23 SERIES STUDEBAKER LIGHT-SIX TOURING CAR 9975

Judged solely on what you yourself can see—its beauty of line and finish and its many refinements—the 23 Series Studebaker Light-Six Touring Car will merit quick approval.

But go deeper than that. Fine appearance is only one of the essentials you want. Judge it on its hidden vital qualities that make for long life, extra service and certainty of operation.

For example, the crankshaft and connecting rods are machined on all surfaces. This practice, which is followed exclusively by Studebaker in the low price field, virtually eliminates vibration.

The striking body is all steel, even to the framework. Seats are wide and deep. The one-piece, rain-proof windshield provides unobstructed view of the road ahead. The cowl ventilator is opened or closed in a moment. Attractive cowl lights are set in the windshield base—and there are many other features.

The reputation of the Light-Six is firmly established. One hundred thousand owners have experienced its satisfaction in performance, durability, economy, comfort and convenience.

ALFALFA AND CORN

An experiment covering a period of six years, conducted by the University Dairy Farm of Illinois shows conclusively that no other crops grown will produce as much milk per acre as alfalfa and corn. 6 tons of alfalfa, 75 bushels of corn and 30 tons of carrots is a fair yield per acre in the Burbank Irrigation District. This together with a mild climate, splendid transportation facilities and a good market makes an ideal place for dairying. Land prices reasonable and terms easy. Write for particulars. Burbank Irrigation Dist. No. 4, Burbank, Washington.—Adv.
