

NEW GRAND RONDE IS GROWING TOWN

The town of New Grand Ronde is growing fast. A few months ago, it was a mere hamlet. Among improvements there is a new \$40,000 hotel, and other business buildings, that have gone up in the past year. It is essentially a logging town. The Spaulding, Miami Lumber Co. employs 500 men, and a railroad from Willamina runs back into the big timber a distance of nine miles, where big logging operations are in progress. A mail stage from Grand Ronde is operated between that place and Tillamook by Martin and John Jenck of this city. It goes daily, except Sundays.

TO THE PUBLIC IN GENERAL

I wish to contradict the statements made by Dr. Shearer, Mrs. Merrick and their lawyers in the courtroom during the trial of the State vs. Shearer, October 4th, that my late wife was filthy either in her home or about her person. That is a lie gotten up by unscrupulous persons to defame a dead woman. Why need a lawyer, even for money, use such un-speakable language in defending anyone? Did he suppose for a minute that any jury in the land would allow themselves to be influenced by a man whose only arguments were rotten dirty lies? Furthermore I will be glad to have anyone who wishes to visit my home where I am taking care of my family alone, to see conditions and judge if things were filthy as they said. I sign my name gladly to this. LOUIS KRAKE. —Adv.

GET-TOGETHER PARTY HELD BY HIGH SCHOOL

The mixing party for pupils and faculty that was held in the gymnasium Friday evening was a pronounced success. Approximately one hundred and fifty persons were in attendance. Much credit is due the president of the student body, Wanda Haltom, and the committees who planned the evening's entertainment. Mrs. Hanson and Miss Mixer were the faculty members who assisted in making the party a success. The members of the entertainment committee were Cordelia Outfield, Lewis Anderson, NeVelle Smith, Marion Lamb, and Elizabeth Mowry.

The members of the refreshment committee were Nadine Williams, Noah Richards, and LaVelle Baker. During the evening each class staged an interesting stunt. The Freshmen, with their Lochinvar pantomime in which Camille Haltom was reader, was perhaps the most deserving of mention. The Sophomores staged a vaudeville in which they had a slight of hand performer in the person of Charles Thomas. Marjory Chance astounded the onlookers by her heavy weight lifting. Elizabeth Neff proved herself quite a promising ballet dancer, while Lester Mackinster appeared favorably as prima donna of no mean degree. Merle Frisbie led the Sophomore orchestra in two brilliant numbers.

The Juniors presented a skit in which Otis Wright was surgeon, Wanda Haltom nurse, and Marion Lamb patient. Dr. Wright illustrated some of the more recent and advanced methods of surgery.

The Seniors responded by giving a Darkey debate in Negro color and dialect, the presiding officer being Noah Richards. The question involved was, Resolved, That it is right for Negroes to steal chickens. The affirmative speakers were Eugene Hamrick and Victor Mathews. The negative speakers were Joseph Maxwell and Homer Blum. Each side presented conclusive evidence to the degree that each person must decide the momentous question for himself.

The Seniors with the advice of Mrs. Heyd, have selected, "Why Smith Left Home" as their class play, and tryouts for parts will be held this week. Warren Foland has been elected general manager of the student body to take the position made vacant by the resignation of Wesley Tippin. Work on the high school annual has begun with the following staff officers: Editor in chief, Joe Maxwell; assistant editor, Fern Brownlee; general manager, Eugene Hamrick; assistant general manager, Marion Lamb; society editor, Arline Heyd; local editor, Lulu Thurman; literary

editor, Wanda Haltom; music editor, Rowena Hanson; dramatic editor, Florence Stranahan; athletic editor, Charles Thomas; snap shot editor, Inez Hamrick; Cartoonist, Lewis Johnson; joke editor, Leonard Bales. Enrollment last week in high school was 205, as compared to 193 this time last year. The grade enrollment also shows a healthy increase over last year, being 452, last year's being 419. The total enrollment on October 5th, 1923 was 657.

The football team is composed chiefly of new men, who are showing up well. This past week they have been practicing signals, punting, tackling, blocking and scrimmage work and are developing rapidly. Twenty-five men have been reporting for practice and the old men must work hard for their places on the team, which consists of the following: Wesley Tippin at quarter; Charles Thomas and Joe Maxwell, tackles; Verner Abplanalp and James Harrison, guard; Bill Lucas at end; Henry Himes, center; Bill Olsen and Warren Foland in backfield. Kenneth Mahan, Eric Tucker, Lloyd Johnson and Walter Severance are likely prospects for backfield. Lester Mackinster, Asberry Minor, and Kenneth Elliott are new men who are showing up well in the line.

The schedule is in progress now, the first game being played at Seaside the 19th. From the score with Astoria, Seaside appears to be exceedingly strong.

The remaining time before the game will be spent in stiff single practice and scrimmage.

Coach Sheeley refuses to predict the outcome of the game, but knows Tillamook High School will not make mean showing against Seaside, for the team shows an unusual amount of fight.

having 15 per cent reactors, are Indiana, 1; Michigan, 4; Tennessee, 2; North Carolina, 10. Michigan has 36 counties carrying on this work. North Carolina, 27 counties, \$80,000. This indicates the popularity of the area plan of testing.

Some idea of the progress of the tuberculosis eradication campaign might be gained from the following figure:

In 1917, the total number of cattle tested was 20,101; reactors found, 645; in 1923, total number of cattle tested was 3,460,849; reactors found, 113,844.

In our own county of Tillamook, approximately 4,000 head have been tested the second time by our county veterinarian, with less than a third of the reactors found in the same herds last year, at the last test. Last year 39 reactors were found in these herds, and this year only 11. Dr. Shaw made the following state-

ment relative to testing interest in this county, in response to a question by a Headlight reporter: "The spirit of cooperation shown in this county, is very encouraging, and should show very definite results at the end of the test season." The doctor is now testing in at the Clover Leaf cheese factory on the Kelchis river, and is working northward on his annual testing tour.

LILLIAN TINGLE, SAYS

In answer to an enquiry regarding diet:

"Then probably you could use more milk to advantage. You mention only two quarts daily for two children and two adults, one of whom is trying to gain weight. The children would do well to have a quart or nearly a quart each, and you should have a pint at least for yourself and from a pint to a quart (according to his special needs and his assimilation) for your husband. Then with the increase of milk you can easily cut down your meat and egg bill.

"A good rule to remember is that for every extra half pint of milk used in the daily diet the other protein foods, such as meat, eggs, fish, cheese, may be reduced by two ounces without any dietetic loss. Milk is usually the least expensive and the most easily served and assimilated of all the protein foods."
