The Biggest Improvement Yet Made In Milking Machine

For compactness, simplicity and reliability the Perfection Electric Milker has no equal. You can install it in an hour. Any farm electric light plant runs it. No piping to buy or install, no gas engine to bother with, no line shaft to put up, no belts to buy. Just stretch the wire cable over the cows for the power unit to run on, fasten up the reel for the extension cord, plug into a lamp socket, turn the button and milk. Nothing to get out of order. The test cups, the quality aluminum pail and the "Nature's Way" milking action are the same in the Perfection Electric as in the old reliable Perfection Milker.

The Perfection Electric will save money for you.

Come and see it work.
