LOCAL HAPPENINGS

Florence E. Kamph of Tillamook is staying at the P. Office apartments at Rockaway.

The ocean waves at Lake Lytle are so wild this season that many visitors have to sneak up on them in the dark. This is one explanation of numerous bonfires that have helped sojourners at this lovely summer resort to while away the soft Indian summer nights.

Mr. and Mrs. George Russell of this city were week end guests at Lake Lytle recently.

Mrs. Burl Clements and son of this city were recent vacationists at the Blair cottage in Twin Rock.

The Terry, Grate, O'Neil, Robinson hunting company returned from south of Roseburg late Saturday night with seven deer.

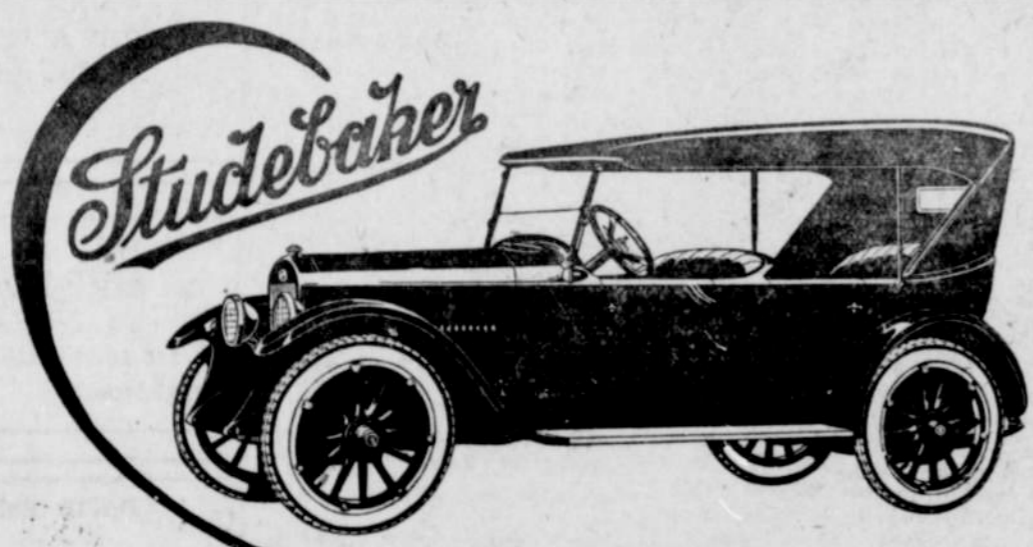

Adam Schmelzer and wife were in Tillamook last Wednesday on a business trip. Mr. and Mrs. Schmelzer own one of the finest dairy farms near Beaver.

Dr. J. E. Reedy and family were enjoying the beach at Rockaway last Sunday.

C. H. Coe and wife were Sunday visitors up the beach, taking dinner at the hotel Lake Lytle.

David Gregoire of Portland was here the first of the week. Mr. Gregoire is with the Equitable Savings and Loan Association and reports a very good business in these parts.

Mr. and Mrs. C. W. Barrick and Junior returned the first of the week from a trip thru the Crater Lake National Park and a visit to

So far this year Studebaker has built and sold more cars than during the entire year of 1921. And 1921, in spite of a general business depression, was the biggest year in Studebaker's 70 years' history.

This steady volume of business, plus the savings resulting from Studebaker's methods of complete manufacture, reduces manufacturing and selling costs. And it is a Studebaker policy of long standing to share these savings with the customer. Hence, the new low prices.

WILLIAMS & WILLIAMS

THIS IS A STUDEBAKER YEAR

At 3000° F.—What?

As your motor begins to "warm up," what happens to the oil? It thins, of course. But just how does it thin and how does it act when subjected to the high operating temperatures?

Upon the answer to that question depends the proper lubrication of your car.

Zerolene, being made from selected crudes and scientifically refined by our patented vacuum process, resists engine heat; it retains its lubricating "body" at all operating temperatures. It does not decompose or "break down." It clings to the bearing surfaces and maintains a perfect film of lubricant.

A Minimum of Soft, Flaky Carbon

If the motor is getting proper lubrication, some oil slips past the pistons and is consumed by the flame of combustion. In burning, all oils deposit carbon on the cylinder walls and cylinder heads. Inferior oils deposit a hard, gritty carbon in considerable quantity.

It is this hard carbon deposit which causes pre-ignition, breaking and sticking of cylinder rings, overheating, loss of power, warping and splitting of exhaust valves, and wear of valve stems.

Zerolene deposits a minimum of carbon of a soft, flaky nature which can do no damage and is usually blown out with the exhaust.

Lubricate exclusively with Zerolene, adopting the recommendations embodied in the Zerolene chart of recommendations, and you will develop the maximum power, speed and gasoline mileage of your car.

AN APPRECIATION

We are pleased to take this opportunity of expressing our appreciation and thanks to the citizens of Tillamook for their able assistance in helping to remove our furniture fixtures from the banking room, especially wish to congratulate Fire Boys on the efficient manner in which they handled the fire in building last Monday.

Gentlemen we thank you.

JUDGING from the present demand for Revere 30 x 3 1/2 Tires, every man who bought Reveres at \$10.90 this spring must have told at least five other motorists how downright economical they are.

Never since the first tire was made has there been such tire value offered to car owners.

A whale of a money's worth in this "R" Tread Revere at \$10.65. You'll say so, too.
