### Fraternal Notes

#### I. O. O. F. NOTES

The last meeting of the order was very successful though quite a few of the members were absent. Those who have not made a habit of attending regularly are urged to be on hand next Tuesday evening. The number of visitors present at the meeting Tuesday was inspiring;

twenty from Wheeler, eight from Bay City, fifteen from Beaver, six from Cloverdale, Earl Hadley from Thorpe, Wisconsin, Wm. Schaffer from Selah, Washington and Alfred A. Welsh from Mt. Cloud, California. The initiatory degree was conferred on Henry Wood, and the team was not asleep on the job. Captain Belty promises that the first degree team can do just as well. Brothers Vern Holden and George Van Patten were reported on the sick list. We failed to hear much of a

report on the visiting committee, and we are wondering if this committee is on the sick list or have gone to sleep. The Encampment are a busy bunch these days, having finished up a class last meeting and having a good class to start next meeting. Forty members present last meeting. We feel that we should make a report of the Rebekah's, but if we told you all it would be necessary to publish another newspaper, so the

best way will be for you to be present each Wednesday evening and see for yourself what is going on. Eats, well that of course comes last, but not least. Just one of those good old lunches that we tell you of so often. If you are on hand next Tuesday evening about seven-thirty, we will tell you more about it, and you will have a chance to get your name in the pot for next time.

#### PYTHIAN SISTERS

The next regular lodge session of Miriam Temple will be held Feb. 8. The members are urged to be on hand promptly at 7:30, as it will be necessary to hold a short session of lodge before opening the Hall for the Pythian Card Party to which the public is cordially invited. The admission fee will be sixty cents, which includes ticket, refreshments war tax and checking wraps. High score and consolation prizes will be awarded to both ladies and gentlemen.

The social club of the Pythian Sisters will hold its regular meeting in the Pythian Castle Hall, the third Wednesday of each month at 2 o'clock. Mrs. J. Merrill Smith is president and Mrs. Fred Christensen is secretary. Any sister desiring to join the club, communicate with either of these ladies for information.

#### EXTRA TROUSERS SAVE 'ROLL'

Holdup Men Only Search Victim's Outer Pair and Miss a Fat Roll.

Paterson, N. J.—Louis Lenner accidentally discovered an antidote for New Jersey's crime wave.

"Put on two pairs of trousers," is his formula.

A chill wind was blowing when Lenner had to rush from home to summon a doctor for his sick wife.

In front of the public library two highwaymen urged him, with revolvers drawn, to throw up his hands.

"Search me!" cried Lenner, confident in the security of his double-barreled trousers.

The robbers left him, provoked after finding nothing in his outside trousers. They looked no further for—two pairs are a bit unusual.

Carrying a fat bank roll in his "trousers," Lenner stopped at the police station en route to the doctor's.

Bull Costing \$100,000 Brings \$1,100, Chicago.—"The greatest advertised bull in the world," Ringapple Korndyke VIII, that sold about two years ago for \$100,000 at a New York fancy stock sale, was sold a few days ago to David Stein of Capron, Ill., for \$1,100.

Count 'em. Forty on each ear. It is one of the big customs of the "Garo Hills" tribe in India for a warrior's widow to wear these unique earrings as a means of showing her sorrow.

#### GREENLAND IS MOVING WEST

Danish Scientists Figure It Has Traveled 875 Miles in 100,000 Years.

Copenhagen.—Greenland is slowly moving in a westerly direction. According to observations made in 1907 by J. P. Koch of the Danish Mylius-Erichson scientific expedition, Greenland was three minutes further west than in 1870, when a German expedition made astronomical observations. In both instances the same northern latitude was found. Therefore, Greenland moved west 1,333 yards in 37 years.

The first observation of the longitude of Greenland was made in 1823. Comparing the findings in 1823 and 1870 one arrives at the conclusion that Greenland "wandered" ten yards westerly every year. That tends to show that Greenland and Norway, now about 875 miles apart, once were connected, the separation taking place 50,000 or 100,000 years ago.

Didn't Get Much for Winning. Walton, Ky.—Rivalry over the speed of their machines caused George W. Wayman and Charles Campbell to stake their runabouts in a road race to Fountain square, Cincinnati, a distance of 15 miles. Wayman got the lead and made the trip in 33 minutes. Campbell's car turned turtle several miles out of Cincinnati and was wrecked. The wrecked car was turned over to the victor.

Sovereign Scarce in England, London.—The golden sovereign has almost vanished from circulation in most parts of Great Britain. The paper currency has been issued, but in the west of Wales gold is as plentiful as it was before the war.

### Whether You Call It LaGrippe or Influenza

(Thursday Health Talk No. 4) (By F. L. Howard, D. C. Ph. C.)

Whether you call it LaGrippe, after the French, or Influenza after the Italian derivation, makes no difference, it is virulent and dangerous. It grips you by the LUNGS, so to speak, and uneasiness steals over your entire body. There is apt to be vomiting and you ache all over. All "the streets and alley of the body" are clogged with poisons.

Health turns the Clock Backward

The chiropractic spinal analysis shows pressure on spinal nerves to the lungs and kidneys, and adjustments relieving that pressure, brings the activity of these organs back to par. The poisons that were creeping deeper into the bodily tissues, begin to clear out. The chiropractic record in the epidemic was better than that of any other health method, chiropractors being able to show recoveries in 885 out of every 885 cases adjusted.

Brought Through Two Epidemics

"We have had chiropractic adjustments in our family for two years now. Twice the entire family was down with the influenza and both times chiropractic brought everybody through safely."—R. B. Colglazie, Chiropractic Research Bureau Statement No. 1248H.
