

GEM THEATRE

Saturday, May 11th--
"Terror Island"
 STARRING
HOUDINI

The World's master wizard in a fascinating romance of sunken treasure, puzzling plots, deadly encounters and miraculous escapes. Beginning in the shop of a YANKEE inventor; ending on the shores of a SOUTH SEA ISLE.
ENOUGH THRILLS FOR THE PICTURES CROWDED INTO SIX BREATHLESS REELS.

"DANDY LIONS"
 TWO REEL CENTURY COMEDY

Sunday-Monday, June 12th-13th--
"IDOLS OF CLAY"
 STARRING
MacMurray and David Powell.

Miss Murray will be remembered as the STAR in "ON WITH THE DANCE" in which role she won many admirers, in "IDOLS OF CLAY" she surpasses all of her past achievements. Don't fail to see the "CHIFFON DANCE" and all the rest of the sensations and thrills in "IDOLS OF CLAY."

"THE GUIDE" TWO REEL CLYDE COOK COMEDY.

Tuesday, June 14th--
"HANDS OFF"
 STARRING
TOM MIX

The latest and wildest and most thrilling WESTERN picture TOM MIX has ever made. DONT FORGET THE DATE... YOU KNOW THE PLACE... COME EARLY.

Wednesday, June 15th--
"Dynamite Allen"
 STARRING
George Walsh.

"DYNAMITE ALLEN" is a spectacular and thrilling picture. Do you believe in "conviction" on only "circumstantial evidence"? or conviction by testimony of a blind "witness"? for the supposed crime of MURDER. SEE DYNAMITE ALLEN. THEN ANSWER THE QUESTION.
"Edgar's Hamlet" TWO REEL CAPITOL COMEDY.

Thursday, June 16th--
"SOMETHING DIFFERENT"
 STARRING

Constance Binney.
"SOMETHING DIFFERENT" with its setting in the land of adventure and escapades stands out as FRESH and NEW.
"HIS YOUTHFUL FANCY" Two Reel Sennett Comedy.

Friday, June 17th--
"Half An Hour"
 STARRING
Dorothy Dalton.

At seven thirty she left her husband a farewell note and slipped away. At eight, she returned--another woman! In that crashing half hour--come and see what happened! A superb beauty-picture, with every scene a-tingle.

"TIMBER WOLVES" Northern Picture.

NO SUBSTANCE TO DREAMS

Writer Gives Reasons for Her Refusal to Have Any Belief in Common Superstitions.

The mind during sleep reminds me of a naughty child, writes Marion Holmes in the Chicago Daily News. With a normal person during waking hours reason controls it and when it seems inclined to let loose a foolish trail of thought rebukes it with "Nonsense! behave yourself!" But when reason goes to sleep the mind has seasons of wild capering. It makes you do things that when awake would stench you with blushes. It causes you to go to church dressed in your very best except your shoes and stockings, which you find you have left at home. It makes you marry a dark man with big black whiskers when you already have a perfectly satisfactory husband who is blond and smooth faced. There is nothing that it will not do uncontrolled by reason. Therefore I never have had much faith in the prophetic quality of dreams, although there are persons who pin their faith on those so-called warnings. We have heard them say: "I dreamed last night that I had lost a tooth. That means bad news," or "I dreamed of walking among ruined buildings. That means that somebody in the family is going to be ill," and, like fortune telling, the predictions that do not "make good" are forgotten.

A recurrent dream is of no importance, I have known the same stage setting with its incidents to be presented over and over in sleeping visions without ever reaching its counterpart in reality. An uncomfortable position during sleep, or the fact that you are not feeling well often occasions troubled dreams.

NEW THEORY IN ASTRONOMY

Possibility That There is a Tall Attached to Our Earth Leads to Ingenious Suggestions.

Opposite to the sun there is a very mysterious glowing patch, which is thought to be attached to the earth as a cometlike tail. The highest regions of our atmosphere consist of very light gases, and the impression is that some of these were driven away by the sun or by other means, and that they stream off from the earth into space just as the light gases do from the head of a large comet.

Naturally, this theory has aroused much controversy, and has led to all sorts of ingenious suggestions. One of these is that a swarm of meteors (of the kind we know as shooting stars) keeps a company through space at a distance of about a million miles, or four times the distance of the moon. But a taller earth is an ideal vehicle for imaginative flights.

It might be argued that if our globe has a tall why should not the planets Mercury and Venus, and even Mars, have one. Well, perhaps they have, for all we know to the contrary. Our earth's tail would be much more easily seen by us because of its nearness and brightness.

Painters for Aviators. Prehistoric birds resembled the early airplanes in their small wing expanse and large tails, according to a British engineer, indicating that man's and nature's development work have been parallel. Flying fish are more likely than birds to yield information about soaring flight, in the opinion of another observer.—Popular Mechanics Magazine.

Soft Beds in Ancient Days.

According to Athenæus, effeminate gentlemen in ancient Greece sometimes slept on beds of sponges. Fashionable people in Athens slept under coverlets of dressed peacock skins, with the feathers on. Clearchus, the author of a treatise on sleep, described the bed of a Paphlagonian prince in such a way that it is difficult to keep awake while reading it. "Over the soft mattress," he writes "was flung an expensive short-grained Sardian carpet. A coverlet of down texture succeeded. Upon this was cast a costly counterpane of Amorgianian purple. Cushions replete with the richest purple supported his head, while two soft Dorian pillows of pale pink gently raised his feet."

Democratic Clear-Mamas.

The nomenclature of the cigar trade is one of the very interesting phases of democracy, says the Philadelphia Public Ledger. No agent intent upon building up a market for a 10 cent cigar ever named it for a statesman. He complimented, instead, an actor, a philanthropist, a race horse, a hypothetical Indian maiden or a supposititious Spanish grandee. To have named a 10 cent cigar for a statesman would have been to "gruse" both the cigar and its tributary patron. The people would not have stood for that sort of thing. It would have prejudged a certain superiority which they would have rebuked both at the cigar stand and at the polls.

Cure for Flat Feet.

Are you flat-footed? If you don't know, the next time you take a bath, observe the impressions that your wet feet make. If your feet are normal, there will be a narrow line from heel to toe on the outside; if they are flat, the entire bottom of the foot will show.

How can you cure flat-footedness? Buy a handful of marbles, place them in two rows, and start picking them up with your toes. To do this you must curl up your toes; as a result the muscles of the feet will be exercised and thereby strengthened.—Popular Science Monthly.

Time to Go.

"She said 'No'?" "Yes," said the dejected suitor. "Cheer up. A woman's 'No' sometimes means 'Yes.'"

Ant Engineers.

It has been found that the population of an ant hill has solved many complicated engineering problems. Thousands of ants working instinctively perform marvelous engineering feats with amazing efficiency and without profiting. Each ant finds its own work and the team work when the big problems must be solved is surprisingly efficient. When one shift of workers tires or must stop for food or rest its place is taken by other workers equally skillful so that at no moment is lost. When an ant becomes covered with dirt others immediately clean it by washing and brushing. During their mining operations in digging holes and removing stones an ant is often injured, whereupon others rush to its assistance and carry it to a quieter gallery where first aid may be administered. The resourcefulness of these little engineers has been found to anticipate many of our recent efficiency methods.—Boys' Life.

COFFIN OF ATTILA

Burial Place of the Great Hun Leader Reported Found.

Tradition as to Final Resting Place of "Scourge of God" Seems to Have Been True.

A correspondent of the London Times reports the discovery of the London Hungary of what archeologists declare is the coffin of Attila the Hun, known to the Christian nations of the fifth century as "the Scourge of God." The find was made in the bed of the Aranka river, a small tributary of the Theiss between the towns of Szeged and Tatabanya. This discovery seems to support the persistent tradition regarding the great Hun leader's burial which has lived for almost 1,500 years. His death occurred soon after his invasion of Italy and on the night of his marriage. His body was carried across southern Austria at the head of his army and in Hungary, at a spot which was known only to a few of his chief officers, the corpse was inclosed in three coffins, the first of gold, the second of silver, and the third of iron, and buried. The captives who were assigned to the task of burying the body were strangled in order that the place of the interment might be kept a secret from Attila's foes.

For centuries there has been a great fascination in the search for relics of the Hun, for it was thought they might throw some light upon these strange, almost unknown Asiatic invaders of Europe. The country along the Aranka river and around Szeged has been industriously searched for evidence of their successes in Europe.

Some rare and beautiful gold vessels have been unearthed in this region. These relics are preserved among the Hapsburg treasures. While these have been identified as belonging to some of the peoples of the early migration from the East they have not been proved definitely to have belonged to the Huns. The latest find is thus especially noteworthy; not only is it the most valuable, but at the same time it is the most sought after of all the Hun treasures.

The memory of Attila and his bands of savage barbarians was revived during the World War. The devastation they wrought in the lands over which they swept seemed to furnish the only apt comparison for the desolation left by the modern invader. The people of central and southeastern Europe would question today if the ravages of their country by the fifth century Huns left in their trail so much suffering and sorrow as were left by the World War.

Lightship's Perilous Voyage.

Ships were imperiled when Nantucket Shoales beacon, the leading mark for transatlantic shipping making port at New York, was torn from its lonely and important station by a hurricane. After inquiry from several ships that missed the floating beacon and almost anxious search by a wireless confederate of the seas, the mystery of the lightship's disappearance was solved when she put in at New Bedford. The lightship had been thirty-six hours making port on a run of 169 miles. The hurricane, which blew her away and snapped the moorings, reached a velocity of ninety miles an hour. Mate L. O. Johnson, her keeper, said that it was much as he and his fifteen men could do to hold their own. Light vessels are not built for speed, and their emergency equipment is not often called on.

Near East Needs Costly Clothing. The clothing cost aside as worthless by our people here in America would provide comfortable covering for every needed one in the Near East, and would be unnoted, blessing to those who have been stripped of all their possessions. This clothing can be transferred to them through the agency of the Near East Relief, Incorporated by Act of Congress to relieve the suffering in that country.

In Philadelphia last year, they used the slogan: "The plea that touched the heart of Philadelphia," and fourteen carloads of worn clothing was the answer. Such a plea should touch the heart of every county in the country, and bring its answer clear and strong. It is such a little thing to dig those castoff garments out of the clothes box and send them to the Near East Relief, but to at least one, and perhaps several human beings in that far off land, it may mean the difference between life, hope, strength—and all.

DEW DROP IN RESTAURANT NETARTS, ORE.
CHICKEN DINNER SUNDAY, JUNE 18th, and every Sunday this season.
 Also sea food specialty for dinner parties.
 PHONE 9 F 12.
Mrs. Ann Bowen.

Why have a Coal Bin or a Wood Box?

YOU can get clean economical Pearl Oil from dealers everywhere.

You save yourself a lot of trouble and work when you cook with a good oil cookstove. No ashes to carry—no fires to require your frequent attention. With a good oil cookstove and Pearl Oil the heat is applied directly to the cooking utensil. The heat is steady and dependable. Pearl Oil gives high fuel values.

Pearl Oil is the clean burning, uniform, economical kerosene—refined and re-refined by special process. Dealers everywhere. Order by name—PEARL OIL.

STANDARD OIL COMPANY (California)
PEARL OIL
 HEAT AND LIGHT

Ford THE UNIVERSAL CAR

New Prices Effective June 7th.

Truck Pneumatic Tires	637.70
Tractor	730.00

WHY WAIT LONGER FOR YOUR CAR. The Price is Down. We have the Cars.

TILLAMOOK GARAGE, TILLAMOOK, ORE. FORD SALES AND SERVICE.

RETAIN THEIR WILD INSTINCT

Wild "Tame" Buffalo Have Much in Common With Their Brethren Who Have Freedom.

The "tame" buffalo of Yellowstone National Park, are tame only in the manner of speaking. They retain all the habits of the original wild species. In fact, they are able, without any special training, to predict a heavy storm for one or two days in advance. As the buffalo of the old plains were known to do, they point the storm, standing with the head toward the point from which it afterward breaks. Another sign of uneasiness induced by heavy weather is the stiff-legged jumping and coming about in circles which often mark the herd just before a storm breaks on their range. They live practically in all respects the wild life of the so-called wild herd of the park, with the exception that they are tended by herdsman and are fed hay during the most inclement weather of winter. The ranges of the tame and wild herds overlap to some extent, and they occasionally intermingle. The original hope, which has been realized, was that some of the tame herds would drift off and become members of the wild herd.

Unwittingly Set Fashion.

An anecdote in connection with the above shows how fashions are started. A young and beautiful duchess, having promised to be at an entertainment given for a charitable object, in Trouville, France, found herself late in preparing. She hurriedly took up her gloves and put them on in the carriage. As she entered the brilliantly lighted room, she found, to her dismay, that she had put on one black and one white. The mistake had arisen from the maid having laid out two pairs, not knowing which her lady would prefer—black or white.

Imagine the surprise of the duchess on perceiving that, in all subsequent entertainments of the season, the ladies wore odd gloves, corresponding with the colors of the dress.
