Summed up briefly the advantages of the

Wizard Adjustable Arch-Builder

Over the ordinary arch supports are:

The Wizard can be adjusted to 41 different positions and shapes to fit any arch, perfectly.

The adjustments can be made without tools or machines.

The Wizard builds up the arch, while other devices merely support the arch, generally in the wrong place.

The Wizard is the only device that will not flatten after being adjusted, regardless of the weight of the wearer or the condition of the feet.

The Wizard is the only device that can be adjusted forward or backward, the supporting post lengthened or shortened and the height raised or lowered at any point along the arch of the foot.

The Wizard is feather-light and weighs only a fraction of the weight of the ordinary kind.

The Wizard is pliable, bending easily with the movements of the foot, thus giving all of the muscles of the feet, and the lower limbs, proper action.

The Wizard can be worn in new shoes, with perfect comfort, and do have to be "broken in" in old shoes. They can be worn continuously after being properly fitted and do not have to be taken out to "rest the feet."

Thousands of people vainly seek relief by using ordinary arch supports thinking they have broken down longitudinal arches (arches running lengthwise of foot) whereas the trouble is not with the longitudinal arch. The pain is caused by the lowering of the Anterior Metatarsal arch (the arch across the ball of the foot.) Either the Wizard adjustable Callous Remover and Arch Builder will give quick and permanent relief and they are the only adjustable appliances in existence that will correct this trouble.

We have an expert shoe man who understands this work thoroughly. He will fit you with the proper shoes, examine you feet and fit you with proper appliances if need. No charges for examination.

If you have sore aching feet call and see Mr. Gilbertson for shoes and Wizard appliances.

They are for Men, Women and Children, old and young. Why suffer with your feet and limbs when Wizards and proper fitted shoes will put you on easy street.
