

REPORT OF CREAMERY ASS'N

(Continued from page 2)

Tillamook County has shown a steady advancement, not only in production but also in improvements in and around the dairies; and especially in the methods of handling and caring for the milk at the dairies before it is sent to the factory.

In the County we have 29 cheese factories, 27 making American cheese and two Swiss and Limburger.

Of these, 25 are operated under the supervision of the Tillamook County Creamery Association, the other four being small private factories where one or two dairymen make up their own product.

These factories are, for the most part, in modern buildings and are clean and neat. One of these plants, completed in the past year, is considered one of the most modern factories on the coast.

There are 752 dairies in the County of which 734 are patrons of Association factories.

The average score (as per score card,) which includes all equipment in and around the dairy, and methods, is 63.2, the highest being 92 and the lowest 24.9.

There are 13,480 dairy cows in the County. 784 of these are pure-bred and registered. They are of good breeding, four having made world's records in their class.

There are 630 sties of which 440 are registered. The remaining 190 are grades and scrubs that would help make up a good train of "just bulls" out of our valley. Where the selection has not been made with care, it would be wise to include a few pure breeds in the same shipment.

340 condemnations were made during the year, as follows: Two factories, of which one has been replaced with a new building and the other is being remodeled at this time; 8 barns, 6 milk houses, 3 milking machines, 214 milk cans, 69 milk pails and 38 strainers.

78 lactometer tests were run and only in one instance did milk show adulteration, and then only very slightly.

The 24 hour, or acidity test, where samples of milk are taken at the factories and allowed to stand for the above period of time and then mixed with a weak Alkali solution to determine its purity, has been found very effective and will be used extensively during the coming season. The old reliable sediment

test will also show to the patron how the milk is as to cleanliness. 96 per cent of all interiors of dairy barns are whitewashed and nearly the same percentage of evenings' milk is cooled either by cooler or by tanks of running water.

While there are many, one of the most common causes of poor and off-flavored milk is careless washing and cleansing of utensils. Cans that are allowed to stand for some time with whey or milk dried on the sides, and are then given a "lick and a promise" for a washing, are sure to bring grief to the patron by having milk rejected at the factory or by the manufacture of a batch of those unwelcome No. 2 cheese.

A successful dairyman not only aims at increased production but at all times strives to improve the quality of the product.

To produce milk of good quality there are some essentials that must be observed, namely: cleanliness, well lighted stables and milk rooms, plenty of fresh air, and prompt cooling. The one outstanding essential is cleanliness.

The dairy records of Tillamook County have been broken again in the past year both in quantity and quality.

They are all solid rungs in the successful dairy ladder. Let's climb.

Alder Vale Creamery

The factory received during the year \$75,774 lbs. of milk. There were 33,624.03 lbs. of butterfat in the milk, an average test of 3.83 per cent.

91,200 lbs. of cheese were manufactured, making 1,291 boxes. The average yield was 10.41 lbs. of cheese per 100 lbs. of milk and 2.71 lbs. of cheese per lb. of butterfat.

Cheese sold for \$21,868.38. The average price was 23.97 cts. Tillamook.

The company received for making during the year \$5,592.02. Operating expenses during the year were \$4,271.72.

Following is a financial statement at this time:

\$28,199.96

Sand Lake Creamery Co.

The factory received during the year 561,429 lbs. of milk. There were 23,885.29 lbs. of butterfat in the milk, an average test of 4.25 per cent.

63,743 lbs. of cheese were manufactured, making 894 boxes.

INSPECTOR'S REPORT

Table with columns: Seconds, Trips Y.A.'s H's, Trips Twins No. Y.A.'s Til-Horns, No. 3 'mook. Lists various dairies and their production statistics.

Of the above 1252 Triplets, 145 Y. A.'s and 48 Horns are reported as seconds. This represents .0423 of the total cheese made and is less than 50 per cent of the quantity of seconds made in 1920 and as a matter of comparison is less than 17 per cent of the amount made in 1918.

The report shows that six makers have completed the year without seconds and 8 had but one vat, which is by far the best showing ever made.

Upper Nestucca Cheese Factory

The factory received during the year 775,192 lbs. of milk. The milk contained 30,842.57 lbs. of butterfat, an average test of 3.97 per cent.

84,441 lbs. of cheese were manufactured, making 1,186 boxes. The average yield for the year was 10.89 lbs. of cheese per 100 lbs. of milk and 2.73 lbs. of cheese per lb. of butterfat.

Cheese sold for \$20,083.55. The average price was 23.78 cts. Tillamook.

The factory received for making during the year \$4,434.26. Operating expenses were \$3,425.32.

Following is a financial statement at this time:

Assets table with columns for Building, ground and equipment, Supplies on hand, Stock in Creamery Assn., 1922 expenses paid, December making account, Due for cheese, Cash in bank.

Liabilities table with columns for Capital stock outstanding, Due bank, Surplus.

\$4,364.20

\$4,364.20

Miami Valley Creamery Co.

The factory received during the year 892,986 lbs. of milk. There were 39,008.01 lbs. of butterfat in the milk, an average test of 4.36 per cent.

105,297 lbs. of cheese were manufactured, making 1,483 boxes. The average yield during the year was 11.79 lbs. of cheese per 100 lbs. of milk and 2.69 lbs. of cheese per lb. of butterfat.

Cheese sold for \$24,151.38. The average price was 22.93 cts. Tillamook.

The company received for making during the year \$5,481.52. Operating expenses were \$4,655.87.

Following is a financial statement at this time:

Assets table with columns for Building, grounds and equipment, Supplies on hand, Stock in Creamery Assn., Cash in bank, Due for cheese, 1922 expenses paid, December making account, Advanced to patrons.

Liabilities table with columns for Capital stock account, Due bank (4 per cent note), Surplus.

\$4,863.16

\$4,863.16

South Prairie Creamery Co.

The factory received during the year 4,296,414 lbs. of milk. There were 171,583.49 lbs. of butterfat in the milk, an average test of 3.99 per cent.

468,421 lbs. of cheese were manufactured, making 6,536 boxes. The average yield was 10.90 lbs. of cheese per 100 lbs. of milk and

factured, making 894 boxes.

The average yield was 11.35 lbs. of cheese per 100 lbs. of milk and 2.66 lbs. of cheese per lb. of butterfat.

Cheese sold for \$14,668.93. The average price was 23.01 cts. Tillamook.

The factory received for making during the year \$3,797.97. Expenses of operation during the year were \$2,912.26.

Following is a financial statement of the factory at this time:

Assets table with columns for Building, grounds and equipment, Supplies on hand, Capital stock in Creamery Assn., December making account, Due for cheese, Advanced to patrons.

Liabilities table with columns for Due bank, Capital stock account, Surplus.
