HOME SERVICE PROGRAM

One Week--May 7 to 14 inclusive--once a year

TELEGRAM

J. A. Carroll, Tillamook, Ore., May 2, 1921.

In passing through what appears to be one of the most critical periods of readjustment, there has fallen to the lot of the Salvation Army perhaps the greatest responsibility in the history of that organization. It has never ceased to serve where service was needed, it is an active efficient organization, working continually for suffering humanity; the salvation army commands our respect and deserves our financial support. I therefore desire to make the most earnest appeal to the people of our state to exert themselves to the utmost on behalf of the home service fund appeal for this year.

U. S. TUBES
 The same standard of quality built into U. S. Tires is put into U. S. Tubes.

Why some men seem to have all the tire luck —

YOU probably know a man whose car is a hobby with him. He knows just why it's the best little old car there is of its class.

And he'll stand up for that car against the world in any kind of an argument.

Year by year an increasing number of men feel the same way about U. S. Tires.

For a while they may try "job lot" stuff, "bargains," "big discounts" and "rebates."

But usually it doesn't take long for a man to sense the economy of the standard quality tire.

For years U. S. Tire makers have been building quality tires for sane tire users—for the car of medium or light weight no less than for the heavy car.

The tire buyers of the land have responded with a mighty U. S. Tire following.

The U. S. Tire makers meet the responsibility for supplying this nationwide following with characteristic energy.

Ninety-two U. S. Factory Branches are established, covering the entire country.

Find the U. S. Tire dealer who has the intention of serving you. You will know him by his full, completely sized line of fresh, live U. S. Tires—quality first, and the same choice of size, tread and type as in the biggest cities of the land.

Which Paint Costs Less?

NOTE how the best paint spreads easier and covers more square yards than cheap paint does.

Figure in the extra gallons of cheap paint that you must buy and the extra cost of application.

It means that cheap paint costs just as much as good paint on the house.

The best paint then gives five or more years' protection to your property investment. Cheap paint on the average, starts cracking in twelve months. Which paint costs less?

72 Years' Experience

The house paints we specify for your home are the result of 72 years' experience in making paints and varnishes for every

purpose. Made to stand the peculiarities of western weather.

The best material—PIONEER WHITE LEAD, pure linseed oil, zinc and color—are combined with long-time skill, in scientifically exact proportions.

Our white lead base must pass through a silk screen with 40,000 meshes to the square inch. A patented purifier makes it "whiter," so Fuller paints are exceptionally clear-toned. The paint when finished and applied on the house is a beautiful, elastic, tough, protective coating.

Such paint costs but a trifle more to buy per gallon than cheap paint, but it lasts five to ten times more economical in service.

Don't allow surfaces to rot. It costs less to paint them.
