A FEW LAUGHS...SOME
TEARS...IT COST A
MAN'S LIFE...IT SAVED
A GIRL'S HAPPINESS.**

**Tuesday, June 14th
EDITH ROBERTS in
The Adorable Savage**

You surely remember her in "The Fire Cat." You remember what a vixen she was there, well, she is still the maddening, boisterous girl in this picture.

**COMEDY "WHO KISSED
ME"....International News.**

**Wednesday, Thurs-
day, June 15-16th--
Thomas Meighan in
'The Frontier of
Stars.'**

This is the first crook play he has made since "Miracle Man" and he has an even greater role in this production. In climbing over the roof-tops to escape the police.

He meets a cripple, a pure, innocent young girl, who changed the course of his whole life. Two fist fights, the flight over house tops and a fire are only a few of the big moments.

**Friday, June 17th--
ETHEL CLAYTON,
in "The Price of
Possession."**

This is Miss Clayton's latest contribution to the motion picture art and is considered one of her best endeavors.

**"THE FIERY TRAIL,"
Episode No. 4 of "The Purple
Riders."**

**LONG DISTANCE SERVICE
TO THE COAST.**

THE summer season at Oregon coast resorts will soon be here. It will soon be time to move the family to the cottage on the ocean beach. Long-distance lines to The Pacific Telephone and Telegram Company reaches all coast points—Seaside, Gearhart, Long Beach, Seaview, Cannon Beach, Newport, Tillamook, Rockaway Beach.

Why not reserve your cottage by long-distance, make your arrangements for the summer season by using Pacific Long Distance service. It will save you a trip to the beach and will be quicker and just as satisfactory.

Then plan to keep in touch with the family during the summer season by telephone. It is better than writing a letter and more satisfactory. Every effort is made to expedite calls by day or night. You will find the service quick, efficient and courteous.

Ask for Pacific Long Distance.

HOW ASIATIC TAME EAGLES

Spirits of Fierce Birds Are Broken by
Deprivation of Sleep for Long
Periods.

The Asiatic eagle is the golden eagle. It is a big bird, many pounds in weight, and exceedingly swift in flight, as well as fierce when attacked. Indeed, to see the natives on horse-back carrying golden eagles on their arms is a strange sight, for the birds are usually tame, when one considers how they are when free.

The eagle fancier has a problem in taming, much less training, a golden eagle. The eagle master does what an eagle frequently resists during the day. He binds to this place and ties a live rat there, trailing the rope into some hollowed stones to form a cavern in which he hides, snugly wrapping the rope.

When the attention of the soaring eagle is attracted by the rat, the eagle drops down and kills it. So tame is the greedy bird on taming his prey that he doesn't notice the dead rat is slowly being eaten along the rocks. When it is within easy reach the hunter casts a net over the eagle and secures him.

Kept absolutely in darkness, and with drums beating night and day so it cannot sleep, the spirit of the eagle is broken. When he shows signs of submission the trainer feeds him a little at a time and gradually wins his respect, if not his affection. With the passage of months the eagle attacks itself to the man who feeds and tames him.—Detroit News.

IGNORED WEALTH UNDER FOOT

Spanish Treasure Seekers Mocked by
Fate When They Overlooked
Vast Mountain of Iron.

Near Mercedo mountain, Mexico, a legend goes, Spanish soldiers slew an Aztec chief, who said that the hill was the richest mine of the Spanish Indies, and that it would someday avenge the folly of Spain. The incident was in time related at court, and the fine men and women there laughed over it.

Like the gold seekers who overlooked the fortunes that were under their feet in the wonderful soil of the English portions of the United States, the Spanish silver sleuths looked with unseeing eyes upon a naked, blood-colored hill worth more than all they were to take out of Mexico and Peru in a century. Mercedo used it to hang his name on, and roods away after the model he had come to regard as the only form of real wealth.

Just what effect the discovery of this greatest body of iron ore above ground in the world would have had, had the explorers grasped its real value, is hard to say. But there is hardly a more mocking incident in history than that of the Spanish soldiers, when Spain was surfeited with silver and destitute of iron, circling around one of the most perfect iron supplies on the face of the earth, and cursing their lack because they had found nothing of value beyond the mountains.

Ethics of Shoveling.

You can make a science out of anything. You may remember the old joke about the Irishman who said that Hogan was a good shoveler, but he wasn't what you'd call a fancy shoveler. A big plant that manufactures shovels has made a study of shovelology and has unearthed some interesting facts. For instance, a good shoveler should pick up a heavier load than 21 pounds. A good shoveler should not throw further than ten feet horizontally or eight feet vertically. Shovelers should have two ten-minute periods of complete relaxation every two hours. Shovelers should work in pairs, not alone. Two men together will shovel twice as much as two alone. Now, spit on your hands and go to it.—Cincinnati Enquirer.

First American Stock Market.

The first congress of the United States, while in session in Federal hall on Wall street, New York, in 1789-90, authorized and subsequently issued (then called stock) amounting to \$80,000,000 for the purpose of discharging debts incurred by the Continental congress and the various colonies. This naturally led to orders for the purchase and sale of these bonds being sent to New York. These orders first came to merchants, attorneys and others, but later, as the transactions increased, some men began to give special attention to this business, becoming the first brokers in America.

Water Affects Varnish.

The varnish, on some furniture is so hard and smooth that finger marks and soiled places may be removed with a cloth wrung out of lukewarm suds, made with white soap, and the finish restored by rubbing with a cloth, on which a few drops of light lubri-cating oil or furniture polish has been sprinkled. In many cases this is a good method to use on the tops of dining tables, but if it is in- wise to put water on varnished, oiled or waxed surfaces. Painted and enameled furniture may, of course, be washed like any other surface so finished.

Jud Thinkins on Economy.
Jud Thinkins says economy is like a piece of music. It may turn out fine, but the person who practices it can't be very entertaining for the time being.

Crops of Hawaii.

The two main crops of Hawaii are sugar and pineapples. The greater part of the land best suited to agriculture is in parts of the territory deficient in rainfall. This has made a large irrigation necessary. The imports for the fiscal year of 1919 were \$50,743,703. The exports amounted to \$38,250,021. Most of Hawaii's commerce is with the United States. Other products of the island are coffee, fruits, nuts, rice and hides.

HAS FAITH IN HIS "DUKE"

Only Patient Who Tried Snake Diet
Ever Improves Greatly, but Doctor
Holds to His Theory.

In providing medicine for the benefit of the natives, I worked out one theory in regard to leprosy, which is a fairly common ailment in the Archipelago. I asked myself why, since a snake sheds its skin, a man who is afflicted with disease should not be able to do the same thing.

In Singapore there was a rich Chinese leper, known as Ong Si Chew, who asked me repeatedly why I did not bring him some new remedy for his disease. I said he had a large amount of servants who took care of him, and his own carriage and sleds when he traveled, he was allowed to live untroubled by the natives; but he was very unhappy, because he had tried all the remedies of the native doctors and was steadily growing worse.

At last I told him that I had something that might help. He asked me what it was, but I would not tell him, when he insisted, I answered, "Snakes."

"Snakes?" he exclaimed, waving his arms in the air.
Then I explained my theory. The ability of a snake to shed his skin might be transferred to a human being if he ate snakes; and if so, the person would be able to shed his leprosy. Ong Si Chew did not care for the idea at all, but I told him it was worth a try, and I argued that a snake is much cleaner than an eat.

At last he consented, and I furnished him with a number of small pythons, with the instructions that they were to be killed and cleaned immediately before they were eaten. He was to eat them raw with his rice.
I left Singapore soon after that, and when I returned I found that Ong Si Chew had died. People thought it was a great joke on me because my patient had not survived the treatment, but I am far from being convinced that the cure will not work—or, at least, help to throw off leprosy. Ong Si Chew was in the last stages of the disease, and his case was not a fair test.—Charles Meyer, in Asia Magazine.

Polly Remembered Cyclone.

A parrot, named Polly Langston, died recently at the age of fifty-three. A native of Missouri Polly was a feathered prodigy whose remarkable talents included many vocal and linguistic accomplishments. She could sing and talk in English, as well as Spanish, her mother tongue; pray and sing several of the old familiar hymns, which she had picked up at church and social gatherings, besides having a wide repertory of conversational "small talk." At one time, when the circus came to her local town, and Polly had poured forth her sage salutations to the passing paraders, the attention of the late P. T. Barnum was attracted to her and a large cash offer was made for her, but her owner could not be induced to part with her. She remembered to her passing hour an event of her early life when a cyclone wrecked the town and brought death to scores of the inhabitants. Polly survived by a miracle, but for more than 40 years afterwards whenever the dark clouds gathered she became so frantic with fear that it was necessary to put her where she would escape the lightning's flash and the roar of thunder.

To Weigh and Measure Children.

To establish a standard table of the heights and weights of children, a conference of representatives of the United States children's bureau, the United States bureau of education, the United States public health service and various educational and private organizations working for the betterment of children has just been held in New York city. At the present time various tables of measurement are in use by the different organizations engaged in weighing and measuring children. The results of the tests are not comparable; also considerable confusion has arisen because of apparent differences in the standards of mental development as given out by the various organizations.

A complete standard table will be prepared by a committee, and all future weighing and measuring of children can then be in accordance with their uniform table. The findings of the tests will be comparable and much greater use can be made of the facts revealed.

HOW'S THE FARM FUNCTIONING?
You're not allowing the place to run down, the machinery to rest in a state of disrepair or the equipment to be replaced are you?
We think at the First National that these things enhance the value of a farm, as well as make its operation more profitable.
