WILL VOTE MORE BONDS

do exactly what the federal government is doing in federal farm loans; that is to pay the interest and part of the principal yearly instead of letting the principal accumulate for a period of many years and then attempt to pay it off all at once; meantime paying interest on the same during those years.

The present levy is sufficient to pay a part of the principal and all of the interest on the bonds proposed to be sold, so that it will not cost the taxpayers any more to retire the \$55,000,000 bonds now outstanding than they are now paying on the long time bonds which are not being paid, and upon which interest at the rate of 6 per cent per annum is running.

The common council for many months have been studying various plans whereby the financial condition of Tillamook city could be materially improved without increasing the tax levy, and have finally determined upon this method which has been shown to be sound and very desirable by the federal government in the case of all federal farm loans.

The bonds were bid in by Ladd & Tilton, Portland bankers at 1 1/2 per cent, and with \$10.53 premium per \$1,000 of the amount of the bond. Three other bidders competed for the loan, but the above firm gave the best quotations. The council signed up with the successful firm, subject to the decision of the legal voters of the city, to whom the matter will be referred for adoption or rejection.
