The Tillamook Creamery manufactured a small quantity of Swiss Block cheese, and while the returns for the same were quite good, the patrons of the creamery generally desire to receive their returns earlier than is possible by making the Swiss cheese. Owing to the excellent quality of cheese manufactured by the Tillamook Creamery this summer, our cheese at all times brought the highest market prices and we were enabled to make greater returns for butter fat to the patrons during all the summer months than any other private or co-operative factory in the county paid during the same period of time. This is as far as I can learn. In spite of the dry season of 1904 the factory received for the year an increase of 361,000 lbs. of milk over the year 1903, or nearly 30 per cent. All indications point to a still greater proportionate gain for 1905, as we are now receiving milk from several patrons who are hauling their milk a distance of from four to over five miles. Among the several factors contributing toward these results are the very excellent service rendered the factory by its management and a disposition on the part of the farmers and patrons to patronize a factory managed by themselves. That this can be done successfully, our returns for the past year will show, and the spirit of unrest so prevalent among the dairymen of this county at this time is practically absent among the patrons of our factory.

ANNUAL REPORT OF THE TILLAMOOK CREAMERY

Tillamook, Oregon, February 11th, 1905.

To the Directors Stockholders and Patrons of the Tillamook Creamery: Gentlemen:—I present herewith my report as secretary of the Tillamook Creamery for the fiscal year ending December 31st, 1904.

Total amount of milk received at the factory during 1904, 1,582,021, lbs. cream, 833 lbs.

Total amount of butter manufactured and sold, 95,445 lbs.

Total amount of cheese manufactured and sold, 95,445 lbs.

Milk used in the manufacture of cheese during the summer months as follows: April 43,770 lbs., May 237,552 lbs., June 280,165 lbs., July 218,436 lbs., August 173,280 lbs. and during the month of November 2,363 lbs., a total of 955,566 lbs.

Milk used in the manufacture of butter, 626,453 lbs. Cream used in the manufacture of butter, 833 lbs.

Returns as follows, for cheese \$8,847.41. For butter \$6,675.78. Total for the year \$15,613.19.

Paid patrons for butter fat as follows, to-wit: for butter, January 30 cents, February 28 cents, March 25 one tenth cents, April 19 cents, September 23 cents, October 23 two tenths cents, November 21 1-2 cents, December 25 two tenths cents.

For milk manufactured in to cheese butter fat was paid for as follows: April 24 1-2 cents, May 23 two tenths cents, June 21 cents, July 20 cents and for August 21 cents.

Owing to the unfavorable transportation facilities and the bad weather this fall, the marketing of butter has not been very successful.

The factory received for making cheese for the year 1904, 1 1-2 cents per lb. or 15 cents per cwt. for milk manufactured into cheese. For making butter the factory charged 2 1-2 cents per lb. and received 11 six tenths cents per cwt. for milk manufactured into butter. Total receipts for the year were \$2,175.93 for making. Experience account for the year was \$2,168.25, leaving a small balance. Permanent improvements were installed costing \$119.89.

The price charged for making cheese is quite adequate to pay all expenses incident to running the factory and will leave a small margin, but the price charged for making butter is entirely inadequate to pay all cost of making and selling and other expenses. While it seems to be almost necessary to charge as small an amount as any other factory, and the least increase in the price of making has a tendency to drive milk to other factories, this question should be met. However, the indications for the coming year all pointing toward a higher price for cheese than during 1904, this, together will the milk promised the factory for the ensuing year will leave the factory in much better financial condition than for the past few years.

In conclusion I wish to say that all relations between the Directors and Secretary have been most pleasant and we have worked together harmoniously in all lines, and have tried to do the best we could under the circumstances under which we labored.

Respectfully submitted,
Carl Haberlach, Secretary.

BRIEF PERSONAL NEWS

Friends of Miss Roletta Watson will be glad to know that she is able to be about after her illness. She is still unable to attend school but it is hoped that it will not be long until she is able to again join her class.

Miss Christine Anderson who has for the past year been a stepographer for the Link Motor company left this week for Weiser, Idaho where she has a position as instructor of music in the schools. Miss Anderson has a very fine voice and considerable musical ability and will be much missed the coming season.

Miss Agnes Coates was a Portland visitor Thursday and Friday of last week.
