On Hills, or in Traffic, " No Shifting of Gears

With the new Hupmobile, you can climb steep hills, or follow a team of walking horses through congested streets, without once changing gears.

The Hupmobile has always been noted for its powerflexibility, - the new production is even more remarkable in this respect.

It leaps forward like a deer when you "step on it" - and it settles down to a snail'space with sweetness and smoothness that delight.

Every practical advantage of performance is engineered into the new Hupmobile,and there is also built into it greater economy per mile, and higher investment value, we believe, than any car built today.

To those who must drive their cars over the roughest roads day after day, the new Hupmobile makes special appeal. The fact that it is

one of the toughest, strongest, staunchest cars on the market recommends it for the hardest service.

The fact is, that no car, whatever its price may be, is built of finer, more durable materials than the Hupmobile. Its workmanship and its measurements are equally fine.

You will find improvements and refinements in both body and chassis, -but it is characteristic of the Hupmobile that most intensive attention has been given to chassis betterments.

The motor is still smoother, still more powerful. Because of clutch and transmission improvements, gears shift with still greater ease.

The whole car reveals that Hupmobile engineering and production have achieved a still greater Hupmobile. A 15 minutes demonstration will convince you of that.

Gordon Hare
