**BRIDE OBSCURES THE GROOM**

Louisiana Court Has Solemnly Held That the Man Does Not Attract Any Attention.  
It is at last judicially determined that the groom at a wedding is merely a necessary incident, accessory, or piece of furniture. The bride is the whole cast. In a divorce action in Louisiana, in which defendant denied he was the man who had married plaintiff, and his identity with the bridegroom was in issue, the court says:  
"The only evidence introduced by the defendant in support of his denial that it was he who married plaintiff in Indianapolis on October 9, 1911, was the testimony of the Probate Judge who performed the ceremony and that of the proprietor of the Imperial hotel. The Probate Judge and the proprietor of the Imperial hotel both testified that they had identified the plaintiff as soon as she had spoken to them when they stepped off the train in New Orleans; and from that circumstance, counsel for defendant argue that the Probate Judge and the proprietor of the hotel would surely have been able to identify the defendant if he were the individual to whom plaintiff was married by the judge in presence of the hotel proprietor. We do not think so. With due respect for his honor, the Probate Judge, and for the proprietor of the Imperial hotel, it may be that the bride attracted more attention than the groom."—From West's Docket.

**MUST BREAST TAPE TO WIN**

Starter in Life's Race Foolish to Handicap Himself by Forebodings That Hinder Success.  
Don't be hampered at the start of life's race by the thought that perhaps there is something about you that hinders success.  
Don't run yourself out. Take a gait that you can hold. Don't endanger your health or sacrifice your happiness by overeffort. The man who runs too fast at the start lays at the finish unless he has extraordinary staying power.  
One morning, over in France, there was a call to go over the top. The officer in addressing the men told them what was to be accomplished and who was to lead them. It was a desperate task that was being undertaken, and a pale-faced young fellow was the man upon whom the great burden had been put.  
"Why did you choose Jones to lead that expedition?" the commanding officer was asked, after the attack had proved successful.  
"Because," said he, "once he gets started all hell can't stop him."  
That's a great reputation for a man to have on the field or the farm, in the office or out on the job.  
Train yourself so that once you get started nothing on earth can keep you from making a finish creditable to yourself and to your job.—F. A. Walker in Chicago Daily News.

**Improved Lighting System.**

The advantages of electric lamps that can be moved about from one place to another may now be considered in installing the lighting system in the home or elsewhere. The new system requires no cord connection, but a novel type of plug, to be used with a special outlet, gives portability not only to the lamp bulb, but to the entire fixture. The outlets are located in the parts of the room or establishment where occasional as well as permanent lighting may be desirable. The plug has curved blades instead of the ordinary straight ones, and is easily attached to any fixture. The outlet has two parallel slots in a rounded triangular center. As the plug is inserted with the curved blades pointing upward, electrical and mechanical connection are formed, and the heaviest household fixture is safely supported. The outlet will also receive the standard parallel-blade plug used with cord connections. To change a lamp from its regular one it is simply necessary to lift the fixture from its old location and plug it into the desired outlet.

workmen owning mivvers, those who are on the inside of the pawnshop business decided that a similar institution for motor cars would be had.  
The motorcar pawnshop is located near Columbus Circle, in the heart of "Gasoline Row." Here, when the motor owner is short of ready money, he may drive his "dilly" and place it in "lock." If he fails to pay back the loan with interest the car is sold to the most profitable business for these pioneers in the pawnbroking line, and they always have a hundred or more cars of all kinds and conditions on hand.—New York Sun.

**Old Papal Palace Restored.**

The ancient castle of Avignon, near Lyons, France, papal residence from 1309 to 1417, has been recently restored, and it is planned to furnish it with medieval furniture from the Vatican. The mayor of Avignon appended to the mayor of Rome to help in obtaining the desired furniture from the Vatican's administration.  
Up to now the famous castle is unfurnished and there is nothing within the building to remind one of the splendor of the fourteenth century.

**RETAIN THEIR WILD INSTINCT**

Herds of "Tame" Buffalo Have Much in Common With Their Brethren Who Have Freedom.  
The "tame" buffalo of Yellowstone National Park, are tame only in the manner of speaking. They retain all the habits of the original wild species. For instance, they are able, without fail, to predict a heavy storm for one or two days in advance. As the buffalo of the old plains were known to with the head toward the point from which it afterward breaks. Another sign of uneasiness induced by heavy weather is the stiff-legged leaping and running about in circles which often mark the herd just before a storm breaks on their range. They live practically in all respects the wild life of the so-called wild herd of the park, with the exception that they are watched by horsemen and are fed hay during the most inclement weather of the winter. The ranges of the tame and wild herds overlap to some extent, and without doubt they occasionally interbreed. The original hope, which has not been realized, was that some of the tame herd would drift off and become members of the wild herd.

**Ant Engineers.**

It has been found that the population of an ant hill has solved many complicated mining problems. Thousands of ants working instinctively perform miraculous engineering feats with amazing efficiency and without work and the team work when the big problems must be solved is surprisingly efficient. When one shift of workers tires or must stop for food or rest its place is taken by other workers equally skillful so that not a moment is lost. When an ant becomes covered with dirt others immediately clean it by washing and brushing. During their mining operations in digging holes and removing stones an ant is often injured, whereupon others rush to its assistance and carry it to a quieter gallery where first aid may be administered. The resourcefulness of these little engineers has been found to anticipate many of our recent efficiency methods.—Boys' Life.

**House Names.**

I liked the English habit of naming their houses; it shows the importance they attach to their homes. All about the suburbs of London and in the outlying villages I noticed nearly every house and cottage had some appropriate designation, as Terrace house, Oak-tree house, Ivy cottage, or some villa, etc., usually cut into the stone gate post, and this name is put on the address of the letters. How much better to be known by your name than by your number! I believe the same custom prevails in the country.  
It is a good feature. A house or a farm with an appropriate name, which everybody recognizes, must have an added value and importance.—John Ruskin.
