NON-HEADACHE **DU PONT** NON-FREEZING

PACIFIC STUMPING POWDER

The first guncotton-nitroglycerin dynamite without a headache

PACIFIC Stumping Powder is the first nitroglycerin dynamite put on the market that can be used with a certainty that no headache will result.

Couple with this feature its extreme economy—130 sticks for only 50c more than 85 sticks of standard stumping powders—with equal strength to the latter, stick for stick, making it cost 2 1/2 cents (30%) less per stick than any stumping powder. Then add its non-freezing feature. These advantages make it certain that Pacific Stumping Powder will be the choice of the farmers in the Northwest for all farm purposes—whether blasting stumps or boulders or planting trees.

Come in the next time you are near our store and let us estimate the cost of your blasting work. We can show you the way to cut your dynamite costs nearly one-half.

The Danger Point

in trying to save on painting

Repairs Cost More Than Paint

WHEN the paint on your property begins to check and crack, it is time to paint again. Unless your house is protected by a smooth, elastic film of durable paint, decay will set in and rapidly depreciate it.

Decay is expensive and wasteful. Price lumber alone, to get an idea of what it will cost to repair or rebuild. Paint saves this cost.

The best paint is the most economical in the long run. It spreads easily—saves labor cost. It covers a larger area per gallon than "cheap" paint.

But most important, the best paint serves five or more years longer than "cheap" paint.

We have been making the best paints for 73 years. They are scientific in formula and preparation. They meet the weather conditions in the West.

They contain the finest materials—PIONEER WHITE LEAD, pure linseed oil, pure zinc and pure colors—combined scientifically in exact proportions. They are the best paints we know.
