

Ask your neighbor about his Special-Six

The SPECIAL-SIX should be the best car in the world for the money. It is a car of great engineering and manufacturing resources—millions of dollars in factories and machinery, and 70 years of manufacturing experience. With these resources concentrated exclusively on the building of six-cylinder cars, it is no longer wonder that Studebaker produces a car of such intrinsic value as is represented by the SPECIAL-SIX.

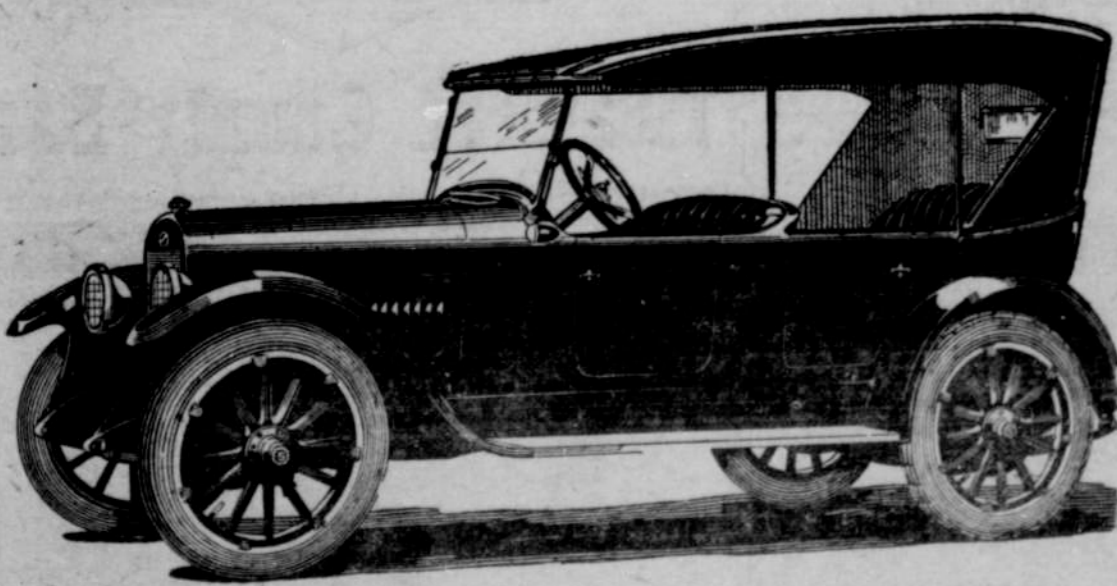

It is the Studebaker policy of giving the greatest dollar-for-dollar value that has built its business from a modest beginning to its present position as the world's largest builder of six-cylinder cars. We urge you to see the SPECIAL-SIX—drive it, put it to any test. Ask your neighbor's opinion of his Studebaker. Compare it with any other car within hundreds of dollars of its price. Then you will know why it is the most popular motor car on the market today.

No wonder every Studebaker sells another

No car is better than its chassis

No chain is stronger than its weakest link—no car is better than its chassis! If you could watch every detail of manufacture of the LIGHT-SIX pressed with the precision that marks every operation. With Studebaker, quality comes first—then quantity, afterwards. Six hundred and eighty inspectors, guided by delicate gauges and measuring instruments, make 9500 inspections during manufacture.

Some of the gauges used in Studebaker inspection are accurate to one half of one-thousandth of an inch. Less than the thickness of tissue paper. Precision like this protects you against imperfections—and protects the great name of Studebaker which has been a synonym for quality for seventy years. A ride in the LIGHT-SIX will impress you with its quality—long service will prove its dependability.
