

### TILLAMOOK SYSTEM WORKS IN MINNESOTA

Market Agent C. E. Spence recently visited the Minnesota creamery association, giving the following facts regarding this large co-operative association. There are 630 creameries in the state. The independent creameries do only a part of the creamery business in the state. Of the 650 co-operative creameries about 500 market their milk through the central association; the other hundred million pounds of milk were handled for the co-operative creameries by the association. The manager estimates an increase of 1 1-2 cents per gallon was netted the creameries by the association. This was accomplished by carload shipments and lower freight charges on small shipments; by bringing up the price of butter thru a system of pooling, and by marketing thru a central agency.

The association has an adequate storage and refrigerator system. Paul and the creameries are equipped in like manner. No grade is used by the association; all such being shipped to other states, and the producer gets the receipts from same. Standardization has been the big thing in the central organization. Tillamook system of inspection, sanitation and management was used closely.

### HE'S COMING!

greatest movie-star of them is to Tillamook Monday August 11 the Al G. Barnes wild animal movie star, whose name has on the lips of all motion-picture goers throughout the country, and who appeared in some of the most popular films released in the past has signed up with the Al G. Barnes secured him from the National Motion Picture Corporation, Universal City, at a cost of \$100,000 after the famous star had the desire to try his hand at the circus.

movie star is none other than Al G. Barnes, himself.

dition, you will see Lotus, largest only performing blood-sweat-and-tear act in the world, who sits at every sitting.

table of hay and a bushel of the greatest sensation on the program is the gigantic extravaganza "Pocahontas at the Court of Anne," the colossal feature which is the entertainment. Don't miss it.

ective speaking campaign of political parties will not start until the candidates on the several have been formally notified they have been chosen by their voters. After these notifications have been placed the country may expect numerous speakers to appear and present the claims of the parties for whom they speak.

it is true that certain men

claiming to represent organized labor have stated their preferences, it is a well-known fact that labor, that is, the body of men making up the rank and file of the different organizations, deeply resent the treatment labor received at the hands of the democratic convention when the Davis managers ruthlessly shoved George L. Berry, leading democratic candidate for vice president, to one side for "Brother Chas." Bryan, despite the fact that Berry's friends had been told by the Davis adherents that he, Berry, would make a most acceptable running mate. Major Berry's slap in the face by the Davis folks has also caused the veterans of the world war to deeply resent the cruel and unnecessary treatment of one who served with distinction in the world war.

The talk of labor being solid for the independent candidate, or any candidate, no one takes seriously. Labor farmers, business men, clerks, or any other body of citizens, cannot be delivered by anyone to any candidate. American citizens cannot be bossed around like sheep. Labor, or any other body of citizens, cannot be fooled by beautiful phrases or by promises which any thinking man knows cannot be fulfilled.

Only a fraction of a ton of coal burned in the family furnace is actually used to heat the house. At the same time, seventeen times as much, in actual weight, as is shoveled into the furnace is sent up the flue in the form of gas.

Sixteen tons of this gas, consisting of the gases of the atmosphere, oxygen and nitrogen, are carried along with the coal gas for every ton of coal that is burned. In this way much of the heat efficiency of the coal is lost which would otherwise be recaptured if distributed through mains as in the case of city gas. Twelve of these tons and a little more are of nitrogen, which goes through the fire unchanged. Almost four tons of oxygen, necessary for combustion, are also sent up in the form of carbon dioxide, sulphur dioxide and water vapor.

Most of the coal, one thousand five hundred pounds or so, also escapes, less than one part in a hundred forming smoke. Most of the five hundred pounds remaining are ashes. As compared with gas heating, this coal has a steam raising efficiency of only 40 to 50 per cent where the former has from 78 to 83 per cent. In heating by hot air distribution, coal usually has an efficiency of considerably less and the average for gas is around 70 per cent.

Oregon forest roads get \$385,000 from federal funds to be applied as follows: 26 miles The Dalles-California highway, in Deschutes national forest, \$120,000; extension of McKenzie road in same forest, \$25,000; Roosevelt highway between Hauser and Coos-Douglas county line, \$100,000; surfacing of Mt. Hood loop, \$75,000; Roosevelt highway in Siskiyou national forest, \$75,000; Alesia river highway near Siuslaw forest, \$18,000; forest, near Mule hill, \$22,000; main one mile new road in Crater national tenance of highways \$34,000.

### MORE FOREST AREAS CLOSED TO SMOKING

The closing of the entire Deschutes National Forest to smoking has just been announced by District Forester Geo. H. Cecil of the U. S. forest service, Portland, Oregon. Mr. Cecil has also announced the closing of the east half of the Columbia National Forest to camping or smoking. Forest officers have been instructed to issue no permits for the above uses on these areas, Mr. Cecil said.

In addition, the closing of the following areas on the Umatilla National Forest has just been authorized, according to Mr. Cecil's statement; all national forest land upon the watersheds of Cable Creek, Winona Creek, Big Creek, Meadow Creek, Fly Creek, Chief Creek, Frazier Creek and a portion of Hidaway Creek; also all of the Mill Creek watershed.

These regions are designated as areas of extreme fire hazard and are closed under the provisions of trespass regulation T-1 of the United States department of agriculture, according to the district forester's statement.

The closing of these additional areas is made necessary by the fact that much of the worst part of the fire

season is still ahead and that these dangerous areas are annually frequented by large numbers of travelers, campers, and berry pickers, according to the report. A portion of the area closed on the Umatilla constitutes an important unit of the city water supply of Walla Walla, Washington. The present season is said to be one of extra high hazard and the woods are entirely too dry to take any unnecessary chances of fire getting started.

Crop donations in Southern Alberta are excellent, according to reports. The hot weather following on the recent rains has brought the growing grain along very rapidly and the outlook is considered decidedly optimistic. Lethbridge reports that with a July rain there is bound to be a bumper crop, while Cardston reports that crops were never better.

### BAD ACCIDENT AT PLEASANT VALLEY

Last Sunday evening William Retlefsen, one of the owners of the Oregon mirror and bevelling works, Portland, Mrs. Retlefsen and Mr. Retlefsen's brother were victims of an accident near Pleasant Valley. They were coming toward Tillamook on the way to Oceanside, and in attempting to go past a car that was

parked on the pavement were struck by a third car that was attempting to pass at the same point. The Retlefsen car was knocked off the pavement and tipped over. All the occupants were more or less seriously injured. Mr. Retlefsen was taken to the hospital with a collar bone broken in two places. The other two members of the party were cut with the broken glass. The machine that was parked and the other one that was mixed up in the accident were both out of sight when the victims were able to investigate the identity of the other people. The injured trio are rapidly improving at Oceanside waiting about \$900 worth of repairs on their car.

### FOUR MARRIAGE LICENSES ISSUED

Four marriage licenses were issued at the county recorder's office during the week. Curtis L. Wise was married to Helen M. Johnson of Manhattan on the 4th, and Ralph G. Gardner and Edna G. White of Cloverdale were married on the 5th by E. W. Stanley, justice of the peace. Licenses were also issued to Fred Audelott and Maybel K. Towers of Garibaldi, and Frank G. Mitchell and Dorothy L. Hare of Tillamook.

## Specify "Check" Seal Commercial Lighting

### You'll get better light in your business

MAKE the lighting in your place of business a part of the service you render the public. No matter what business it is—in stores, offices, garages, banks or hotels—people expect modern lighting and it's a good policy to see that they get it.

You'll get the right light in your business if you entrust your commercial lighting work to a "Check" Seal contractor.

"Check" Seal contractors install standard electrical equipment—for example, G. E. Edison Mazda Lamps, Ivanhoe Trojan fixtures and Holophane reflectors. They give specialized workmanship at a fair price.

Specify "Check" Seal commercial lighting in your place of business! You'll be sure of getting all the latest lighting improvements. For "Check" Seal contractors are in constant touch with the lighting specialists of this company. That means that they can furnish you with the most recent plans and equipment for gaining the best lighting effects.

IN the interest of better electrical service, we publish the "Electrical How for Householders," a booklet which describes and illustrates the latest and most efficient methods for the use of electricity. The 1924 edition of this booklet can be had free from "Check" Seal contractors and retailers or by writing to our nearest office.

The "Check" Seal is the trade mark of the Pacific States Electric Company—the largest distributor of electrical merchandise on the Pacific Coast. This Company does not sell direct to you but its merchandise can be bought through reliable electrical contractors and retailers. Every electrical product marked by the "Check" Seal has been inspected and certified by this company. Every electrical contractor and retailer who displays the "Check" Seal is committed to the "Check" Seal policy of standard materials, good workmanship and fair prices.
