Mrs. J. C. Holden presented 36 of her piano students in a piano recital and demonstration of the Dunning system of foundation training to a large audience May 24th.

These pupils demonstrated with ease to a large audience their thorough understanding of harmony, rhythm, ear training etc.

There ear training was particularly interesting as in the dictation given them was in 7 sharps which they immediately recognized and every tone was written down on the Blackboard with its proper tone value. They recognized the tones and intervals in the Bass as easily as in the Treble.

These little people wrote for one hour on the Blackboard demonstrating the fundamental principles of music.

The recital part of the program was particularly interesting from the number of duets, trios and double trios as these demonstrated their careful training in ensemble playing also excellent memory training. The double trio by six little girls was recalled and they responded in a very pleasing manner.

The piano solos showed fine technical training and intelligent interpretation of each composition. It was pleasing to notice the number of boys on the program. They plan an interesting recital next fall.

THE COUNTY PAYROLL IS REPORTED BIG

On account of the election boards and the increased amount of road work during the month of May, the county payroll has almost doubled in size, reports Clerk Brimhall. Quite a number of the road workers, however, have quit their employment here and have gone to other parts where they can earn more money, it is said.

NEW ROADS TO BE OPENED VERY SOON

The Moore cutoff on the main highway south of this city will be open for traffic this week, say road officials. The Condor bridge will be open to the public in about ten days, though some traffic has already crossed here. The extraordinary weather has been the cause of the good condition of these projects.
