**T**HE first time you notice a sign of storage battery trouble, drive around around and let us correct it for you.

For we are in business for just that purpose, and to succeed we must make the business acquaintance of car owners such as you. What's more, we must win your friendship by serving you exceptionally well. We'll do that, and help prolong the life of your battery till it has yielded you its last drop of power, if you'll give us the opportunity.

Our success depends upon our winning your confidence by working for your best interest.

The first time you notice a sign of storage battery trouble—but, anyway, drive around and let us put you on our regular calling list for the distilled water your battery must have every 2½ or 3 week.

Columbia Batterys are guaranteed for one year against defects in material or workmanship.

## BUILDING OREGON.

No one appreciates the growth and development of the State of Oregon more than the Public Utilities who serve it and supply the telephone, gas, electric and transportation facilities which promote the business of the State and the welfare of its people. Proof of that growth is scarcely necessary. The statistics published daily in the press, showing bank clearings, building permits, imports and exports, real estate transfers, all bear testimony to a tremendous business activity and a volume of trade far in excess of that of five years ago.

With all the growth and activity there has been an increasing demand for telephone service—greater than our present facilities can supply and greater than our present revenue will allow us to meet. During the present year we have handled in excess of 48,000 orders for telephone service in the State of Oregon and at the present time have 3500 unfilled orders on hand.

The constant demand for telephone service can only be continuously met with a plant sufficient for present needs and a reserve for growth which will permit of promptly handling installations, changes and moves. This Company has no apology to offer for what it has accomplished in the way of meeting the demand for telephone service during and since the war. It is a record to be proud of—but it cannot continue to meet this demand with its present facilities exhausted and a deficit in its earnings.

Arrangements must be made for the necessary plant and equipment to keep pace with Oregon's tremendous growth. We want the people of Oregon to realize our present situation and the problems now confronting us and help us to take a proper part in the development of this State.
