Facts

about your crankcase

Road dust, carbon, fine metal particles and other impurities accumulate in your crankcase oil from engine operation.

The gritty oil circulates through your engine, impairing its performance, and ultimately leads to rapid depreciation and repairs.

Automobile manufacturers recognize this danger, and in their Instruction Books, carefully advise regular draining and flushing of the crankcase.

These important instructions are often disregarded; cleaning the crankcase is a job generally disliked.

To meet this need, Modern Crankcase Cleaning Service has been established by first-class garages and other dealers, co-operating with the Standard Oil Company. These garages and dealers use Calol Flushing Oil, — the scientific agent that cleans out old oil, dirt, grit and other impurities, and does not impair the lubricating efficiency of fresh oil used.

The cleaned crankcase is refilled with the proper grade of Zerolene.

The True Story of Aspirin

Aspirin is a useful chemical being prescribed constantly by skillful physicians for treatment of rheumatic affections, neuralgia, colds and certain types of fever.

Aspirin U. D. Co. Tablets are made by the United Drug Company, Boston, whose agents are the R.F. Exall Stores everywhere. The chemical used is always of the very highest grade and the tablets may, therefore, be depended upon with confidence to yield the maximum of beneficial results that may be expected from the use of Aspirin.

Fraudulently made Aspirin Tablets were put on the market by a Brooklyn concern. This has been exploited by one concern for the purpose of discrediting all tablets of Aspirin made by others. The public should know that we, as reputable druggists, have never handled any but Aspirin of the highest grade.

The Aspirin patent expired in 1917, and any one can now make Aspirin and sell it under that name. Our customers may depend upon it that Aspirin U. D. Company—sold at Rexall stores only—is everything that the most careful and skillful physician could demand.
