"SABBATH DAY" NOT SUNDAY

Modern Writers Display an Amazing Carelessness in Their Misuse of the Words.

In English there is not a more definite word than sabbath, yet it is used with an amazing carelessness as a synonym for Sunday. The writers and translators of the New Testament use sabbath correctly, says a writer in the Brooklyn Eagle.

It is always Hebrew and in no instance is it associated with the New Testament dispensation—now universally known as Christianity. Indeed the apostles were severely rebuked by the Jews for breaking the sabbath. Christians cannot break the sabbath, for they do not have it to break.

Sabbath and Sunday are observed on separate days, but this is not necessary, as astronomy shows that the identity of days from year to year is impossible; since the year and day are incommensurable. The leap years show that any given date varies a day; even this does not correct the dates, as other corrections—the centennial leap years—become necessary. There is a still deeper reason for disregarding the severity of the sabbath, namely, our seven-day week is uncounted thousands of years older than the book of Genesis. Evidence is very strong that it was founded on quartering the sidereal month—the "true month." Long before anything even approaching astronomy arose man noticed that the moon slowly moved into another group of stars each night, and by rough eye measurement, completed her revolution in 28 days—the 28 mansions of heaven" of the Chinese and Japanese.

COVERED HEADS IN CHURCH

Before the Year 1661 Men Did Not Remove Their Hats During Religious Services.

About 1661 an agitation commenced to have men remove their hats in church—Pepys makes gentle fun of it. The custom was first to remove the hat to cover the eyes in prayer, and later it was taken off altogether.

The introduction of the wig helped the custom—for it proved difficult to keep one's hat on over a tonsured mass of false curls. This also led to large hats with plumes going out of style.

Then, instead of wearing hats indoors, men went to the other extreme, and often carried them in their hands when out of doors. The Puritans in England continued to wear their broad-brimmed hats, however, indoors and out.

Men's hats and clothing were changed with the French Revolution; wigs went out, and then with the rise of Napoleon, dress became military in style. In 1815, during the Restoration period, arose the "stovepipe hat," and breeches, at the same time began to be worn to the ankle.

Then All Was Quiet.

Junior has reached the age of ingrativness. With grandpa, he was making a social call. He noticed that the piano was not in the same position as the one at home, that theavenport was different, and that the library table was of another design and called attention to the fact in some that all had.

CLOVERDALE ITEMS

Mr. and Mrs. W. A. Gage of Sheridan were Cloverdale visitors last week. They resided a few miles south of town before moving to Sheridan.

Miss Agnes Imhah returned home last Friday from Portland where she has been visiting her sister, Mrs. J. L. Stafford, since the middle of March.
