TUNE UP FOR WINTER
CHANGE TO ZEROLENE
WINTER LUBRICANTS

Long starting sessions in the morning with your car are neither safe nor necessary.

You need Zerolene low "cold-test" oils that flow freely in spite of the cold. Since they won't congeal, they don't let cylinder walls or bearings get scored, nor cause crankcase dilution, nor make you overwork your starter and battery.

The Zerolene Correct Lubrication Chart tells you the right oil to use in your car over the winter.

Head for the Zerolene sign at dealers, garages or Standard Oil Service Stations and make the change to winter lubrication today.
