was there, dodging one or the other."

Right on the Job
When mother and her brood started for town the weather was threatening, so she did not go unprepared. In due time they stepped off the crowded train at the station. "Have you got all the umbrellas, Johnny?" was her first question. "I should say I had, said the boy. "I had three when I started and now I've got five."

There was a fine young clerk at the boarding house table, who was always trying to show off. He seldom asked in the usual way to have a thing passed to him but had to get something smart. One day when he wanted the milk he sang out, "Drive the cow down this way." The landlady, who sat at the head of the table called the maid, saying as she handed her the pitcher: "Here, Mary, lead the cow down to where the calf is bawling."

Now we'll just see how serious this alleged labor shortage is. A Stockton (Kan.) jeweler advertises for a sales-

What has become of the old-fashioned Democrat who used to blame the high cost of sugar, beans and boots on "the robber tariff?"

Very likely the Democratic standard bearer will not say this year that a Democratic platform is just just sugar to catch flies, because he will not even dare mention sugar.

The Sultan threatens to resign in protest against the terms of the peace treaty. When the Sultan has resigned everybody else will be.

Maybe it didn't take twice as long to move a freight car a mile as it did before the railways were McAdooed the car shortage wouldn't seem so acute.

The CHENEY

The Master Touch

The Cheney Orchestral Chamber

An acoustic principle of the resonating chambers of the pipe organ adapted to the reproduction of music in The Cheney.

Vibrant, imparting richness and quality to tones. The Cheney Orchestral Chamber responds to and develops every range of pitch. Tones are held under perfect control and in perfect balance. Protected by basic patents.

THE virtuosos finds beauties in a score of music overlooked by those with lesser talent. Under his hand every note is played perfectly—kept in proper relation to the whole.

The Cheney reproduces his music with equal skill. In a series of Orchestral Chambers, high, medium and low tones are developed in volume, sweetened in quality, and given back to the world just as they were played. It is the highest achievement in the art of musical reproduction, and the period cabinets rival in beauty the masterpiece of the most expert craftsmen in furniture creation.

CHENEY TALKING MACHINE COMPANY

THE SONG SHOP, Local Agent, Tillamook, Oregon.

PARTS OF LOST CONTINENT?

Reasons for Believing That South Sea Islands Were at One Time Joined Together.

I have been reading a book on the South seas which says that there are reasons to suppose that in some instances the numerous islands in the South seas were at one time parts of continents. What reasons are there for such a supposition? asks a correspondent.

The only reasons that we are familiar with are the character of the inhabitants of the islands and their language. It is reasoned that these islands bear marks of very early habitation by man. Navigation was in its infancy, as only long boats, propelled by oars, were known, and they would not be safe for voyages over rough seas to search for unknown lands. This fact and the resemblance of some of the South sea islands to our race lends reasonableness to the supposition that these places were inhabited while they were still a part of the mainland which in some subsequent age sank in places below the surface of the seas. Such a supposition is, moreover, strengthened by discoveries from time to time of ocean levels that seem to have been at one time islands or parts of continents. These discoveries have been made in different parts of the several oceans. It is not so long ago that a vast submarine bank was located by Capt. J. K. Davis of Doctor Mawson's Antarctic ship Aurora, during an oceanographic cruise. Captain Davis reported that for about 100 miles south of Tasmania the ocean bottom deepens to 12,488 feet; it then rises again to the crest of a ridge 150 miles long by about 100 miles wide, standing over 11,000 feet above the general level of the neighboring sea floor. It has been concluded that this ridge was without doubt a fragment of a lost continent.

WESLEY READ ON HORSEBACK

And Many Noted Writers Took Their Walks While Engaged in the Perusal of a Book.

Reading on horseback—one of the rarer accomplishments of man, according to Mr. Fisher—was sedulously practiced by John Wesley. "History, poetry and philosophy," Wesley relates, the Manchester Guardian recalls, "I commonly read on horseback, having other employment at other times."

Wesley maintained that this practice made for safety on long country rides. "I asked myself, How is it no horse stumbles when I am reading? No account can possibly be given but this: Because I throw the reins on his neck. I then set myself to observe, and I aver that in riding about 100,000 miles I never remember my horse (except two that would fall over heels anyway) to fall or make a considerable stumble while I rode with a slack rein."

Shelley used to read when out walking and frequently collided with other walkers because his eyes were fixed on a book.

Macaulay was also a pedestrian reader; so was Southey, who gives a long list of books read while taking his evening walk. These range from "a batch of volumes relating to the events of the last ten years in Spain" to "the Nibelungen in its original old German."

Rich Undeveloped Region.

The Amazon valley is said to be the greatest undeveloped region in the world today; on every side there are natural resources of immense value, with commercial possibilities, which are as yet untouched. The soil is said to be extraordinarily fertile. The forests offer woods in inexhaustible variety, many of them cabinet woods of rare value. Of vegetable oil nuts, a tenth part only is known to the outside world. Resins, gums, spices, medicinal plants, fibers, abound in infinite variety. Kapok grows along the banks of most of the main rivers, but not a pound of it is exported to the United States, although America imported 7,000,000 pounds last year from far-away Java. There are mineralized areas said to contain coal, iron, gold, silver and precious metals of many kinds. They have not yet been prospected.

Relish of the Right.

Whoever has so far found d his taste to be able to feel—and relish the beauties of the old masters has gone a great way in his study; for merely from a consciousness of this relish of the right, the mind is almost as powerfully affected as if it had itself produced what it admires. Our hearts, frequently warmed in this manner by the contact of those whom we wish to resemble, will undoubtedly catch something of their way of thinking; and we shall receive into our own bosoms some radiation at least of their fire and splendor. That disposition which is so strong in children still continues with us, of catching involuntarily the general air and manner of those with whom we are most conversant.—Sir Joshua Reynolds.

Inexplicable.

"I can't make out what's the matter with John," complained the newly wedded wife of the new civilian. "What's he been doing?" inquired her neighbor. "He's broken twenty-seven pieces of our best china trying to fasten two plates together with his fork."—The Home Sector.

Nazaren Church Services

10 a. m., Sunday school, conducted by Wm. Fletcher.

11 a. m., preaching by the pastor, Rev. A. F. Ingler, subject: "The Two Sauls, their failures and successes."

7 p. m., Peoples meeting, led by Jay Honey. All welcome.

8 p. m., evening sermon and special solos.

Mid-week service on Thursday at 7:30 p. m., for Bible reading, song, prayer and testimony.

HUMMING BIRDS HAD "SPREE"

Writer Tells of Debauch of Which He Was Witness While Traveling in South America.

When Mr. Leo E. Miller was collecting specimens in the mountains of Colombia for the American Museum of Natural History he observed a curious incident that he describes in his book, "In the Wilds of South America."

As he was working one morning a chorus of chirps and screams attracted his attention, and he followed the sounds, which led him to a tall tree. A number of California woodpeckers had drilled holes in the tree trunk, from which an intoxicating sap trickled in small streams, and a dozen or more buff-tailed humming birds apparently had come for a "jag."

Arriving in a bee line, the newcomers flew against the trunk and clung there like so many moths to drink the sap. Their antics as they reached the different stages of intoxication were most amusing. Some twittered, fought, turned and tumbled in the air, while others dozed on small twigs or fluttered exhausted toward the ground. The performance continued daily for a week; then the sap suddenly ceased to flow, and the tree was deserted and silent. The capricious band no doubt sobered up from its debauch and went back to its normal and more profitable pursuits in life.

BLOWPIPE SIMPLE IN ACTION

Tool of Immense Power Simply the Application of Elementary Scientific Principles.

An oxy-acetylene or oxy-hydrogen blowpipe is composed of a very light conical tube, slender and slightly curved at the end whence the flame issues, and provided at the other extremity with two nozzles, to which the indiarubber tubes from the oxygen and acetylene or oxygen and hydrogen cylinders are attached.

The principal point about the most up-to-date apparatus lies in the fact that the two gases, instead of being separated up to the very point of ignition, are thoroughly mixed in the interior of the blowpipe, in such proportion as to bring about complete combustion. All danger of explosion has been avoided by giving to the gas a speed of delivery greater than that of the propagation of the flame, in accordance with a scientific law laid down by a French official commission which inquired into the subject of fire-damp.

As an additional precaution against accidents, an appliance called a "safety-mixer" has been inserted at the junction of the oxygen and hydrogen pipes, the mixture then passing to the blowpipe by way of a single tube, which greatly facilitates the handling of the tool.—From "Cutting Ships in Half" in the Wide World Magazine.

New Hebrides Customs.

In spite of the white man's efforts to civilize them, natives of the New Hebrides cling tenaciously to their old habits and customs. Superstition and prejudice are so firmly rooted in their minds that any new ideas are looked upon with distrust. The sacred men of the tribes are sternly jealous of their power and ward off encroaching civilization by terrible threats.

The islands of the New Hebrides like visible reminders of his religion and superstition. Sacred objects are guarded by evil-looking carved figures and a departed chief of a tribe is kept in mind by setting up an effigy in a conspicuous place. There is never any doubt as to the identity of a figure, as the head of the effigy is the chief's skull covered over with clay and maddled and painted to resemble the departed one. The rest of the figure is rather like a scarecrow, with a painted clay body and very few clothes. While this effigy remains in the public view, there is no danger of the chief being forgotten. His memory is ever green, and he is fittingly venerated.

Deeper Than the Ocean.

Geologists have discovered a number of suboceanic canyons or drowned rivers, along the east coast of the United States. Both the Hudson and Delaware rivers are in this class, as well as Chesapeake bay. The St. Lawrence river in Canada, and the Congo, in Africa, are also deeper, near their mouths, than the ocean.

The Hudson river, worn by the flowing stream, is considerably deeper than the offshore part of the Atlantic. It is flooded by the intruding ocean. The bay and lower river compose what would be called in Norseland a fjord.

The whole east coast of the United States has sunk a good deal in the course of ages, owing to the enormous weight of material brought down by the rivers and deposited out in the ocean off shore. But geologists say that the melting of glaciers has largely to do with the phenomenon.

Conservative Customs Die Hard.

In spite of having a well-equipped mission hospital in the city of Tschow, China, where men and women can receive the best of medical care and treatment, the native doctor or witch still flourishes. He sits at the street corner and the ignorant Chinese flock round him, especially on market or festival days. No method, however painful and drastic, deters the believers in his powers of healing—indeed they expect to be made to suffer acutely in order to "expel the original pain." Or they are held up to the ridicule of the mob because their disease portends the possession of an evil spirit.

Presbyterian Church

Sunday School, 10 a. m.

Morning Worship, 11 a. m.

Our Children's program will be given. The winners in the membership contest in the Sunday school will be announced and the prizes will be awarded. The ones who donated the prizes have been asked to act as the judges of the contest.

Evening Worship, 8 p. m. Subject: "The Cost of Not Being Christian." Everybody always welcome.

Allan A. Nelson, minister.

An Estimate on Wiring Your House Costs Nothing.

Everybody knows the safety, convenience and practical utility of electric light and household appliances. Everybody wants them.

Then why isn't everybody's house wired?

Simply because some people are afraid of the man who does the wiring—and are afraid of the bill that will follow.

Let us talk these matters over beforehand—tell you of the economy of housewiring—and show you how simple it is to do the work without the slightest inconvenience to you.

We'll give you an honest estimate for honest work. A phone or postal will bring our representatives to talk it over with you. Both Phones.

Coast Power Co.

Having your house wired by folks who know their business is not a thing to be dreaded. It can be done with far less fuss and fuss than you put up with in having the house papered or painted.

We can wire your house in two or three days and leave not a scar on your wood-work or plaster.

There's no dirt, nor any inconvenience to you and the cost is low. We will come and tell you exactly what it will cost if you wish. SUNSET ELECTRIC COMPANY Tillamook - - Oregon.

SINCE the plates and insulators inside a battery cannot be seen, the trademark on the outside is particularly important. The Thread Rubber circle of the Still Eetter Willard means that the battery won't have to be torn down for re-insulation.

Tillamook Battery Station Willard Service

United Brethren in Christ.

Preaching at 11 a. m. and 8 p. m. Subject for morning discourse: "The Mountains of Bible." For evening: "Cavivary."

Sunday school at 10 a. m.

Prayer meeting every Wednesday at 8 p. m.

We had a splendid audience last Sunday at both services. We invite you to attend our services.

E. F. Wriggle, Pastor.

Let's start a barefoot club. We do not see how such a club could advance the price of shoes. If no one in America will wear a shoe until September we guarantee that ladies' pumps with no more leather in them than there is paper in a postage stamp will not sell for \$30 and up.
