

# Tillamook Headlight

VOLUME XXXII

TILLAMOOK, OREGON JULY 21, 1921

NUMBER 38

## BUILDING PLANS MADE BY LEGION

### FUNDS FOR THE PROPOSED ESTABLISHMENT TO BE DERIVED BY LOCAL POST

### MEETING THURSDAY FURNISHES 'PEP'

### Ex-Service Men Long in Need of Meeting Place

Suggestions for an American Legion club house in Tillamook were received with enthusiasm by members of Tillamook Post recently. That the plan is feasible from a financial standpoint is the belief of many Legionnaires who feel that such a building would likewise awaken interest among former service men who have grown apathetic toward the organization.

While no plans have been adopted, or even considered, it is probable that the structure, when built, will contain, in addition to the quarters required for the various activities of the Post, a dance floor equal in size to any now in this vicinity. This, it is thought, will be the source of sufficient revenue to cover the ordinary expenses incident to the building.

Funds for construction of the proposed establishment are to be derived from dances and other forms of entertainment. Under the leadership of Ira W. White, present commander of the Post, a Legion orchestra is now in process of organization and it is probable that it will be prepared to furnish music within a reasonable short time. Efforts are also being made to secure a dancing pavilion at the County Fair grounds to be operated during the fair week on a percentage basis. It is thought that dancing will prove more of an attraction at the fair than many of the amusements to which concessions are granted, and probably be more profitable to the county. In previous years, dances given in the city limits have drawn people from the fair rather than to it. A series of dances to be held in this city during the fall and winter months is also under consideration.

In the meantime a committee has been appointed to investigate possible building sites for the proposed building. Several hundred dollars are now available in the Post treasury and it is thought that this amount can be materially increased. Some saving in construction will be incurred through donations of labor by members of the Post.

Lack of proper quarters is largely responsible for the determination of the Legionnaires to secure their own building. Practically ever since its organization, the Post has been moving. Only on rare occasions have two successive meetings been held in the same room. Meetings have been held in the Court house, the Tillamook block and various parts of the city hall from the council chamber to the gallery of the auditorium and the Post has as yet no permanent place for its records.

## SOUTH AMERICAN ASKS FOR PAPERS

The application of John Zweifel, a native of Switzerland, with present residence at Mohler, this county is the first case on record of an applicant coming from South America to Tillamook county. Zweifel was born in Glarus, Switzerland, and when only six years of age, his parents removed to Brazil, later emigrating to the United States. The applicant is 18 years of age, and last Tuesday took out his first papers. Three years from that date he may become a citizen in fact, provided he passes the examination, which he probably will as he has passed the 8th grade in the public school, and his first examination was reported by the County Clerk as being highly creditable.

## WEDDING BELLS Pioneers of Tillamook County United in Marriage

On Wednesday afternoon of this week at the M. E. parsonage, July 20th, 1921, by Rev. C. L. Davis, Mrs. Ethel Lommen and Mr. George Loerpel, both of Mohler, Tillamook county, were united in marriage. Both of the contracting parties are old pioneers of this county, and a host of friends will be pleased to hear of the marriage. The bride is well and favorably known, and the groom was formerly County Commissioner of Tillamook county, and has for years been prominent in county politics and improvement projects.

## COUNCIL MEETING HELD MONDAY

### Routine Matters Gone Over During Regular Session

The Council met the early part of the week in regular session, all members being present but Fred Christensen. The following proceedings were had:

Ordinance No. 413 was passed, vacating an alley in block 5, of Lincoln's addition.

Ordinance No. 414 was read a first time, and provides for the vacation of a small triangular tract of land adjacent to block 33 of Thayer's addition.

The committee on Police and Health was instructed by the Mayor to investigate several premises reported to be in an unsanitary condition, and to report their findings at the next regular meeting.

Considerable time of the Council was spent in discussing the matter of the plumbers' license fee, but it was finally decided to enforce the provisions of ordinance No. 409, which provides a license fee of \$25 for Master plumbers and \$10 for apprentice plumbers.

## CHEESE MARKET IN BETTER SHAPE

Carl Haberlach states that the price of Tillamook cheese has been advanced two cents a pound, this being made possible by an advance in the Wisconsin market.

Triplets are now selling at 22 cents, while Tillamook Longhorns and Young Americas are bringing 23 cents on the market.

That the cheese market is improving is evidenced by the fact that the Association now has about five thousand boxes of cheese in cold storage, as against something like 8,000 boxes on hand three weeks ago.

It is expected that the June checks will be out about August 15, and it is desired by the Association that cheese now in storage be sold before payment is made for the June milk.

## ELECTION LAWS DISREGARDED

Mrs. Stella Perry of Hemlock was seeking information from the County Clerk Wednesday regarding the election laws, and particularly upon registration. It seems that the Clerk had returned to her precinct several cards which had been incorrectly filled out, or corrected. Mrs. Perry is on the election board in Carnahan precinct, and laughingly stated that she believed she "was in for life," and therefore sought more information. The Clerk complimented her for the interest she was taking in her duties. Clerk Brimhall says that much confusion in elections could be avoided if the voter, upon leaving his precinct or county, would get a card from the county clerk of his county, showing where he voted previous to his removal. Such a card in the voter's possession would avoid registration, provided the voter had exercised his voting privilege within two years last past.

## 1117 COWS AVERAGE 1031 LBS. OF MILK

The Tillamook Cow Testing association tested 1117 cows during the month of June, with an average yield of 1031 pounds of milk and 41 pounds of butterfat. A high grade Guernsey cow owned by P. J. Sharp was the high cow producing 1499 lbs of milk and 97.54 pounds of butterfat. The highest average production for an entire herd was 1302 lbs of milk and 61.41 pounds of butterfat, made by the grade Jersey herd owned by Clyde Kinnaman. There are 48 members in the Tillamook association, 47 of whom have registered dairy sires at the head of their herds.—Oregon Journal.

## ROCKAWAY BAND ORGANIZED

The Darby and Winsen orchestras have united for the summer and will hold a concert every Sunday morning at 11:30. They will also play at picnics.

Dr. James Wiley, a well known Portland physician, was in Tillamook for a day or two the latter part of last week.

## COUNTY DAIRY INSPECTOR'S WORK OF CONSIDERABLE EXTENT IN COUNTY

### PROBABLE TOTAL NUMBER OF DAIRIES THIS YEAR IS GIVEN AT SEVEN HUNDRED; SAID TO BE 14,000 MILK COWS IN COUNTY AT PRESENT TIME

### DUTIES TAKES INSPECTOR TINNERSTETT TO ALL PARTS OF TILLAMOOK COUNTY

### Inclination Of Tillamook Farmers Seems To Be Toward Cleanliness And Sanitary Barns

Few people, outside of Tillamook county, have anything like an idea of the magnitude of the dairy industry in this county. In this county alone are fourteen thousand dairy cows, and we learn from Dairy Inspector D. R. Tinnerstett this week, that the total number of dairies in this county will this year total seven hundred, and a further matter of pride to the county is the fact that ninety per cent of the dairy buildings are painted white—emblematic of the cleanliness and sanitation that should exist inside the building, and right on this subject, we have Mr. Tinnerstett's statement that Tillamook dairymen are believers in sanitation in the handling of milk, and practice what they believe.

The Dairy Inspector travels all over Tillamook county in the discharge of his duties, and it is his business to look for the things that constitute uncleanness in the production and handling of milk. He is under the authority of the State Food and Dairy Commissioner, and makes a monthly report of conditions, improvements etc., to the head office at Portland.

Many of the dairymen in this county are now cooling the evening milk, and the idea is growing in favor, inasmuch as this process stops bacterial growth, and secures a better milk test.

Inspector Tinnerstett states that 1921 will see fully twenty-five new and modern barns in this county and had it not been for the sudden drop in the price of cheese, double that number would have been built. But even the twenty-five new barns sound good, and it shows that the dairy business in this county lacks a great deal of being at the peak of its progress.

Natural climatic conditions favor this section, and it is a matter of almost common knowledge that the salt atmosphere of the coast country is factor in the production and excellence of Tillamook cheese, which has come to have a national reputation.

## NETARTS PAVEMENT SOON COMPLETED

The concrete pavement between the Trask and Tillamook bridges, on the Netarts road, contracted by F. C. Feldschau, will, it is believed, be completed by Saturday of this week, or by Monday, at the most. The contractor was delayed several days this week by the failure of a carload of lime to arrive.

The G. A. R. ladies are planning a picnic to be held at Rockaway in the near future.

## LIFESAVERS SAVE YOUNG CANOEISTS

### Boys Who Attempt To Go To Sea In Canoe Meet Difficulties

Last Monday afternoon, two young men still in their teens, launched a canoe near the Life Saving Station at Barview, and undertook to navigate the breakers. They managed to get out all right, but finally a big roller came along and upset the canoe, throwing the occupants, J. L. Conley and Christie Lovely, into the sea. Fortunately the accident was seen by a lookout at the Station, who undertook to swim out to aid the boys. He soon abandoned the attempt, however, and joined the lifesaving crew, who launched the power boat and went to the scene of the accident. In just twenty-five minutes from the time the alarm was sounded, the boys were picked up, both unconscious. Considerable work was required to resuscitate Lovely, one of the boys, but a phone statement by Captain Farley is to the effect that both boys are now all right. It seems certain that the youths will not attempt to navigate the lordly Pacific in a canoe any more. They will do well to remember the old saying originated by Ben Franklin: "Small boats should keep near shore; larger boats may venture more."

OREGON AGRICULTURAL COLLEGE, CORVALLIS, JULY 19th — Tillamook county is represented in summer session registration of 1921 at the college by 12 students. Thirty-two counties of Oregon are represented, 15 other states, and six foreign countries. Eight hundred sixty-nine students hail from points in Oregon.

Registration includes 565 regular students, 221 club boys and girls, and 228 persons taking swimming only. Benton leads among counties with 443, Multnomah coming second with 88.

## BARVIEW BOOMING

Dr. W. A. Wise reports that fifteen two-roomed cottages have been completed this season at Barview, beside about fifteen tent houses.

Eight or nine of the new houses are now occupied, and tourists are coming in at a good rate the past few days.

## MILL PAYROLL OVER \$17,000

### Large Orders Being Filled For California Points

A payroll of seventeen thousand dollars per month is a very nice thing to have in a town like Tillamook every month, in addition to other payrolls. The Coates Lumber company last month paid out to its employees the above amount, and it is quite likely that the present month will average about as much as the last. In round numbers 140 men are on the company's payroll at the present time.

The company is filling some large orders for California points, and on Monday last shipped two cars to Illinois and Wisconsin. The lumber output on this Coast is said to be about 50 per cent of the cut in normal times, and seems to be steadily increasing.

## SWIMMING TANK PROVES POPULAR

A crowd of Tillamook people who journeyed to Bayocean with Capt. Dodge last Sunday reported the natatorium to be in fine condition. The tank has been completely filled with water this year and the temperature of the water is about 80 degrees.

The natatorium remains open all day Sunday this year and patrons are allowed to eat their lunches upon the beach or to enjoy the surf returning in the afternoon without extra charge.

A band concert will be a feature next Sunday at the natatorium and in all probability it will be a weekly event in the future.

## NEW MANAGER AT HATCHERY

A change in the management of the state salmon hatchery up on the trask will soon take place. R. E. Wilson who has had charge of the hatchery for some time past, will leave in about two weeks to take over management of the state hatchery at Tidewater, on the Alsea river about twelve miles above Waldport, in Lincoln county. Mr. Wilson's successor will be J. C. Pollock, who will come from the Alsea hatchery to take charge here. Mr. Wilson has given good satisfaction as manager in this county, and his successor also comes well recommended. Millions of salmon fry are being fed three times daily on canned salmon, which were originally put up for consumption by the American soldiers during the World war. While the stomachs of the American soldiers refused to digest the canned stuff "over there", the young salmon seem to thrive on it.

W. E. Bell of Beaver was in town Saturday on business.

## ADJOURNED MEETING OF CIRCUIT COURT

### HOUSER SENTENCED TO A YEAR IN PRISON AND A FINE AND COSTS

### QUIET SESSION HELD LAST TUESDAY

### Next Regular Meeting of Court To Be Held in October

Circuit Court Convened Tuesday morning with Judge Geo. R. Bagley on the bench, and Court Reporter Runyon in attendance. No jury cases were tried at this term.

Following is a list of the cases disposed of:

Coral L. O. Pollock vs. Lyle V. Pollock; decree for plaintiff.

In the case of August E. Grosky vs. Leona R. Grosky; decree for Grace E. Williams vs. Preston Williams, suit for a divorce; decree for plaintiff.

Eugene Atkinson vs. A. N. Wood et al, action to recover money on an alleged promissory note, wherein the defendants had bought a Cleveland tractor from plaintiff. Both sides waived a jury trial and the case was tried before the court. Webster Holmes appeared for the plaintiff and Barriek & Hall for the defendants. At the conclusion of the trial the Judge took the case under advisement and will render a decision within a few days.

At this time came on the case of J. Houser, a young man of Wheeler, who had been indicted on two charges of larceny by bailie. Houser was arraigned and pled guilty to simple larceny in each case. The court sentenced the defendant to twelve months imprisonment in the county jail also imposing the costs of both cases. On the second charge the defendant was sentenced to pay a fine of \$50 and was paroled on condition that he pay a \$50 fine, and the costs in both cases. Parole contingent upon good behavior. On his failure to pay the fine and costs, it was ordered that he be caused to serve one day in jail for each two dollars of fine and costs. It is understood that the young man's father, who is a prominent citizen of the Wheeler section, will come to his son's aid in the matter of the payment of the fine and costs.

Judge Bagley was busy considerable of his time in hearing motions and demurrers, which helped to clear up the docket of business that otherwise would have occurred at the coming October term.

Court adjourned Tuesday evening to the October term.

## BLAINE RESIDENT IS APPOINTED

W. H. Edson, of Blaine and James Imhah, Hebo, have been appointed state fire wardens with authority to issue burning permits for the Blaine districts. They will work with Mr. Shelley, Federal Supervisor, of Eugene.

The appointment took effect after County Agriculturist W. D. Pine, in conjunction with the Blaine Grange, took the matter up with State Forester F. A. Elliott. In the past two years there has been no one whom the ranchers could reach at the proper time for burning. Mr. Edson has had charge of the Blaine district for several years but was not authorized to issue burning permits for the last two. It is hoped all the slashings in this district will be burned this year.

## CHINA PHEASANTS LIBERATED

Gene Simson, superintendent of the state game farm at Corvallis, and our local game warden G. W. Ensell liberated 200 Chinese Pheasants between Beaver and Tillamook Sunday. They let 75 go at Beaver, 25 at South Prairie, 50 at Hunt's bridge and 50 at the Fair grounds. They were brought in from Corvallis.

Court Reporter Chas. E. Runyon will leave for a trip through Yellowstone Park with his family immediately after the adjournment of the present term of Circuit Court at this place. The trip will be made by auto, and the popular court official is figuring on a very pleasant vacation.

Jesse Edwards and family of Newberg are spending the summer at their cottage at Rockaway beach. Mr. Edwards spends a portion of his time looking after business interests in Tillamook.

F. C. Eech and family spent Sunday at Rockaway.

## The Port of Missing Men
