

**FEDERAL GAME LAW VIOLATORS TO PAY HEAVY FINES**

Heavy fines are helping to prevent violators of the federal game regulations from profiting by their attempts to evade the law. As an instance of the severity with which violations of the migratory bird treaty act are regarded, a man was arraigned in the Federal court at Bangor, Me., at the June term for shipping partridges from Maine to New York contrary to state law and in violation of section 4 of the migratory bird treaty act. He entered a plea of guilty and was fined \$200. The accused had previously been prosecuted in State court, where he paid a fine of \$200 and costs. The evidence was obtained by Federal Wardens George E. Cushman and B. E. Smith, of the Biological Survey of the United States Department of Agriculture.

**THE SWASTIKA CLUB**

The Swastika club met at the home of Mrs. E. T. Haltom on September 26. The rooms were tastefully decorated with beautiful flowers.

Miss Camille Haltom rendered a vocal solo which was greatly appreciated.

The hostess served a delicious luncheon to members and the following guests: Mesdames Partridge, Morrison, Lamb, Groat, Crenshaw and Reichers.

At the close of the afternoon Mrs. Koch rendered a special vocal solo which was greatly appreciated.

The club will meet with Mrs. Koch on October 17.

**CIRCUS HORSES BURN**

Dancing horses owned by the A. I. G. Barnes circus which shopped in Tillamook this summer were burned in a freight car in California Wednesday morning. There were 36 animals valued at \$100,000 in the car, and all perished. The cause of the fire is not given in reports. The circus was bound for Willows after having shown in Chico.

**FORD-STRANAHAN WEDDING**

A very pretty home wedding took place at the residence of Guy Ford Thursday afternoon at 2 o'clock, the Rev. Louis Anderson officiating. The contracting parties were Florence C. Stranahan and Ernest E. Ford, two well known and popular young people of the city. The bride has spent most of her life in the city, being a graduate of the local high school. She was very popular with the younger set. The groom was born in this county and is also a graduate of the high school here. At present he is connected with the Union oil company in the capacity of salesman.

The home was beautifully decorated with a profusion of flowers. A wreath of flowers in each room added a touch of color and gaiety and imparted unusual cheer to the occasion. A very delightful luncheon was tastefully served by the mother of the groom. The brides cake was an artistic creation in pink and white which was daintily served by the bride.

The bride was handsomely gowned in pink crepe de chine and wore a string of pearls, and an exquisite corsage bouquet of pink rosebuds, primroses and sweet peas.

The following guests were present: Mr. and Mrs. Guy Ford, Mr. and Mrs. F. A. Beltz, Mr. and Mrs. Carl Schultz, Mr. and Mrs. Harry Hogan, Mr. and Mrs. Oscar Werschkul, Mrs. Alfred Anderson and daughter Pearl, Mr. and Mrs. Carlisle Stranahan, Mrs. George Kiehm and daughter Helen,

Mrs. Elizabeth Hogan, Henry W. Anderson, Corinne Stranahan and Raymond T. Ford.

Many beautiful and useful gifts were received. The bride and groom left for a honeymoon trip into Washington and possibly Canada. On their return they will be at home in the Merrick apartments.

Mr. and Mrs. Alvin Stormer were presented with an eight pound boy Sunday night, September 2nd. Mr. Stormer is owner of the Palace fruit stand.

Otis Edwards is confined to his bed with scarlet fever.

John E. Millan, foot ball player of Linfield college, received a dislocated shoulder in last Saturday's game with the local players. Dr. Ringo placed the shoulder back in place and Mr. Millan was able to accompany the boys home.

Mr. and Mrs. Ralph Bennett and daughter Alice visited relatives in Dallas from Thursday to Sunday last week. They also spent one day at the state fair.

Mrs. M. D. O'Connell of the News at Garibaldi was in the city today on business.

Mrs. Rose Wilkes returned Tuesday evening from Colorado where she attended the convention of the Reliance Life Insurance company. She reports a wonderful trip.

Mr. and Mrs. L. L. Short of Garibaldi were in the city Thursday shopping. The Shorts are building a home in Garibaldi.

Jesse Earl was in from Long Prairie Thursday.

Dr. E. D. Allen will be back in the office with Dr. P. J. Sharp after October 6.—Adv.

Herbert Stam is in town today from Brighton where he is employed at the mill.

**RADIO HAS NOT REPLACED WIRE IN WEATHER REPORTS**

The use of radio in collecting weather reports has made very rapid progress in the last few years. In Europe, radio has almost completely replaced wire telegraphy for this purpose. In each of the European countries the reports are assembled from the various weather stations, generally by radio, but sometimes by wire, at a single central point, from which they are broadcast by a high-power radio station. Each of these national centers is assigned certain hours of the day for sending out its radio reports. The radio station on the Eiffel Tower, in Paris, besides serving as the distributing point for French reports, sends out collective messages containing data for the whole of Europe and northern Africa, and also messages containing reports received by radio from the Weather Bureau of the United States department of agriculture, which contain the results of observations made over the greater part of the North American continent, including Alaska, and also from ships in the western part of the Atlantic.

In the United States, where the weather bureau has always had very efficient service from the telegraph companies, wire telegraphy is still used for collecting weather reports from domestic points, and also in exchanging reports with Canada and Mexico. The weather bureau receives, however, weather reports by radio from Europe, the Far East, many remote places in high latitudes, and from a large number of ships at sea.

**WORM-FREE PIGS TOP MARKET**

Hog raisers of Clay County, Nebr., have built more than 1,000 movable hog houses during the past two years, according to reports to the United States department of agriculture, in order to keep their herds on clean ground and prevent roundworm infestation. Farmers of the county became interested in hog-lot sanitation in 1922, when the county agricultural agent arranged with two hog raisers to carry on demonstrations of the method and the results obtained by following the system. The litters which were farrowed and kept on clean pastures were in both cases much more thrifty than those kept in old, infested quarters. In one case, where 35 litters were farrowed in clean quarters and kept on clean pasture, 228 pigs were weaned without a runt. These pigs topped the market in six months, when they averaged 185 pounds each. Litters on the same farm which were kept in old hog lots soon developed runts. A farmers' automobile tour was organized to visit the demonstrations and a number of individual visits were also made by farmers from all parts of the county. The economic advantage of hog-lot sanitation was so evident that farmers throughout the county are successfully following the practice or are building movable hog houses and completing other arrangements to adopt the system.

More and more are women entering on work previously open only to men. One of the most recent examples is that of Miss Margaret W. Wythe, of the Museum of Vertebrate Zoology, Berkeley, Calif., who was appointed temporary inspector of foreign birds and mammals at the port of San Francisco. The inspection of importations of foreign birds and mammals for the purpose of preventing the entrance of animals and birds injurious to agriculture is one of the functions of the Biological Survey of the United States Department of Agriculture. This is the first time in the history of the bureau that a woman has been appointed to make

inspections of foreign birds and mammals at any port in the United States.

**BOY WINS HOMING PIGEONS IN BIRD-HOUSE CONTEST**

Interest in the conservation of wild life is being stimulated in various ways by appeals to school children. One very popular method of engaging and holding attention is by means of a contest of some sort, usually for a prize, as both the contest and the awarding of the prize offer an opportunity to bring the desired message to the public. One of the most satisfactory of these competitions was a bird-house contest recently conducted in the public schools of Baker, Oregon. Campbell Vermillion, 10 years of age, who came out winner, was awarded a pair of homing pigeons by Federal Game Warden Tonkin for being the first successful contestant to attract a pair of birds (other than English sparrows) to make their home in a bird house of the participant's own construction. Mr. Tonkin is employed by the Biological Survey of the United States department of agriculture.

**COLLEGE STUDENTS BUY USED CARS**

College students form the largest and best group of prospects for used automobiles in the country, according to a survey just made by an automobile company. Figures obtained from a widely separated list of dealers in college cities showed that 42 students purchased used cars to every 12 that bought new automobiles. One used car dealer in a college town reported the sale of 500 used cars to students during 1923. An automobile dealer at Ann Arbor, Michigan, the home of the University of Michigan, sells an average of 75 used cars yearly to university students.

As a supplementary check on this survey, investigations were made in three representative cities to determine the trend among high school students who were car owners. Here, also it was found that the used car was in great demand. Students, either college or high school, were found to be purchasers either of used cars

or low priced new cars. In most cases they preferred a used car of a better make than they could afford if buying a new automobile.

The inquiry developed that automobile ownership by college and high school students was in most cases necessary and was not for "joy riding" purposes. Colleges are rapidly doing away with dormitories, with the result that students are finding living quarters in private homes, often miles from the college campus. In such cases the automobile is serving the students as it is serving the great mass of workers who use their cars for transportation to and from work daily.

A large number of high school students also are using cars for the same purpose and by means of the automobile thousands of girls and youths living in rural sections are enabled to attend high schools in neighboring cities.—Exchange.

**STRANAHAN—JENKINS WEDDING OCCURS AT VANCOUVER**

Miss Amiette Jenkins and Carlisle Stranahan surprised their friends here by being married at Vancouver last week. Mr. Stranahan is employed with the county surveyor and the bride is the daughter of Mr. and Mrs. Eugene Jenkins.

**USEFULNESS OF DAIRY BULL IS INFLUENCED BY RATIONS**

One of the most important aims of the dairyman should be to have the services of a good, well-bred bull, says the United States department of agriculture, and then, having a good

**It Starts Here**  
"I wouldn't be without ZEPYROL," says one man who has been free of colds for years. He prevents SORE THROAT, TONSILITIS, HEAD COLDS by using ZEPYROL at the first signs.  
At all Druggists  
Be sure to say  
**ZEPYROL**  
Prevents colds and relieves sore throat

bull, he should be given the care and management that will insure the greatest profit from him. He should be so fed and exercised as to maintain his activity and healthy, vigorous condition.

The amount of grain to feed to dairy sires varies from 4 to 10 pounds, depending on the size and condition of the animal and the kind of roughage. A grain mixture recommended by the department as having been used with success consists of 3 parts ground corn (by weight), 2 parts ground oats, 2 parts wheat bran, and 1 part linseed meal. Another mixture suggested consists of 3 parts ground oats, 2 parts wheat bran, 1 part ground corn or barley, and 1 part linseed meal.

Ground oats are considered especially valuable for bulls. Cottonseed meal is not usually regarded with favor, especially when fed in large amounts. Some breeders think it causes impotency.

On some farms the bulls are given the spoiled or musty hay or waste feed left by other animals. This is poor practice. It is just as neces-

sary to feed the bulls properly as the cows. The legume hays—alfalfa, clover, vetch, cow bean, cow-pea—are in recent years.

The only protection the farmer has against damage to his exposed crops from hail is hail insurance. This form of insurance has been practiced on a large scale in Europe for more than a century and in recent years has made rapid progress in this country.

Harding grass, the relatively new perennial in Oregon, has been tried on the experiment station farm for several years and found not so good for hay on average tillable lands of Oregon as clover or vetch and grain or timothy, and inferior to a well selected mixture for pasture.

Eugene—Bottling works to be established on Eighth avenue.

**THE DEEP SEA FISHING BOAT RICHARD M.**  
Will make trips leaving Garibaldi At 1 P. M. EVERY SUNDAY As long as weather permits.

**Remington Portable**

Every Feature Common to the Big Machines

Yet it is so small that it fits in a case only four inches high.

There are six good reasons why the Remington Portable is the recognized leader—in sales and popularity.

They are:

- Durability and Reliability
- Compactness and Portability
- Four-Row Standard Keyboard
- Ease of Operation
- Beautiful Work—Always
- Universal Service

Price, complete with case, \$60. Easy payment terms if desired.

Call in and let us show you the many advantages of a Remington Portable.
