

Friendship of a Bank.

Many foresighted merchants and manufacturers recognize that the friendship of an important bank is a priceless business.

And especially a bank whose officers are "human" men who take pleasure in other men's success.

We are in business to help other businesses. Therein lies our success and yours.

"I'm Getting a Thor Electric Washer Too."

"I just had to drop in on my way home and tell you, because I'm so delighted at the thought of getting an electric washer.

"We talked it over last night and Harry said if yours saved you and the clothes so much, I must have one too.

"Having decided to get one, I was determined to have the very best, so, as you suggested, called at the Coast Power Company and asked for a demonstration.

"They explained everything, but what pleased me more than anything were the little it costs to operate. It won't cost as much as sending clothes to the laundry, and after I've finished paying for it, I'll save that much money every month!"

Do the same—you'll be just as pleased.

COAST POWER CO. The Electric Store.

SWORE BY 'TEDDY'

Yellowstone Park Rangers With Roosevelt to a Man.

Colonel's Characteristic Greeting of Down-and-Outer, Whom He Had Known in Happier Days, is Still Remembered.

Of the few out-of-season visits paid to the Yellowstone, that of Colonel Roosevelt, who, when president, spent 24 days of the late winter of 1903 there, has the most prominent page in the annals of the Spread-Eagle rangers. He found the scouts, then serving as chaperons for lackluster cavalry troopers and doing their own work besides, to be men after his own heart, and did not hesitate to say so. Before he had been in the park a week every ranger was swearing by him.

"Anybody know the whereabouts of one William Jones?" was one of the colonel's early inquiries.

Jim McBride, the present chief ranger, who was then assistant chief of the park scouts under the late Buffalo Jones, knew a Bill Jones, wood chopper and ne'er-do-well, chiefly remarkable for an insatiable thirst and a knack of ministering to it in a bone-dry park. He was about the last man in the Rockies for whom a president of the United States would be expected to inquire.

"Bill put me into office once," said Roosevelt. "I want to see him, drunk or sober."

He further explained that the derelet had been sheriff during his own days as a ranchman and had made him a deputy in a horse-thief posse. "I took three days to find that old horned rood and bring him in," said McBride, in recalling the incident. "But just to listen in at the colonel's hearty greeting of that down-and-outer was pay in full.

"Well, Ted, you got a right swell job since I seen you last," Jones remarked when they had exchanged how'd'ye-do's; "but that needn't stand between friends—I got something on my hip."

"Colonel Roosevelt didn't partake, but he did spend the best part of an hour swapping yarns of the days when Bill was a 'white man' and sheriff of his county. The woodchopper tried to back up after his talk with the president, but it wasn't to be done. The next winter we found him dead in the brush over on Bear creek.

"The colonel was enthusiastic over the sport of ski running, and was something of a performer on the slabs himself, for a novice. He strapped his feet into them as often as opportunity offered. One morning on a slide near the Canon hotel he broke one ski and came a heavy cropper.

"The government has fallen at last," he cried with a molar showing grin, as I crouched down to help unangle a living president and a pair of dead stags.

"He was looking at the wreck he had made of the hickory slabs when Capt. John Pitcher of the First cavalry then in command of the park, arrived.

"Have you plenty of these? Teddy said.

"Only a few pairs, and they are the property of the interior department," replied the officer.

"In less than three weeks there came a rush shipment of a hundred pairs. "Next afternoon the president challenged me to a race on snow shoes from Canyon to Mammoth, a distance of thirty-one miles. Those with him decided that the trip would be an unwise strain upon him, and began to argue against his attempting it. He got me to one side after a while and whispered:

"We'll let them talk, McBride. Just you stick around until midnight. They'll be asleep then, and we'll hit the trail!"

"It took Harry W. Child and Captain Pitcher two hours to talk him out of that. He wasn't at all pleased at having to veto his own plan for a secret departure."—Ethel and James Dorrance in Munsey's Magazine.

Bird Study of Interest.

A novel opportunity for studying the influence of extremes of climate on birds is offered by the English sparrow. This bird was introduced into New York city soon after 1880, did not reach California until 1871 or 1872, but has recently been found by Dr. Joseph Grinnell of the University of California to have settled in the heart of Death valley at Greenland ranch. This location is 178 feet below sea level, with a temperature at times exceeding 130 degrees F. and great dryness. How development will be affected is a matter of much interest.

Navy Dirigibles World's Largest.

Two superdirigibles, the largest in the world, are planned by the navy, and one of them now being built in England, will attempt a transatlantic flight next fall. Captain Craven, director of naval aviation, recently told the house naval committee. American naval officers and enlisted men who will fly the British-built ship to America are in England training. In asking \$2,700,000 for construction of a second superdirigible, Captain Craven said it would be 50 feet longer than the British-built craft, which is 644 feet.—Scientific American.

Unceasing Vigilance.

"Why was it that the prohibition sleuths railed the Bingbangers?" "Bingbanger happened to remark in the hearing of one of them that theirs was a bottle baby."

Announcement

Miss White has opened her studio at M. R. Hannkroff's residence, and is organizing classes this week. Those wishing lessons can find Miss White at the studio.

HUNTERS!

WHAT APPEALS TO you more than the feel of a good Winchester shotgun you know can be depended on for accuracy and sure action the instant the covey lifts.

When you are following your pointer through the fields on a crisp October morning, alert for the sight and sound of wary birds, you like to feel that both your gun and ammunition are going to do their part.

WINCHESTER REPEATING SHOTGUNS

—are made to answer this call. They are designed with just the right drop and shoulder fit and are manufactured of the finest nickel steel, every part properly tempered and hardened and beautifully finished.

Winchester shotguns are made in four models, in both hammer and hammerless, including the latest .410 shotgun, the ideal gun for family shooting, practice and small field game.

We carry a full line of these shotguns and cordially invite you to come in any time, look them over, get their feel and make your selection.

King Crenshaw Hardware Co.

Administrators Notice of Sale.

Notice is hereby given that by virtue of an order made and entered in the county court of the State of Oregon, for Tillamook county, in the matter of the Estate of B. Indorf, deceased, the undersigned administrator of said estate has been authorized, licensed, empowered and directed, from and after the 25th day of September, 1920, to sell and will sell for cash to the highest bidder, the following described real property situated in Tillamook County, Oregon, belonging to the said estate, to-wit:

The West half of the Southwest quarter of section Twenty-seven, the Northeast quarter of the Southeast quarter of section twenty-eight, and beginning at the Northeast corner of the Southeast quarter of the Southeast quarter of Section twenty-eight, and running thence South on section line forty rods; thence West twenty-four rods; thence North forty rods to the north line of the Southeast quarter of the Southeast quarter of said Section Twenty-eight; and thence East to the place of beginning, containing six acres; also the north half of the northwest quarter of section thirty-four, all in township two South of range nine West, and containing 206 acres.

Said sale will be made subject to confirmation of said County Court. August 26, 1920.

M. A. Adams, Administrator of the Estate of B. Indorf, Deceased.

All Cows Are Alike to the EMPIRE

Hard milkers or heavy milkers or nervous or calm cows—large or small teats—even or uneven udders—they are all alike to the Empire. It milks them all. And Empire teat cups stay on without surcingles or harness.

EMPIRE MILKING MACHINES

are now equipped with our new Super-Simple Pistonless Pulsator. No wearing pistons to leak vacuum. It operates teat cups with absolute regularity. Cows like it. It soothes and quiets them. Results in greater milk flow and also increases period of lactation.

Come in and see this different, better milking machine or, if you wish, phone me and we'll bring the machine to your farm; no obligation.

J. BURCHARD.

IN UNEQUAL FIGHT

Himalayan Bear's Foolish Combat With Stone.

Like Too Many Members of the Human Race, the Animal Is a Victim of His Unconquerable Obstinacy.

Most wild animals, it appears, are stupid as well as greedy and obstinate. But for sheer brainless obstinacy in the face of opposition there is, the best authorities contend, no animal like the Himalayan bear. If he finds a thing in his way he will always push it aside if he can, even though it would be easier to go around the obstacle.

The wily natives of India have observed that trait in his character and from it have contrived a trap to catch him. They select a tree with a suitable horizontal bough. At a point on the bough about ten or twelve feet from the fork they fasten a bait likely to attract the bear—honey, for example, or goat's flesh. Then from another bough above that one they suspend a heavy block of stone. The rope is so fastened to the upper bough that the stone hangs between the bait and the fork of the trees.

The bear scents the bait from a distance, comes to the tree, sees the food on the bough and climbs up the tree. Reaching the bough, he walks along it to get at the bait. But suddenly he notices the obstacle in his way and pushes it aside with his paw. The stone swings out of the way for a second; then it swings back and hits the bear on the paw. With a groan of irritation the bear pushes it aside more violently. The stone swings away again; then it returns with greater force and hits the bear on the chest.

With a snarl of rage the bear gives the stone a tremendous thrust and sends it up into the air in a wide curve. Then down comes the stone in a similar curve and hits the bear a thumping whack on the ribs.

Most animals would desist after that third blow, not so the bear. He is now in a red-hot mad rage, and a bear is a mad boxer. He hits out with his paws, right and left and sends the stone hurtling forward in a still wider curve. Then, after a few seconds the stone comes back and hits the bear a terrific "uppercut" on the jaw.

But alas! the bear never went to school and learned the law of gravity. Every blow he hits the stone is returned tenfold. And as the stone has no brains to be knocked out, it is the bear that gets knocked out.

Then the wily natives hitting below rush in with a net and throw it quickly over him. And that is how any "zoo" or menagerie gets its Himalayan bear.

Co-operative Law Library.

An interesting experiment in library co-operation is being worked out in the Long Beach public library. Long Beach, Cal. Forty or 50 attorneys of the city of Long Beach have sent law books from their private libraries to the public library for the purpose of forming a co-operative law library. Those contributing books in this way are entitled to take books from the co-operative library, keeping them for a period of five days, and the general public is allowed to consult the books at the library. The books are marked, "Loaned to the Long Beach Public Library." Some of the attorneys joining in the plan have each contributed as many as 200 books to the co-operative law library. It would seem that this idea might be worked out successfully in other lines of endeavor, thus making the resources found in books available to the largest possible number of people.

Nickel Money.

Nickels—which are really copper-nickel, being a mixture of the two metals—were first coined in this country to give encouragement to nickel mining. Important deposits having been found in Pennsylvania.

Since then many other uses for the metal have been found. But at the present time 85 per cent of the world's supply of nickel is derived from the mines of the Sudbury district, in Canada, where the reserves of ore are enormous. Of the balance, France produces the bulk, contributing 11 per cent.

It has been suggested that Great Britain, practically controlling as she does the world's nickel, might switch from cheapened gold and make the white metal the basis of her currency.—Philadelphia Ledger.

"Let's Pretend."

Everybody has things to put up with. There are sure to be ups and downs, and even days when everything seems so out of tune that you can never be right again. To make home a happy place is the housewife's business, but unless she can at least appear happy herself she is not likely to make a success of it. This will be much easier if she has had her early training in the game of "let's pretend." Very few of us make the most of all the chances for happiness that come to us. It's a difficult thing to do. But we can all try to do so, and that is half the battle!—Washington Post.

Our Flour and Wheat Exports.

Between July 1 and January 9, the United States exported \$2,083,000 bushels of wheat and \$773,000 barrels of flour, a total equal to 121,000,000 bushels of wheat.

Notice to Tax Payers.

This is to advise that the last half of taxes must be paid on, or before October 5, 1920. After that date, interest at the rate of one per cent will be charged on all amounts remaining unpaid. After November 5th, penalty of 5 per cent will be added and interest will accrue at the rate of 12 per cent per annum. W. L. Campbell, Sheriff.

JERSEY CATTLE. Chester White Swine

We have one pure bred bull calf for sale, whose dam has an official record of 473.44lbs. fat. Register of merit class AA, age 3 years. His grand dam on the sire side has an official record of 614.8lbs. of fat. Class AA.

Place a pure bred Jersey bull at the head of your dairy herd, and by doing so you will increase the quantity and quality of Tillamook cheese and price per lb.

Jersey's are the world's best cheese cows, Tillamook included. Why is she the best cheese cow?

Jersey cow testing 5 per cent., 100 lbs. of her milk will make 12.90lbs. of cheese, and milk testing 3 per cent will make 8.30lbs. of cheese. 100lbs. 5 per cent milk the per cent of fat lost in the whey is 6.00, while in the 3 per cent milk the percentage of fat lost in the whey is 9.55.

The per cent of fat in milk retained in cheese testing 5 per cent is 94.00, while the 3 per cent milk the percentage is 90.45.

Cheese containing a large per cent of fat is better, because, first, fine flavor and taste; second, of its better consistency; third, of its improved aroma; fourth, of its increased digestibility; fifth, of its more perfectly answering the requirements of a complete food as balance ration.
