Hubbard of this city died in a hospital Friday evening in Portland after an accident while working on the repair of a grain ship there. Mr. Hubbard evidently fell through a hatchway to a deck 28 feet below and when discovered he had broken a collar bone, shoulder blade, hip and pelvic bone. The cause of his death however was from pneumonia, having lain for some hours in the ship before he was found. The deceased is survived by his parents of this city, one brother W. I. Hubbard, of Tillamook, and two sisters, Mrs. J. M. Wilson of Tillamook and Mrs. W. P. Ulrich of Spokane, Wa. The body was taken to Spokane where burial took place Monday afternoon. NEAR EAST RELIEF The Ninety and Nine, the Bible story of how a good shepherd rescued a stray sheep was re-enacted with dramatic setting in the Near East at Christmas time. Instead of one sheep being lost, there were many hundreds of children that had been rendered homeless by the recent deportation of Christians from Turkey. In the Bible story, there was plenty of room for the one lost sheep. In the modern story, there was room for but 200 children, although several hundred should have been accommodated. The rescue was made by Near East Relief workers from Aleppo, according to advices just received by J. J. Handsaker, State Director Near East Relief, 613 Stock Exchange, Portland. Ethel Long Newman, O. A. C. '20 who is in charge of an American orphanage in the Russian Caucasus in the Near East, sent Christmas greetings to her Oregon friends through the Near East Relief, 613 Stock Exchange, Portland, and speaks of the great joy she has in seeing ragged, homeless orphans changed into happy, healthy, children. Eighteen hundred children call Mrs. Newman "Mother." That conditions of suffering in the Near East have not ceased is indicated by a letter just received from Greece

at the Near East Relief office in Portland by J. J. Handsaker, state director. The letter was dated early in December and states that the transfer of populations between Greece and Turkey is causing hideous suffering. The relief workers have taken down the sign from the Near East orphanage, as no more children could be accommodated and they were being asked daily to take children in. "As

the wet cold weather comes on the suffering and death rate will be appalling. We are asking to be allowed to give the refugee children one hot meal a day. Our answer from New York is that we must wait the results of the Christmas campaign in America for funds. In the meantime the children are hungry and we have no bread." "Do you wonder," the letter concludes, "that we are waiting al-

most breathlessly the outcome of your efforts to raise money?" BRIGHTON MILL RESUMES WORK The Brighton mill resumed operation again Tuesday morning after a shut down of several weeks to allow for repair work. The mill is now being supplied with logs by company's big new camp at Reeth

Clear YOUR Stump Land at Lower Co

BEFORE explosives were used on the farm, clearing land was heavy, costly work. Today, stumping can be done at a much lower cost.

Many ranchers in this section are using Pacific Stumping, the du Pont explosive, for clearing their stump land for profitable crops. Pacific Stumping does the job at lower expense and does it right. Pacific Stumping gives you one-half more sticks per dollar—about the same strength, stick for stick, as any standard stumping powder. It is non-freezing and won't give you a headache from handling.

We carry complete stocks of Pacific Stumping and other du Pont dynamites—recognized as standard wherever explosives are used. Let us estimate on the cost of clearing some of your stump land.

DOLLARS AND SENSE IN A NUTSHELL

More water to your cows when they want it means more milk. The proper way to get results from your cows is to have water before them at all times. Installing sanitary drinking cups not only increases your milk yield but eliminates lots of extra labor. It is a guaranteed fact that you get your money back on an increase in milk in 10 months, besides the saving of labor and inconvenience of having to run the cows out in bad weather. In the past 20 months I have installed 750 cups and on one of these could be bought from the user for the money it took to place them in the barn. It is a positive fact it not only results in an increase in production but also a saving of feed. Without water your cows would be non-producers, therefore sufficient water at the proper time increases your milk flow.

Remember Burckard Guarantees

the return of your money in 10 months on an increase in milk by installing sanitary drinking cups. One cup supplies two cows. These cups are \$4 each. It matters not how large or how small the herd, my guarantee holds good.
