Some **FACTS** About

Ford
 THE UNIVERSAL CAR

Here are authentic figures from the Ford factory Detroit. They show you just how many Ford cars and trucks have been built each month since January 1, 1921 and how many have been sold to retail customers, in the United States.

	Produced	Delivered Retail Customers
JANUARY	29,883	57,208
FEBRUARY	35,305	63,603
MARCH	61,856	87,221
Total Production	127,074	Total Retail Sales 208,032

showing that actual sale for the first three months of 1921 exceeded production by 80,958 Ford cars and trucks!

And requisitions already specify 107,719 additional cars and trucks and the estimated April output of the factory and assembly plants combined calls for only 90,000!

These facts clearly show that the demand for Ford products is growing much faster than manufacturing facilities to produce and were it not for the dealers' limited stock, which are now being rapidly depleted many more customers would have been compelled to wait for the cars. It will be only a matter of weeks, therefore, until a big surplus of orders will prevent anything like prompt deliveries.

If you would be sure of having your Ford car or truck when you want it, you should place your order now. Don't delay. Phone us or drop us a card.
