When The Tinker Came Along

Remember when you used to watch the "tinker man" mend the holes in your mother's pans? Solder was the metal used—and solder is a product of lead.

Countless other products of lead add to the comfort and convenience of your daily life. In your automobile, for instance, there is lead in the battery, bearings, glass of the headlight lenses, the rubber tires, the paint, and in the rubber mat on the step.

But more important than all these is the use of white-lead as the principal factor in good paint. The more white-lead any paint contains, the greater its protective power and its durability.

We, therefore, use straight "lead-and-oil" paint, made of the well-known "tried and true"

Dutch Boy White-Lead

and pure linseed oil—for both interior and exterior work. Any color desired obtainable.

Now is an ideal time to have that interior or exterior job done—"Save the Surface and You Save All." Let us estimate on your work—no obligation incurred.

- In arriving at this decision the judges will allow one point for each correct word. A margin of 15 incorrect words will be granted to each contestant to allow for a possible legitimate difference of opinion; but each incorrect word above that number will count one against.
- If two contestants tie for first place the first and second prizes will be divided between the two pro rata according to their class. The next highest will receive the third prize, etc. If three tie for first place, the first, second and third prizes will be divided between the three in same manner, etc., etc.
