Seven years of thorough satisfaction

The Overland Freight Transfer Company of San Francisco operates over 125 pieces of automotive equipment, ranging in size from 10-ton Kleiber and G. M. C. tractors and 6-ton Doane trucks to Ford roadsters, all of which are probably subjected to as severe usage as any fleet of trucks in California.

This Company has ample facilities for testing out various lubricating oils and basing their choice on proven success in service. They write:

"After seven years of thorough satisfaction covering the lubrication of our equipment with your Zerolene oils and greases, we are more than pleased to again enter into a contract for our requirements."

In spite of the fact that many automotive engineers are of the decided opinion that the most suitable crude for the manufacture of an automobile lubricant is produced right here on the Pacific Coast, a certain proportion of the motoring public is still influenced by the superstition that there is something mysteriously "better" about eastern oils, just because they cost more.

ZEROLENE F for FORDS

—the Standard Oil Company's new improved oil for Ford cars "Feeds Those Oil-Starved Fords."

Why pay tribute to a superstition? The Zerolene-lubricated car develops better gasoline mileage, accumulates less carbon, costs its owner less for upkeep, and lasts longer.

Insist on Zerolene—a better oil—even if it does cost less.

This booklet reports independent service tests of Zerolene made by a number of large users. Ask any Standard Oil Company sales representative or Zerolene dealer for a copy.
