A Prescription For Pessimists

This country has harvested this year one of the largest crops in its history.

Its transportation congestion has been relieved and its railroad system is for the first time in a decade on a sound financial and operating basis.

We have passed through a national election and assured four years of sane administration of public affairs.

Our banking system has withstood the greatest credit strain in its history and is on a sound and workable basis. The accumulated surplus of five years of splendid prosperity is stored in many ways for our continuous use.

The markets of the world demand our products and a great mercantile marine is prepared to transport them.

This country has not been overbuilt or over-extended in any of its underlying activities, and faces no programme of readjustment along these lines such as usually precipitate panic conditions. We are in the soundest financial, industrial and political condition of any important nation in the world.
