You will find this to be true

That your automobile lubricated with Zerolene will run from 25% to 50% farther without needing to have its valves ground or cylinders rebored. This is so because Zerolene forms so little carbon.

That you will get more mileage from your gasoline, because Zerolene, giving better lubrication continuously, permits the delivery of more engine power to the wheels on the ground.

That Zerolene will reduce your repair expense to a minimum and give you greater satisfaction in driving.

Therefore we say, "Insist on Zerolene—a better oil—even if it does cost less."

LILLIAN TINGLE, SAYS

In answer to an enquiry regarding diet:

"Then probably you could use more milk to advantage. You mention only two quarts daily for two children and two adults, one of whom is trying to gain weight. The children would do well to have a quart or nearly a quart each, and you should have a pint at least for yourself and from a pint to a quart (according to his special needs and his assimilation) for your husband. Then with the increase of milk you can easily cut down your meat and egg bill.

"A good rule to remember is that for every extra half pint of milk used in the daily diet the other protein foods, such as meat, eggs, fish, cheese, may be reduced by two ounces without any dietetic loss. Milk is usually the least expensive and the most easily served and assimilated of all the protein foods."
